Addiction and Opiates Alfred Ray Lindesmith,2008-03-01 This classic study is concerned with addiction to opiate type drugs and their synthetic equivalents Lindesmith proposes and systematically elaborates a rational general theoretical account of the nature of the experiences which generate the addict's characteristic craving for drugs While this theoretical position has obvious implications for addictions that resemble opiate addiction in that they also involve drugs which produce physical dependence and withdrawal distress the author does not extend the theory to these other forms of addiction such as alcoholism The central theoretical problem is posed by the fact that some persons who experience the effects of opiate type drugs and use them for a period sufficient to establish physical dependence do not become addicts while others under what appear to be the same conditions do become addicted The focus of theoretical attention is on those aspects of addiction which may reasonably be regarded as basic or essential in the sense that they are invariably manifested by all types of addicts regardless of place time method of use social class and other similar variable circumstances Lindesmith then makes a brief statement of a view of current public policy concerning addiction in the United States reform which it is believed would substantially reduce the evils now associated with addiction and the large illicit traffic in drugs He interviews approximately

fifty addicts over a fairly extended period of time sufficient to establish an informal friendly relationship of mutual trust The attempt to account for the differential reactions among drug users requires specification of the circumstances under which physical dependence results in addiction and in the absence of which it does not It also requires careful consideration of the meaning of addiction spelled out in terms of behavior and attitudes characteristic of opiate addicts everywhere This book strives to understand these aspects of addiction with the ultimate goal of understanding the factors which create its foundations Alfred R Lindesmith 1905 1991 was professor of sociology at Indiana University and was one of the first scholars to provide a well researched account on the subject of addiction He believed that opiate addiction was based on dramatic shifts of an individual s mental and motivation states
