Lost Worlds Jonathan Dewald, 2007-08-09 Today's interest in social history and private life is often seen as a twentieth century innovation Most often Lucien Febvre and the *Annales* school in France are credited with making social history a widely accepted way for historians to approach the past In *Lost Worlds* historian Jonathan Dewald shows that we need to look back further in time into the nineteenth century when numerous French intellectuals developed many of the key concepts that historians employ today According to Dewald we need to view Febvre and other *Annales* historians as participants in an ongoing cultural debate over the shape and meanings of French history rather than as inventors of new topics of study He closely examines the work of Charles Augustin Sainte Beuve Hippolyte Taine the antiquarian Alfred Franklin Febvre himself the twentieth century historian Philippe Ariès and several others A final chapter compares specifically French approaches to social history with those of German historians between 1930 and 1970 Through such close readings Dewald looks beyond programmatic statements of historians intentions to reveal how history was actually practiced during these years A bold work of intellectual history *Lost Worlds* sheds much needed light on how contemporary ideas about the historian's task came into being Understanding this larger context enables us to appreciate the ideological functions performed by historical writing through the twentieth century

Darwin's Lost World, 2010-03-11

Darwin made a powerful argument for evolution in the *Origin of Species* based on all the evidence available to him. But a few things puzzled him. One was how inheritance works; he did not know about genes. This book concerns another of Darwin's Dilemmas and the efforts of modern palaeontologists to solve it. What puzzled Darwin is that the most very ancient rocks before the Cambrian seemed to be barren when he would expect them to be teeming with life. Darwin speculated that this was probably because the fossils had not been found yet. Decades of work by modern palaeontologists have indeed brought us amazing fossils from far beyond the Cambrian from the depths of the Precambrian so life was certainly around. Yet the fossils are enigmatic and something does seem to happen around the Cambrian to speed up evolution drastically and produce many of the early forms of animals we know today. In this book Martin Brasier, a leading palaeontologist working on early life, takes us into the deep dark ages of the Precambrian to explore Darwin's Lost World. Decoding the evidence in these ancient rocks, piecing together the puzzle of what happened over 540 million years ago to drive what is known as the Cambrian Explosion is very difficult. The world was vastly different then from the one we know now and we are in terrain with few familiar landmarks. Brasier is a master storyteller and combines the account of what we now know of the strange creatures of these ancient times with engaging and amusing anecdotes from his expeditions to Siberia, Outer Mongolia, Barbuda and other places, giving a vivid impression of the people, places and challenges involved in such work. He ends by presenting his own take on the Cambrian Explosion based on the picture emerging from this very active field of research. A vital clue involves worms burrowing; worms are one of the key signs of the start of the Cambrian. This is fitting. Darwin was inordinately fond of worms.

The Lost World of Fossil Lake Lance Grande, 2013-06-14

The landscape of southwestern Wyoming around the ghost town of Fossil is beautiful but harsh: a dry high mountain desert with cool nights and long cold winters inhabited by a sparse mountain desert community. But during the early Eocene, more than fifty million years ago, it was a subtropical lake surrounded by volcanoes and forests and teeming with life. Buried within the sun-baked limestone is spectacular evidence of the lush vegetation and plentiful fauna of the ancient past, a transitional ecosystem giving us clues to how North America recovered from a great extinction event that wiped out dinosaurs and the majority of all species on the planet. Paleontologists have been conducting excavations at Fossil Butte for more than 150 years and with *The Lost World of Fossil Lake*, one of the world's leading experts on the fossils from this spectacular locality takes readers on a fascinating journey through the history of the discovery and exploration of the site. Deftly mixing incredible color photographs of the remarkable fossils uncovered at the site with an explanation of their evolutionary significance, Grande presents an unprecedented comprehensive portrait of the site, its treasures and what we've learned from them. Grande presents a broad range of fossilized organisms from Fossil Lake, from single-celled algae to palm trees to crocodiles, and together they make this long extinct community come to life in all its diversity and splendor. A field guide and atlas round out the book, enabling readers to identify and classify the majority of the known fossils from the site. Lavishly produced in full color, *The Lost World of Fossil Lake* is a stunning reminder of the

intellectual and physical beauty of scientific investigation and a breathtaking window onto our planet's long lost past
