A to Zoo Rebecca L. Thomas, 2018-06-21 Whether used for thematic story times, program and curriculum planning, readers advisory, or collection development, this updated edition of the well-known companion makes finding the right picture books for your library a breeze. Generations of savvy librarians and educators have relied on this detailed subject guide to children's picture books for all aspects of children's services, and this new edition does not disappoint. Covering more than 18,000 books published through 2017, it empowers users to identify current and classic titles on topics ranging from apples to zebras. Organized simply with a subject guide that categorizes subjects by theme and topic, and subject headings arranged alphabetically, this reference applies more than 1,200 intuitive, as opposed to formal catalog, subject terms to children's picture books, making it both a comprehensive and user-friendly resource that is accessible to parents and teachers, as well as librarians. It can be used to identify titles to fill in gaps in library collections, to find books on particular topics for young readers, to help teachers locate titles to support lessons, or to design thematic programs and story times. Title and illustrator indexes, in addition to a bibliographic guide arranged alphabetically by author name, further extend access to titles.

Using Literature to Support Skills and Critical Discussion for Struggling Readers Nancy S. Williams, 2004 Emphasizing the need to develop higher-level thinking skills and critical discussion with intermediate and middle school struggling readers, Williams uses quality children's literature as a springboard to help readers understand and use descriptive vocabulary and figurative language, make personal connections with text, create and solve text-related mathematical problems, promote an active, engaged discussion, and critical analysis of the story and the important issues raised in text, extend meaning through research and writing, art, and drama. To help teachers match student to text, literature selections are categorized according to interest, e.g., mystery, sports, humor, identity, solving problems, genre, and include reading level, interest level, and number of pages. Discussion questions and extension activities, specific to over 100 children's literature selections, provide opportunities for students to ask questions, discuss, and use descriptive language, make predictions and inferences, evaluate story elements, and critically reflect on character perspectives and social issues raised in the text. All questions are appropriate for individual work, special education classrooms, general education, and inclusion classrooms, and help teachers facilitate literature discussion groups, book club discussion, and response writing, self-regulated reading, guided reading, and whole-class discussions.
