Encyclopedia of American Literature of the Sea and Great Lakes Jill B. Gidmark,2000-11-30 The sea and Great Lakes have inspired American authors from colonial times to the present to produce enduring literary works This reference is a comprehensive survey of American sea literature The scope of the encyclopedia ranges from the earliest printed matter produced in the colonies to contemporary experiments in published prose poetry and drama The book also acknowledges how literature gives rise to adaptations and resonances in music and film and includes coverage of nonliterary topics that have nonetheless shaped American literature of the sea and Great Lakes The alphabetical arrangement of the reference facilitates access to facts about major literary works characters authors themes vessels places and ideas that are central to American sea literature Each of the several hundred entries is written by an expert contributor and many provide bibliographical information While the encyclopedia includes entries for white male canonical writers such as Herman Melville and Jack London it also gives considerable attention to women at sea and to ethnically diverse authors works and themes The volume concludes with a chronology and a list of works for further reading **Lost at Sea** Michael Goss,2010-01-28 A mother pleads with her son not to sail on a certain steamer because she has dreamt three times in a row that the vessel will never reach its destination Modern day observers watch in awe as a ghost ship blazing from bow to stern dutifully reenacts a two hundred year old tragedy that the observers fathers and grandfathers also watched reenacted with the same sense of awe A crewman walks past a solitary figure seated in the ship s restaurant only to turn a moment later and find the restaurant empty A red glow appears in the darkness ahead of a modern warship and the faint outline of an old galleon her sails in tatters is seen approaching against the wind only to vanish a moment later before the startled eyes of observers Such strange events have been seen for centuries and continue to be reported even today by witnesses who are for the most part sober and responsible human beings In *Lost at Sea* folklore specialist Michael Goss and George Behe an expert on maritime disasters explore what lies behind these amazing narratives and enduring legends A History of Small Business in America Mansel G. Blackford,2003-11-20 From the colonial era to the present day small businesses have been an integral part of American life First published in 1991 and now thoroughly revised and updated *A History of Small Business in America* explores the central but ever changing role played by small enterprises in the nation s economic political and cultural development Examining small businesses in manufacturing sales services and farming Mansel Blackford argues that while small firms have always been important to the nation s development their significance has varied considerably in different time periods and in different segments of our economy Throughout he relates small business development to changes in America s overall business and economic systems and offers comparisons between the growth of small business in the United States to its

development in other countries He places special emphasis on the importance of small business development for women and minorities Unique in its breadth this book provides the only comprehensive overview of these significant topics *Making Seafood Sustainable* Mansel G. Blackford, 2011-12-30 In the spring of 2007 National Geographic warned The oceans are in deep blue trouble From the northernmost reaches of the Greenland Sea to the swirl of the Antarctic Circle we are gutting our seas of fish There were legitimate grounds for concern After increasing more than fourfold between 1950 and 1994 the global wild fish catch reached a plateau and stagnated despite exponential growth in the fishing industry As numerous scientific reports showed many fish stocks around the world collapsed creating a genuine global overfishing crisis *Making Seafood Sustainable* analyzes the ramifications of overfishing for the United States by investigating how fishers seafood processors retailers government officials and others have worked together to respond to the crisis Historian Mansel G. Blackford examines how these players took steps to make fishing in some American waters especially in Alaskan waters sustainable Critical to these efforts Blackford argues has been government and industry collaboration in formulating and enforcing regulations What can be learned from these successful experiences Are they applicable elsewhere What are the drawbacks *Making Seafood Sustainable* addresses these questions and suggests that sustainable seafood management can be made to work The economic and social costs incurred in achieving sustainable resource usage are significant but there are ways to mitigate them More broadly this study illustrates ways to manage commonly held natural resources around the world land water oil and so on in sustainable ways *Dying to fish living to fish : Fishing Vessel Casualty Task Force report* United States. Coast Guard. Fishing Vessel Casualty Task Force, 1999 *Pathways to the Present* Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam *Pathways to the Present* is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south **John Derek** Michelangelo Capua, 2020-04-03 Actor and

director John Derek was born in Hollywood where his striking good looks helped get him a contract with David O Selznick Derek's career took off after Humphrey Bogart made him his costar in the cultish noir *Knock at Any Door* Derek appeared in such Academy Award nominated films as *All the King's Men* *Run for Cover* *The Ten Commandments* and *Exodus* and worked with directors like Nicholas Ray Cecil B DeMille Otto Preminger and others He was a competent dedicated performer even in his last trivial roles In the 1960s his career in decline he began directing his own films Although critics panned the string of movies he made starring his three wives Ursula Andress Linda Evans and Bo Derek some were box office hits like *Tarzan the Ape Man* This biography covers his extraordinary life and career with extensive analysis of his films

**American Resolve and the Art of War** John Proctor,2012-09-28 Since the end of World War II Americans realized that the only way to keep America out of war is to keep the world out of war Americans also realize that today their country is the leader of the Western World if not the whole world The leadership role was thrust upon the United States when its traditional allies are weak Thus all decisions made by the United States must also be implemented by the United States A Chinese general said Ultimate excellence lies not in winning every battle but defeating the enemy without ever fighting This should be America's goal but it seems that this can only be achieved with a large standing army However there is an alternative This goal can be achieved with a strong disciplined reserve force which will cost only a fraction of a large standing army The reserve force should be trained to implement skillful and innovative tactics Excellent training will also accomplish another significant goal minimize American casualties
