Lusitania Vulva Morphia:

Beyond Text Jennifer Buckley, 2019-10-09 Taking up the work of prominent theater and performance artists *Beyond Text* reveals the audacity and beauty of avant garde performance in print With extended analyses of the works of Edward Gordon Craig German expressionist Lothar Schreyer the Living Theatre Carolee Schneemann and Guillermo Gómez-Peña the book shows how live performance and print aesthetically revived one another during a period in which both were supposed to be in a state of terminal cultural decline While the European and American avant gardes did indeed dismiss the dramatic author they also adopted print as a theatrical medium altering the status form and function of text and image in ways that continue to impact both the performing arts and the book arts *Beyond Text* participates in the ongoing critical effort to unsettle conventional historical and theoretical accounts of text performance relations which have too often been figured in binary chronological from page to stage or hierarchical terms Across five case studies spanning twelve decades *Beyond Text* demonstrates that print as noun and verb has been integral to the practices of modern and contemporary theater and performance artists

October, 1994 Virtual Futures Joan Broadhurst Dixon, Eric Cassidy, 2005-07-20 Virtual Futures explores the ideas that the future lies in its ability to articulate the consequences of an increasingly synthetic and virtual world New technologies like cyberspace the internet and Chaos theory are often discussed in the context of technology and its potential to liberate or in terms of technophobia This collection examines both these ideas while also charting a new and controversial route through contemporary discourses on technology a path that discusses the material evolution and the erotic relation between humans and machines Virtual Futures brings together diverse fields such as cyberfeminism materialist philosophy postmodern fiction computing culture and performance art with essays by Sadie Plant Stelarc and Manuel de Landa to name a few The collection heralds the death of humanism and the rise of posthuman pragmatism The contested zone of debate throughout these essays is the notion of the posthuman or the possibility of the cyborg as the free human Viewed by some writers as a threat to human life and humanism itself others in the collection describe the posthuman as a critical perspective that anticipates the next step in evolution the integration or synthesis of humans and machines organic life and technology This view of technology and information is heavily influenced by Anglo American literature especially cyberpunk Pynchon and Ballard as well as the materialist philosophies of Freud Deleuze and Haraway Virtual Futures provides analyses by both established theorists and the most innovative new voices working in conjunction between the arts and contemporary technology
