Analogical City Cameron McEwan,2024-01-18 In *Analogical City* Cameron McEwan argues for architecture s status as a critical project McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition studying a neglected aspect of his thought the analogical city to excavate its potential McEwan develops a grammar of the analogical city under the headings of Imagination Transformation City Multitude and Project McEwan argues that the analogical city is critical collective and emancipatory Analogical thought and understanding cities as analogical might open the conditions of possibility for rethinking the critical project in architecture At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post truth narratives and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city McEwan offers critical strategies conceptual tools figures of thought and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice Today knowledge is a common terrain of struggle and thought requires constant reinvention The task of architecture and critique more broadly must be to interpret the world in order to change it Consequently *Analogical City* proposes modes for imagining the city the subject and the world otherwise towards a more egalitarian and critical architecture of the city Ultimately the analogical city is not a fully developed theory nor is it only an intuitive poetic or purely formal practice as some critics propose McEwan argues that the analogical city is poetic and political it always refers beyond itself towards a collective and critical project of the city and yet it invites a series of formal spatial and graphic operations comprising erasure and negativity followed by substitution and remontage *Rem Koolhaas/OMA* Roberto Gargiani,2008-01-01 *Projekter og bygninger af den hollandske arkitekt Rem Koolhaas og de vrige medlemmer af OMA* gennemg es i kronologisk orden *OMA/Rem Koolhaas* Christophe van Gerrewey,2019-10-21 The most incisive texts on Rem Koolhaas OMA The activities of Rem Koolhaas and his staff were widely discussed even before the foundation of the Office for Metropolitan Architecture in 1975 Today many contributions on the work of OMA can be found in the international architectural press including Koolhaas own writings The book contains about 150 selected texts interviews feature articles essays lead articles reviews letters introductions appraisals and competition reports that have been compiled for the first time This compilation not only provides a fresh and critical view of the oeuvre of one the most important contemporary architects but also represents an account of the debate on architectural and urban design in recent decades The most incisive texts on the work of OMA Rem Koolhaas with many articles that have never before been translated into English An overview of notions ideas and debates in architectural discourse theory and criticism from the 1970s until 2000

that remain relevant today Illustrated with more than 100 cover shoots **Unorthodox Ways to Think the City** Teresa Stoppani, 2018-12-07 This book argues that architecture and the city and their processes can be better understood by drawing categories from disciplines that exceed the architectural and urban cultural context It performs an open intellectual reading that traverses architecture and architectural theory but also art theory and history cartography philosophy literature and cultural studies to unfold a series of figures that are ambiguously placed between the representation and the construction of space in architecture and the city The paradigm and philosophy the island and the city the map and representation the model and making and the questioning of form performed by dust are explored beyond their definition as processes that differently make space between architecture and the city and are proposed as unorthodox analytic techniques to decipher contemporary spatial complexity The book analyses how these figures have been employed at different times and in different creative disciplines beyond architecture and in relation to changing notions of space and traces the role that they have played in the shift towards the dynamic that has taken place in contemporary theory and design research What emerges is the idea of an architecture of the city that is not only physical but is largely defined by the way in which its physical spaces are regulated lived and perceived but also imagined and projected Building Institution Kim Förster, 2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline in the postmodern era Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies which was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a collective biography that details the Institute's diverse roles and the dynamic interplay between research and design education culture and publishing By exploring the transformation of cultural production into a practice as well as the culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of architecture **The Architecture of Modern Italy** Terry Kirk, 2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter's all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as

such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself InfoWorld ,1986-10-27 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Rem Koolhaas as Scriptwriter** Helena Huber-Doudová,2023-10-30 This book is the first survey of a new field in architecture theory script writing Rem Koolhaas as Scriptwriter explores the intersection of architecture film and text using the example of the working method of scriptwriter Rem Koolhaas and the Office for Metropolitan Architecture OMA This book argues that Koolhaas formulates his approach to architecture on the basis of the written sketch or script and questions its transformations into built environment in the oeuvre of OMA Divided into two parts the first part is a theoretical outline that explores the notion of scriptwriting in film It provides in depth insights into the definition and historical evolution of the script as a blueprint Hollywood script avant garde script storyboard the relation to auteur theory and the difference between the script and scenario It surveys the first original script for the Exodus of the Voluntary Prisoners of Architecture The second part offers a unique perspective on the urban development of West Berlin in which Koolhaas created a metropolitan script or blueprint that spans the period 1971 1989 from his first visit to Berlin to the fall of the Berlin Wall This book will be of interest to researchers and students of architectural theory urban history and film studies **Herzog & de Meuron** Herzog & de Meuron,2005 More than any of their contemporaries Swiss architects Jacques Herzog and Pierre de Meuron are challenging the boundaries between architecture and art Natural History explores that challenge examining how the work of this formidable pair has drawn upon the art of both past and present and brought architecture into dialogue with the art of our time Echoing an encyclopedia this publication reflects the natural history museum structure of the exhibition which it accompanies organized by the Canadian Centre for Architecture Models and projects by Herzog de Meuron as well as by other artists are structured around six thematic portfolios that suggest an evolutionary history of the architects work Appropriation Reconstruction Transformation Alienation Stacking Compression Imprints Moulds Interlocking Spaces and Beauty Atmosphere Each section is introduced with a statement from Herzog and more than 20 artists scholars and architects have contributed essays including Carrie Asman Georges Didi Huberman Kurt W Forster Boris Groys Ulrike Meyer Stump Peggy Phelan Thomas Ruff Rebecca Schneider Adolf Max Vogt and Jeff Wall Reshaping Museum Space Suzanne Macleod,2005-10-09 Collating the views of international museum professionals architects designers and academics this book highlights the complexity and significance of museum space studies recent developments in museum architecture and exhibition design **Planning for a Material World** Laura Lieto,Robert A. Beauregard,2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has

consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices

Urban Transformations and the Architecture of Additions Rodrigo Perez de Arce, 2014-08-07 Rodrigo Perez de Arce's essay *Urban Transformations and Architectural Additions* was published during the formative stages of Post Modernism at the point where theory was becoming seriously established Jencks first essays formalising the term Post Modernism in architecture and the revised *Learning from Las Vegas* were published the previous year In planning terms modernism had become associated with comprehensive redevelopment and forms of urban organisation that ignored context history and any sense of tradition De Arce considered the essential nature of buildings and the richness of historic urban form and explored how robust that essence was over time He looked at the value of essential remnants and rich complexities in maintaining a sense of continuity and relevance Having explored the adaptation process in history de Arce went on to see how such a process might be simulated in contemporary cities with modern buildings using additions and layers to change them from objects in infinite windswept space to being part of a rich urban fabric which described urban place To do this he used concrete examples housing schemes by James Stirling new government centres in Chandigarh and Dacca and more prosaic 60's housing blocks The paper had a fundamental influence on the way that architects and planners thought about the nature of cities as dynamic organisms that were tangible to human beings completely opposite to the systems thinking of the time It contributed to ideas about the importance of street place and city block which influenced so much recent regeneration practice As we enter a phase of development where the reuse and adaptation of existing buildings is becoming paramount from both an economic and sustainable point of view Perez de

Arce's paper gives important insights into how to think about the process positively

Consuming Architecture Daniel Maudlin, Marcel Vellinga, 2014-03-05 Projecting forward in time from the processes of design and construction that are so often the focus of architectural discourse *Consuming Architecture* examines the variety of ways in which buildings are consumed after they have been produced focusing in particular on processes of occupation appropriation and interpretation Drawing on contributions by architects historians anthropologists literary critics artists film makers photographers and journalists it shows how the consumption of architecture is a dynamic and creative act that involves the creation and negotiation of meanings and values by different stakeholders and that can be expressed in different voices In so doing it challenges ideas of what constitutes architecture architectural discourse and architectural education how we understand and think about it and who can claim ownership of it *Consuming Architecture* is aimed at students in architectural education and will also be of interest to students and researchers from disciplines that deal with architecture in terms of consumption and material culture
