Love Drugs:

Love, Drugs, Art, Religion Brian R. Clack, 2016-05-13 In this original and far reaching contribution to the philosophy of religion Brian R Clack examines the manner in which religious belief emerges from the turbulence and anxiety of human existence Taking his cue from Freud's suggestion that human life is so hard to bear that it requires nothing short of cultural and psychological palliative care Clack explores each of the palliative measures Freud catalogues: intoxicants, religion, art and love and evaluates their role in the mitigation of suffering and the provision of the assistance required for an endurable life This examination provides the context for an investigation into the meaning and function of religious belief when considered as a palliative Clack initially subjects religion to ferocious critique, defending the psychoanalytic judgment that religious beliefs operate as wish-fulfilling illusions but then elaborates a revised understanding of religion, one in which comforting illusions are banished and in which religious belief faces up to reality and reconciles us both to the pains and disappointments of existence and to our nullity and inevitable annihilation In this genuinely interdisciplinary work Clack breaks new ground by using detailed explorations of the phenomena of drug use, romantic love and the enjoyment of art in order to throw light on the meaning and nature of religion This book will be vital reading for anyone concerned with the fundamental questions of religious belief, the psychoanalytic approach to culture or simply the unavoidable existential problems lying at the very heart of human life

Music Love Drugs War Geraldine Quigley, 2019-01-10 A clever multiple narrative account of teenage kicks and sectarian strife in early 80s Northern Ireland this debut marks out Quigley as a writer of compassion and humour Guardian The end of the school year is approaching and siblings Paddy and Liz McLaughlin, Christy Meehan, Kevin Thompson and their friends will soon have to decide what they're going to do with the rest of their lives But it's hard to focus when there's the allure of their favourite hangout place, the dingy Cave where they go to drink and flirt and smoke Most days Christy, Paddy and Kevin lie around listening to Dexys and Joy Division Through a fog of marijuana, beer and budding romance the future is distant and unreal But this is Derry in 1981 and they can't ignore the turmoil of the outside world A friend is killed and Christy and Paddy, stunned out of their stupor, take matters into their own hands Some choices are irreversible and choosing to fight will take hold of their lives in ways they never imagined With humour and compassion Geraldine Quigley reveals the sometimes slippery reasons behind the decisions we make and the unexpected and intractable ways they shape our lives A novel that is warm but also unsettling and exhilarating That's some feat Roddy Doyle A poignant and powerful coming of age story Sunday Mirror

Philosophy of

Sex and Love Patricia Marino, 2019-03-13 Writing for non specialists and students as well as for fellow philosophers this book explores some basic issues surrounding sex and love in today's world among them consent objectification non monogamy racial stereotyping and the need to reconcile contemporary expectations about gender equality with our beliefs about how love works Author Patricia Marino argues that we cannot fully understand these issues by focusing only on individual desires and choices Instead we need to examine the social contexts within which choices are made and acquire their meanings That perspective she argues is especially needed today when the values of individualism self expression and self interest permeate our lives Marino asks how we can fit these values which govern so many areas of contemporary life with the generosity caring and selflessness we expect in love and sex Key Features of Philosophy of Sex and Love An Opinionated Introduction Offers a contemporary problems based approach to the subject helping readers better understand and address current issues and controversial questions Includes coverage of sex and love as they intersect with topics like disability race medicine and economics Considers not only the ethical but also the broadly social and political dimensions of sex and love Includes a helpful introduction and conclusion in each chapter and is written throughout in a clear and straightforward style with examples and signposts to help guide the student and general reader A comprehensive and up to date bibliography provides a valuable tool for anyone's further research *Controlling Love* Peter

Herissone-Kelly, 2022-09-15 Recent research in neurochemistry has shown there to be a number of chemical compounds that are implicated in the patterns of lust attraction and attachment that undergird romantic love For example there is evidence that the phenomenon of attachment is associated with the action of oxytocin and vasopressin There is therefore some reason to suppose that patterns of lust attraction and attachment could be regulated via manipulation of these substances in the brain in other words by their use as love drugs A growing bioethical literature asks searching questions about this prospect and especially about the use of such drugs to enhance or reignite attachment in flagging relationships This Element examines some of the central arguments on the topic and sounds a note of caution It urges that there are reasons to think the states of attachment produced or facilitated by the use of such drugs would not be desirable **Why We Love** Anna

What Would You Do Alone in a Cage with Nothing but Cocaine?
Hanna Pickard, 2026-01-06 A revolutionary new paradigm for understanding addiction Why do people with addiction use drugs self destructively Why don't they quit out of self concern Why does the rat in the experiment alone in a cage press the lever again and again for cocaine to the point of death In this pathbreaking book Hanna Pickard proposes a new paradigm for understanding the puzzle of addiction For too long our thinking has been hostage to a false dichotomy either addiction is a brain disease or it is a moral failing Pickard argues that it is neither and that both models stifle addiction research and fail people who need help Drawing on her expertise as an academic philosopher and her clinical work in a therapeutic community Pickard explores the meaning of drugs for people with addiction and the diverse factors that keep them using despite the costs People use drugs to cope with suffering but also to self harm or even to die Some identify as addicts while others are in denial or struggle with cravings and self control Social cultural and economic circumstances are crucial to explaining addiction but brain pathology may also matter By integrating addiction science with philosophy clinical practice and the psychology and voices of people with addiction themselves Pickard shows why there is no one size fits all theory or ethics of addiction The result is a heterogeneous and humanistic paradigm for understanding and treating addiction and a fresh way of thinking about responsibility blame and relationships with people who use drugs
