Military Bases Observations On Dods 2005 Base Realignment And Closure Selection Process And Recommendations:

Military bases observations on DOD's 2005 base realignment and closure selection process and recommendations : statement before the Defense Base Closure and Realignment Commission , Military bases analysis of DOD's 2005 selection process and recommendations for base closures and realignments : report to the congressional committees. ,2005

On May 13 2005 the Secretary of Defense submitted proposed base realignment and closure BRAC actions to an independent commission for its review The Commission must submit its recommendations to the President by September 8 2005 for his acceptance or rejection in their entirety Congress has final action to accept or reject these recommendations in their entirety later this year The law required that GAO issue a report on the Department of Defense s DoD recommendations and selection process by July 1 2005 GAO s objectives for this report were as follows 1 determine the extent to which DoD s proposals achieved its stated BRAC goals 2 analyze whether the process for developing recommendations was logical and 3 identify issues with the recommendations that may warrant further attention Time constraints limited GAO s ability to examine implementation details of most of the individual recommended actions DoD had varying success in achieving its 2005 BRAC goals of reducing excess infrastructure and producing savings furthering transformation and fostering jointness While DoD proposed a record number of closures and realignments exceeding all prior BRAC rounds combined many proposals focused on reserve bases and relatively few on closing active bases Projected savings are almost equally large but most savings are derived from 10 percent of the recommendations While GAO believes savings would be achieved overall up front investment costs of an estimated 24 billion are required and there are clear limitations associated with DoD s projection of nearly 50 billion in savings over a 20 year period Much of the projected net annual recurring savings 47 percent is associated with eliminating jobs currently held by military personnel However rather than reducing end strength levels DoD indicates the positions are expected to be reassigned to other areas which may enhance capabilities but also limit dollar savings available for other use⁷

Military Base Realignments and Closures: Observations Related to the 2005 Round , Military Bases David M. Walker (au),2005-11 *Defense Infrastructure* Brian J. Lepore,2009-11 The 2005 Defense Base Closure and Realignment Comm recommended that the DoD establish 12 joint bases by consolidating the mgmt and support of 26 separate installations potentially saving 2 3 billion over 20 years This report evaluated DoD s 1 efforts and expected costs to deliver installation support at joint bases and 2 funding for facility sustainment which includes the maintenance and repair activities necessary to keep facilities in good working order at all installations The auditor compared new support standards with the current support levels visited 9 installations that will become 4 joint bases and compared facility sustainment funding levels with requirements and goals Includes recommendations Charts and tables **Implementation of the Base Realignment and Closure 2005 Decisions** United States. Subcommittee,2008 *Military Base Realignment and Closures: Transfer of Supply, Storage, and Distribution Functions from Military Services to Defense Logistics Agency* , Military base closures observations on prior and current BRAC rounds : statement before the Defense Base Closure and Realignment Commission / , **Military Base Realignment and Closures** Brian J. Lepore,2010-11 DoD s cost estimates to implement recommendations from the most recent Base Realignment and Closure BRAC round have steadily increased each budget year since 2005 This BRAC round is the fifth such round undertaken by DoD since 1988 and it is the biggest most complex and costliest BRAC round ever To implement BRAC 2005 DoD plans to spend nearly 35 billion This review of DoD s FY 2010 BRAC budget indicates that DoD plans to spend more to implement BRAC 2005 recommendations compared to last year s BRAC budget DoD s estimated one time costs to implement this BRAC round increased by almost 2 5 billion from FY 2009 to FY 2010 bringing the total implementation cost estimate for this BRAC round to 34 9 billion Illustrations **Military Bases** Barry W. Holman (au),2005-11 **Military Bases** David Michael Walker,2005 **Military Base Realignment and Closures** Phillip Herr,2010-03 As part of the 2005 Base Realignment and Closure BRAC round the DoD plans to relocate over 123 000 military and DoD civilian personnel thereby increasing the staffing at 18 bases nationwide In addition DoD and local officials expect thousands of dependents and DoD contractor employees to relocate to communities near the BRAC 2005 growth bases These actions will greatly increase traffic in the surrounding communities This report assesses and reports on the impact of BRAC related growth on transport systems and on the responses of fed state and local governments This report determined the 1 expected impact on transport in communities affected by BRAC decisions and 2 fed state and local response to the expected impacts Economic Development Assistance for Communities Affected by Employment Changes Due to Military Base Closures (BRAC) Oscar R. Gonzales,2010 Discusses the geographic impact of base closures and realignments and summarizes federal economic assistance programs for communities and individuals affected by military base closures and realignments BRAC The 2005 BRAC round includes the closure or realignment of 837 facilities and involves an additional 160 facilities that will gain missions or resources for a total of 997 changes nationwide Unlike previous rounds the 2005 BRAC round is focused on creating the infrastructure needed to support a transformed expeditionary armed force concentrated more on shifting forces and installation assets to promote the centralization of units in places from which they can be deployed rapidly Charts and tables *Military Base Closures: Opportunities Exist to Improve Environmental Cleanup Cost Reporting & to Expedite Transfer of Unneeded Property* ,2007 While expected environmental cleanup costs for unneeded property arising from the 2005 BRAC round are not yet fully known Department of Defense DOD data indicate that about 950 million will be needed to clean up these bases adding to the estimated 13 2 billion total cleanup cost for the prior rounds Although DOD s cleanup program has matured compared to prior BRAC rounds there are still many unknowns and the cleanup estimate for the 2005 round should be considered preliminary In fact environmental cleanup costs are likely to increase as more intensive

environmental investigations are undertaken additional hazardous conditions are discovered and future reuse plans are finalized Furthermore Congress does not have full visibility over the total cost of DOD s BRAC cleanup efforts because none of the four reports DOD prepares on various aspects of environmental cleanup present all types of costs past and future to complete cleanup at each base Compiling a complete picture of all costs requires extracting information from multiple reports as GAO has done to estimate the total cleanup cost for the four prior BRAC rounds More complete and transparent cost information would assist Congress in conducting its oversight responsibilities for this multibillion dollar effort
