Pop L.A. Cécile Whiting, 2008-08-04 In this original and engaging book Cécile Whiting examines what Pop looked like when it left the highbrow cloisters of Manhattan's art galleries and ventured westward to the sprawling suburbs of Los Angeles Overdrive Wim de Wit, Christopher James Alexander, 2013 This is a fascinating and intelligently illustrated study of architectural innovation in Los Angeles From 1940 to 1990 Los Angeles rapidly evolved into one of the most populous and influential industrial economic and creative capitals in the world During this era the region was transformed into a laboratory for cutting edge architecture Overdrive examines these experiments and their impacts on modern design reframes the

perceptions of Los Angeles dynamic built environment and amplifies the exploration of the city's vibrant architectural legacy. Infrastructural Optimism Linda C. Samuels, 2021-09-29 *Infrastructural Optimism* investigates a new kind of twenty-first century infrastructure: one that encourages a broader understanding of the interdependence of resources and agencies; recognizes a rightfully accelerated need for equitable access and distribution; and prioritizes rising environmental diligence across the design disciplines. Bringing together urban history, case studies, and speculative design propositions, the book explores and defines infrastructure as the basis for a new form of urbanism emerging from the intersection of architecture, landscape architecture, and urban design. In defining this new infrastructure, the book introduces new dynamic and holistic performance metrics focused on measuring what matters over growth for the sake of growth and twelve criteria that define next-generation infrastructure. By shifting the focus of infrastructure from our largest public realm to environmental symbiosis and quality of life for all, design becomes a catalytic component in creating a more beautiful, productive, and optimistic future with *Infrastructural Urbanism* as its driver. *Infrastructural Optimism* will be invaluable to design, non-profit, and agency professionals and faculty and students in the fields of architecture, landscape architecture, and urban design, working in partnership with engineers, hydrologists, ecologists, urban planners, community members, and others who shape the built environment through the expanded field of infrastructure.

Through an analysis of abandoned archival works, experimental films, and other projects, Andrew Witt offers an expansive account of the artists who have lived or worked in Los Angeles, delving into the region's history and geography, highlighting its racial, gender, and class conflicts.
