Decoding Maori Cosmology Laird Scranton,2018-05-08 An exploration of New Zealand s Maori cosmology and how it relates to classic ancient symbolic traditions around the world Shows how Maori myths symbols cosmological concepts and words reflect symbolic elements found at G bekli Tepe in Turkey Demonstrates parallels between the Maori cosmological tradition and those of ancient Egypt China India Scotland and the Dogon of Mali in Africa Explores the pygmy tradition associated with Maori cosmology which shares elements of the Little People mythology of Ireland including matching mound structures and common folk traditions It is generally accepted that the Maori people arrived in New Zealand quite recently sometime after 1200 AD However new evidence suggests that their culture is most likely centuries older with roots that can be traced back to the archaic G bekli Tepe site in Turkey built around 10 000 BC Extending his global cosmology comparisons to New Zealand Laird Scranton shows how the same cosmological concepts and linguistic roots that began at G bekli Tepe are also evident in Maori culture and language These are the same elements that underlie Dogon ancient Egyptian and ancient Chinese cosmologies as well as the Sakti Cult of India a precursor to Vedic Buddhist and Hindu traditions and the Neolithic culture of Orkney Island in

northern Scotland While the cultural and linguistic roots of the Maori are distinctly Polynesian the author shows how the cosmology in New Zealand was sheltered from outside influences and likely reflects ancient sources better than other Polynesian cultures In addition to shared creation concepts he details a multitude of strikingly similar word pronunciations and meanings shared by Maori language and the Dogon and Egyptian languages as well as likely connections to various Biblical terms and traditions He discusses the Maori use of standing stones to denote spiritual spaces and sanctuaries and how their esoteric mystery schools are housed in structures architecturally similar to those commonly found in Ireland He discusses the symbolism of the Seven Mythic Canoes of the Maori and uncovers symbolic aspects of the elephant headed Hindu god Ganesha in Maori cosmology The author also explores the outwardly similar pygmy traditions of Ireland and New Zealand characterized by matching fairy mound constructions and mythic references in both regions He reveals how the trail of a group of Little People who vanished from Orkney Island in ancient times might be traced first to Scotland Ireland and England and then on to New Zealand accompanied by signature elements of the global cosmology first seen at Gobekli Tepe

**Merriam-Webster Thesaurus** Merriam-Webster, Inc,1989 An all purpose thesaurus at an attractive price More than 157 000 synonyms antonyms related and contrasted words and idioms Alphabetically organized for ease of use Brief definitions describe shared meanings     *Primal Wisdom of the Ancients* Laird Scranton,2020-07-07 Examines how the similarities of symbols and wisdom across many cultures point to an ancient civilizing plan and system of ancient instruction Reveals the shared cosmological knowledge of Dogon and Maori cultures ancient Egypt Gobekli Tepe Vedic India the pre Indian Sakti civilization Buddhism the Tibetan Bon religion and the kabbalistic tradition of the Hebrews Explores symbols and techniques used to frame and preserve instructed knowledge as it was transmitted orally from generation to generation Explains how this shared ancient knowledge relates to the precessional year and the cycles of time known as the yugas Exploring the mystery of why so many ancient cultures separated by time and distance share remarkably similar cosmological philosophies

and religious symbolism Laird Scranton reveals how this shared creation tradition upholds the idea that ancient instruction gave birth to the great civilizations each of which preserves fragments of the original knowledge Looking at the many manifestations of this shared cosmological knowledge including in the Dogon and Maori cultures and in ancient Egypt Gobekli Tepe Vedic India Buddhism the Tibetan Bon religion and the kabbalistic tradition of the Hebrews Scranton explores the thought processes that went into formulating the archetype themes and metaphors of the ancient symbolic system He examines how commonly shared principles of creational science are reflected in key terms of the ancient languages He discusses how the primal cosmology also transmitted key components of sacred science such as sacred geometry knowledge of material creation and the nature of a nonmaterial universe evidence for which lies in the orientation of ancient temples the drama of initiations and rituals and countless traditional myths He analyzes how this shared knowledge relates to the precessional year and the cycles of time known as the yugas He also explores evidence of the concept of a nonmaterial twin universe to our own the above to our below in the famous alchemical and hermetic maxim Through his extensive research into the interconnected wisdom of the ancients Scranton shows that the forgotten instructional tradition at the source of this knowledge was deliberately encoded to survive for countless generations By piecing it back together we can discover the ancient plan for guiding humanity forward toward greater enlightenment    *The Official America Online for Windows 3.1 Tour Guide* Tom Lichty,1996-06    **PC Mag** ,1991-09-24 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology    **Webster's New World Thesaurus** Charlton Laird,Webster's New World,2003-07 Organized alphabetically for easy access a revised edition of the best selling reference provides synonyms general words and antonyms as well as slang terms colloquial expressions technical terms and the most recent scientific and medical terminology
