The Military And Society In The Former Eastern Bloc Constantine Danopoulos, Daniel Zirker, Constantine Danopoulos, 2019-09-30 In this book an assortment of regional specialists in military relations are gathered together to comment on the current state of the military in various Eastern bloc states The book focuses on the relationship between the military politics and society in these new and burgeoning democracies Civil-Military Relations in Russia and Eastern Europe David Betz, 2004-07-31 This book examines how civil military relations have been transformed in Russia Poland Hungary and Ukraine since the collapse of the Soviet Union and the Warsaw Pact in 1991 It shows how these countries have worked to reform their obsolete armed forces and bring them into line with the new economic and strategic realities of the post Cold War world with new bureaucratic structures in which civilians play the key policy making roles and with strengthened democratic political institutions which have the right to oversee the armed forces *Military and Society in 21st Century Europe* Jürgen Kuhlmann, Jean Callaghan, 2000 After the Cold War came to an end European countries in both East and West faced the common question of how their military organizations and those of their neighbors would respond to shifts in international relations affecting their economies their perception of globalized threats and cross national security management It is undisputed for example that in well developed democratic societies the challenge to the legitimacy of the military in society the decreasing subjective apprehension of threat and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards This volume seeks by empirically measuring social indicators to assess the current state of civil military relations in a number of countries in Eastern Europe Bulgaria Czech Republic Hungary Romania Russia as well as the state of relations in several of their Western European counterparts France Germany Italy the Netherlands The country studies describe and analyze the differing positions of the military in their specific national settings *The Transition to National Armies in the Former Soviet Republics, 1988-2005* Jesse Paul Lehrke, 2013 This book looks at the militaries of the late Soviet and post Soviet republics Beginning with the end of the Soviet era it recognises that the successor states did not spring from nowhere but inherited a legacy that influenced all that followed The book discusses how politicians control the instruments that are the manifestation of the state's monopoly on violence and how society views and supports the military By taking a bottom up empirical approach that examines the personnel leaders organisations and institutions and their outlook and attitudes the book presents a comprehensive picture of the armed forces showing how the armed forces are very significantly shaped by the surrounding political and social environment The book goes on to examine the armed forces in action and highlights that to truly understand the militaries studies need to go beyond looking at the static structures **The Military-Industrial Complex and American Society** S. Mike Pavelec, 2010-01-18 The first complete reference on the military industrial complex from its Cold War era expansion to the present The Military Industrial Complex and American Society addresses the broad subject of the political economy of

Civil Society in Communist Eastern Europe Matt Killingsworth,2024-10-31 As well as promoting debates about liberal democracy the dramatic events of 1989 also bought forth a powerful revival in the interest of the notion of civil society This revival was reflected mainly in two broad tracts of literature The first focused primarily on events surrounding the Solidarity movement in Poland and the tumultuous events of 1980 81 The second was concerned with the Velvet Revolutions more broadly Following the events of 1989 there appeared a number of works sharing the common central argument that civil society played a key role in the overthrow of these Communist regimes in 1989 Killingsworth s book presents three broad arguments all of which reject the way civil society has been applied in the analysis of opposition and dissent in totalitarian Czechoslovakia the GDR and Poland First it argues that the totalitarian nature of Soviet type regimes means that it was not possible for a genuine civil society to exist Second the civil society paradigm as it has been applied to opposition and dissent in Soviet type regimes in Eastern Europe lacks analytical rigour Thirdly the book argues that the dominant liberal interpretation of dissenting opposition in Soviet type regimes is politically and morally flawed *Military Review* ,2000 **Soldiers and Societies in Postcommunist Europe** A. K Perry, 2015-08-27 This best selling text emphasizes that social and cultural changes are the pervasive realities of our era. One of the main themes of Contemporary Society is that the transition from an industrial to a post industrial order in the modern world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era. Within this framework we can observe the increasing fragmentation of the social order which tends to lead people away from community and a common purpose and often invites conflict and disunity. At the same time countervailing social forces are also at work providing some stability some shelter in the storm. Finally societies are faced with the rapid and transformative power of information technology a fact that propels separate groups of people into a global entity.

Civil-Military Relations in Post-Communist Europe Timothy Edmunds, Andrew Cottey, Anthony Forster, 2013-10-18 Fifteen years after the fall of communism we are able to appraise the results of the multi faceted postcommunist transition in Central and Eastern Europe with authority. This volume specifically addresses the fascinating area of Civil Military relations throughout this transitional period. The countries of the region inherited a onerous legacy in this area: their armed forces were part of the communist party state system and most were oriented towards Cold War missions they were large in size and supported by high levels of defence spending and they were based on universal male conscription. Central and eastern European states have thus faced a three fold civil military reform challenge: establishing democratic and civilian control over their armed forces implementing organisational reform to meet the security and foreign policy demands of the new era and redefining military bases for legitimacy in society. This volume assesses the experiences of Poland Hungary Latvia Romania Croatia Serbia Montenegro Ukraine and Russia in these areas. Collectively these countries illustrate the way in which the interaction of broadly similar postcommunist challenges and distinct national contexts have combined to produce a wide variety of different patterns of

civil military relations This book was previously published as a special issue of *European Security* Armed Forces and Society in Europe A. Forster, 2005-10-31 In the post Cold War era European militaries are engaged in an ongoing adaptation which is challenging relations between armed forces and the societies that they serve This book offers an innovative conceptual framework to critically evaluate contemporary civil military relations across the continent of Europe It analyzes eight key issues in armed forces and society relations to explore the scale and intensity of these changes A History of Western Society, Volume C John P.
