Porter, 1977 This book is intended for apprentices and trainees in machine printing who also have to include offset lithographic work in their training period introduction **A Manual of Lithography; Clearly Explaining the Whole Art, As Well As All the Accidents That May Happen in Printing, and the Different Methods of Avoi** Raucourt, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1821 edition Excerpt with sand and water and the edges rounded with a file and smoothed with pumice stone If there are any defects in the stone they are sometimes rubbed down with sand and water but this operation is often very long and tedious some machinery might easily be invented to supply the labour of men which would be a great saving of time and expense Preparations of the Stone for Chalk Drawings 22 The stone being now perfectly smooth and level it must be well washed in order to free it from any coarse grains of sand which might adhere as one alone of

these is sufficient to fill the stone with innumerable scratches it is placed on a table Fig 3 and a small quantity of water and very fine sand strewed over its surface another stone is then placed over it and they are rubbed face to face adding now and then fresh sand and water this operation must be performed with great care and small circles must be described in rubbing them together in a short time the grain will become very fine and when sufficiently so they must be well washed and wiped with a clean cloth In this state they are ready for the draftsman It is sufficient to inform the reader that whether the stones be rubbed with sand and water or with sand alone the operation is only terminated when on being perfectly cleaned they appear uniformly white of an even grain and without any shining part in short their appearance must be exactly similar to that of a sheet of vellum paper The grain may be made finer or coarser according to the fineness of the sieves that have been employed in sifting the sands Those stones which have been grained with dry sand must be wiped with a dry cloth but this must be done with great care as if any portion of dust remains the
