a radical shift in which a once ephemeral art form can now be relived replayed and repeated Until now much scholarship has been devoted to the nature of live performance in the digital age Documenting Performance is the first book to provide a collection of key writings about the process of documenting performance focused not on questions of liveness or the artistic qualities of documents but rather on the professional approaches to recovering preserving and disseminating knowledge of live performance Through its four part structure the volume introduces readers to important writings by international practitioners and scholars on the contemporary context for documenting performance processes of documenting performance documenting bodies in motion documenting to create In each chapters examine the ways performance is documented and the issues arising out of the process of documenting performance While theorists have argued that performance becomes something else whenever it is documented the writings reveal how the documents themselves cannot be regarded simply as incomplete remains from live events The methods for preserving and managing them over time ensuring easy access of such materials in systematic archives and collections requires professional attention in its own right Through the process of documenting performance artists acquire a different perspective on their own work audiences can recall specific images and sounds for works they have witnessed in person and others who did not see the original work can trace the memories of particular events or use them to gain an understanding of something that would otherwise remain unknown to them and their peers

The Performance Apparatus Branislav Jakovljevic, 2025-04-15 The publication of Louis Althusser's 1969 article Ideology and Ideological State Apparatuses made a deep impact on cultural studies and was instrumental in the formation of the apparatus theory in film studies While contemporaneous with the emergence of performance art this article and the questions of ideology and apparatus it raises barely registered in the field of performance studies which was then in its formative phase Jakovljevi takes this absence of Althusser's apparatus theory from performance studies as an indicator of the ideological position of the field at the moment of its emergence arguing that while theories of ideology played no major role in early performance studies performance art itself offered a number of incisive critiques of ideology Jakovljevi looks at permutations of the apparatus by investigating the work of theorists such as Louis Althusser Michel Foucault Gilles Deleuze and Judith Butler and engagements with the apparatus by a number of artists such as Amiri Baraka Philippe Thomas New York Art Language Terry Fox Every house has a door Clive Robertson and Cassils Jakovljevi suggests that the centrality of behavior in early performance theory is important for the understanding of contemporary society which is dominated by surveillance capitalism If ideology is lodged in behaviors and if surveillance capitalism thrives on the monetization of the behavioral surplus then performance theory can make significant contributions to our understanding of the moment in which we live and the future we are facing The Performance Apparatus argues for the importance of continuing attention to the question of ideology in contemporary neoliberal order Critical Digital Studies
