intensificación industrial o al comercio actual temas que muchas veces se han identificado con lo moderno y que por cierto no dudamos de que tengan vínculos estrechos con él. En realidad consideramos como modernidad a la cultura o a la filosofía hoy de alcance mundial que ha transformado radicalmente la economía la técnica las sociedades la cultura y la política en los últimos siglos. Esta filosofía moderna o filosofía de la subjetividad ha ido desplazando la visión tradicional del mundo y ha colocado al hombre como el fundamento de la realidad. Este es el sentido de modernidad que vamos a resaltar y que además nos parece relevante para el debate en el que nos situamos. La modernidad japonesa es indiscutiblemente una modernidad construida de otra manera radicalmente diferente y con éxito al decir de unos y de otros. El título de este libro quiere reflejar esta idea: el buen halcón no muestra la garra; es decir, el Japón es profundamente moderno aunque no lo parezca. Esta modernidad es indudablemente una manera de plantearse cómo ser hombre y expresa con toda claridad una auténtica conciencia subjetiva. Este es el fundamento de nuestra argumentación y bajo esta orientación revisaremos los aspectos de Japón que nos parecen relevantes.
