The Evolution of Rhythm Cognition: Timing in Music and Speech Andrea Ravignani,Henkjan Honing,Sonja A.

Kotz,2018-07-24 Human speech and music share a number of similarities and differences One of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations Human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech However a number of critical questions remain to be answered Where does this human sensitivity for rhythm arise How did rhythm cognition develop in human evolution How did environmental rhythms affect the evolution of brain rhythms Which rhythm specific neural circuits are shared between speech and music or even with other domains Evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives First empirical observations of music and speech in the field are

contrasted and generate testable hypotheses Experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm Finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution Our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing However researchers in different fields often work on parallel potentially converging strands with little mutual awareness This research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process It includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons of rhythm processing in music and speech e g behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e g connectionist symbolic models of rhythmicity as an evolved behavior **Words on Cassette** ,2000

Christopher Smart's English Lyrics Rosalind Powell,2016-05-23 In the first full length study of Christopher Smart s translations and the place and function of translation in Smart s poetry Rosalind Powell proposes a new approach to understanding the relationship between Smart s poetics and his practice Drawing on translation theory from the early modern period to the present day this book addresses Smart s translations of Horace Phaedrus and the Psalms alongside the better known religious works such as Jubilate Agno and A Song to David Five recurrent threads run throughout Powell s study the effect of translation on the identity of a narrative voice in a rewritten text the techniques that are used to present translated texts to a new literary cultural and linguistic readership performance and reading contexts the translation of great works as an attempt to achieve literary permanence and finally the authorial influence of Smart himself in terms of the overt religiosity and nationalism that he champions in his writing In exploring Smart s major translation projects and revisiting his original poems Powell offers insights into classical reception and translation theory attitudes towards censorship expressions of nationalism in the period developments in liturgy and hymnody and the composition of children s books and school texts in the early modern era Her detailed analysis of Smart s translating poetics places them within a new contemporary context and locality to uncover the poet s works as a coherent project of Englishing **Lyric Tactics** Ingrid Nelson,2017-01-13 In **Lyric Tactics** Ingrid Nelson argues that the lyric poetry of later medieval England is a distinct genre defined not by its poetic features rhyme meter and stanza forms but by its modes of writing and performance which are ad hoc improvisatory and situational **Global Linguistic Flows** H. Samy Alim,Awad Ibrahim,Alastair Pennycook,2008-10 This cutting edge book located at the intersection of sociolinguistics and Hip Hop Studies brings together for the first time an international group of researchers who study Hip Hop textually ethnographically socially aesthetically and linguistically It is the harvest of dialogue

between these two separate yet interconnected areas of study A missing gap in the Hip Hop literature is the centrality and an in depth analysis of the very medium that is used to express and perform Hip Hop language Global Linguistic Flows fills this gap
