Military Education Past Present And Future:

Military Education Gregory Kennedy, 2006 Based on historical case studies this volume analyzes the success and failure of professional military education in the western world from the 18th century to the present *Military Education* Gregory C. Kennedy, Keith Neilson, 2002-12-30 Often the only time a nation evaluates the education of its armed forces is during the aftermath of a great military disaster Even in the light of an overwhelming victory such as the Gulf War questions about how well military education was addressing the study of asymmetric warfare the Revolution in Military Affairs the role of non state actors and international relations in the new world order were the subject of debate in and around the various staff colleges and military universities in the West This work brings together the ideas of international scholars all recognized as leaders in their fields to examine the professional military education experience of various nations during the last 250 years Case studies of each branch of the military reveal success and failure in the past and present with a goal of improving military education in the future Underlying themes clearly reveal the need for those questioning military education to utilize history as the preferred method and model of imperial analysis These include economics and defense spending national psyches and the proper maintenance of armed forces and the importance of individuals both military and civilian with a clear vision determination and the moral courage to formulate and support military education programs In practice training often predominates over education and the result has frequently been an officer corps that has not functioned well in peacetime preparations and has ultimately failed on the battlefield due to an inability to think effectively This study highlights the role of civilian educators as vital in the creation of successful educational programs **A Companion to American Military History**

James C. Bradford, 2009-11-03 With more than 60 essays *A Companion to American Military History* presents a comprehensive analysis of the historiography of United States military history from the colonial era to the present Covers the entire spectrum of US history from the Indian and imperial conflicts of the seventeenth century to the battles in Afghanistan and Iraq Features an unprecedented breadth of coverage from eminent military historians and emerging scholars including little studied topics such as the military and music military ethics care of the dead and sports Surveys and evaluates the best scholarship on every important era and topic Summarizes current debates and identifies areas where conflicting interpretations are in need of further study **International Encyclopedia of Military History** James C.

Bradford, 2004-12-01 With its impressive breadth of coverage both geographically and chronologically the *International Encyclopedia of Military History* is the most up to date and inclusive A Z resource on military history From uniforms and military insignia worn by combatants to the brilliant military leaders and tacticians who commanded them the campaigns and wars to the weapons and equipment used in them this international and multi cultural two volume set is an accessible resource combining the latest scholarship in the field with a world perspective on military history *Military Education and the British Empire, 1815-1949* Douglas E. Delaney, Robert C. Engen, Meghan Fitzpatrick, 2018-12-14 Common military

education was the lifeblood of the armies navies and air forces of the British Empire It permeated every aspect of the profession of arms and was an essential ingredient for success in both war and peace Military Education and Empire is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries Bringing together the world s top scholars on the subject this book places distinct national narratives Canadian Australian South African British and Indian within a comparative context The contributors examine military education within the British Empire as a generator of institutional knowledge as a socializing agent and as an enhancer of interoperability This volume is the first to examine military education from a transnational perspective which allows readers the opportunity to consider the connections between education and empire

Prisoners of War and Military Honour, 1789-1918 Jasper Heinzen, 2025-01-03 Early in the modern period prisoners of war with the rank of officer or equivalent had the right to petition for parole By effectively pawning their personal honour they were able to purchase freedom of movement and other privileges in captivity Increasingly other ranks and civilians claimed a right to parole too Based on material from close to thirty Australian British Dutch French German and Swiss archives Jasper Heinzen investigates the role and implications of honour based agreements between prisoners of war and their captors in western European warfare Across a range of ego documents ministerial memoranda the minutes of Masonic lodges and prisoners petitions as well as a substantial body of published material he demonstrates how captives statesmen and humanitarians understood honour in the long nineteenth century how they negotiated national differences and why parole d honneur continued to matter as a code of conduct into the First World War In so doing the book demonstrates the dichotomy between good codes of conduct prevalent in the eighteenth century and the practices of modern warfare perpetuated by a substantial amount of scholarship to be a false one Explaining the longevity of parole in this novel way raises important questions about the so called military Enlightenment the excesses of the world wars total war and the practices and codes of modern warfare

European Military Culture and Security Governance Tamir Libel, 2016-03-17 This book offers the first systematic comparative analysis of military education and training in Europe within the context of the post Cold War security environment Based on an analysis of military education institutions in the UK Germany Finland Romania and the Baltic States this book demonstrates that the convergence of European military cultures since the end of the Cold War is linked to changes in military education The process of convergence originates at least in part from the full or partial adoption of a new concept by post commissioning professional military education institutions the National Defence University Officers are now educated alongside civilians and public servants wherein they enjoy a socialization experience that is markedly different from that of previous generations of European officers and is increasingly similar across national borders In addition this book argues that with the control over the curricula and graduation criteria increasingly set by civilian higher education authorities the European armed forces while continuing to exist and hold significant although declining capabilities stand to lose their status

as a profession in the traditional sense This book will be of much interest to students of military European security policy European politics and IR in general Rethinking Military History Jeremy Black, 2004 This volume re positions military history at the beginning of the 21st century Jeremy Black reveals the main trends in the practice and approach to military history and proposes a new manifesto for the subject to move forward **An Army at War: Change in the Midst of Conflict (The Proceedings of the Combat Studies Institute [sic] 2005 Military History Symposium)**, **Reflections on War** Ian Liebenberg, 2012-10-01 Reflections on War is a comprehensive and objective investigation into the problems of war The book explores the crucial link between theory strategy and objectives in war taking all the evidence and theory into account and should be of interest to military practitioners specialists in defence studies and others interested in military history Also notable about the work is its ability to draw insights together from international legal theory management sciences history sociology and the political economy of war showing due respect for the moral complexities involved in waging war **The Journal of Military History**, 2003 **Routledge Handbook of Defence Studies** David J. Galbreath, John R. Deni, 2018-02-12 The Routledge Handbook of Defence Studies provides a comprehensive collection of essays on contemporary defence studies by leading international scholars Defence studies is a multi disciplinary study of how agents predominantly states prepare for and go to war Whereas security studies has been broadened and stretched to cover at times the near totality of international and domestic affairs and war studies has come to mean not just operations and tactics but also experiences and outcomes defence studies remains a coherent area of study primarily aimed at how defence policy changes over time and in relation to stimulating factors such as alterations in power strategy and technology This new Handbook offers a complete landscape of this area of study and contributes to a review of defence studies in terms of policy security and war but also looks forward to new challenges to existing conceptions of defence and how this is changing as states and their militaries also change The volume is divided into four thematic sections Defence as Policy Defence Practice Operations and Tactics and Contemporary Defence Issues The ability to review the field while also looking forward to further research is an important element of a sustainable text on defence studies In as much as this volume is able to highlight the main themes of defence studies it also offers an in depth look into how defence issues can be examined and compared in a contemporary setting This Handbook will be of great interest to students of defence studies strategic studies war studies security studies and IR **The British Way in Warfare: Power and the International System, 1856-1956** Keith Neilson, 2016-03-16 In his groundbreaking book The British Way in Warfare Routledge 1990 David French outlined the skillful combination of maritime economic and diplomatic power employed by Britain to achieve its international goals Almost two decades later this collection offers a reassessment of French's thesis using it as a lens through which to explore Britain's relationship with various kinds of power military and civil and how this was employed across the globe In particular each essay addresses the ways in which the use of power manifested itself in the maintenance of Britain's place within the

international system between 1856 and 1956 Adopting twin methodologies the collection firstly addresses the broad question of Britain's relationship with other Great Powers and how these influenced the strategies used before then testing these with specific case studies By taking this approach it is possible to discern which policies were successful and which failed and whether these remained constant across time and space Measuring Britain's strategy against her commercial imperial and military competitors including France the USA Italy Germany and Russia allows intriguing conclusions to be drawn about just how an essentially maritime power could compete with much larger and potentially more powerful continental rivals With contributions from an outstanding selection of military scholars this collection addresses fundamental questions about the intersection of military economic and diplomatic history that are as relevant today as they were during the height of Britain's imperial power It will prove essential reading not only for those with an interest in British military history but for anyone wishing to understand how power in all its multifaceted guises can be employed for national advantage on the international stage

NL ARMS Netherlands Annual Review of Military Studies 2019 Wim Klinkert, Myriame Bollen, Marenne Jansen, Henk de Jong, Eric-Hans Kramer, Lisette Vos, 2019-07-16 This book has as its subject matter the academic education of officers and builds on the signing of the Bologna Declaration in 1999 by twenty nine European ministers for Education and Science who thereby agreed to coordinate higher education across Europe by for instance the implementation of the Bachelor's and Master's system In the meantime military academies have also introduced the BaMa system into their programs for officers education which marks a transition from the old days when officers education took place within a national military system under military command and was firmly grounded in principles traditions and needs as professed by the Ministries of Defence and the armed forces in particular So the Bologna Declaration can be seen as crucial leverage for the development of in house academic degree programs as a fundamental part of officers education With this volume the editors of NL ARMS 2019 strive to offer a platform to both academics and military and civilian practitioners as well as to combinations of these to reflect and share their thoughts on officers education before and after Bologna both in The Netherlands and abroad To this end controversies and challenges affecting various aspects and systems of officers education have been grouped into five themes Respectively the first four themes comprise institutional settings and change educational philosophy educational challenges and reflective practices and didactical solutions The fifth theme international perspectives provides insights into the strategic environments and challenges faced by sister academies as well as ways to further officers education across Europe such as offered by Erasmus programs All the editors of this year's volume are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda The Netherlands

Sport and the Military
Tony Mason, Eliza Riedi, 2010-11-04 On battleships behind the trenches of the Western Front and in the midst of the Desert War British servicemen and women have played sport in the least promising circumstances When 400 soldiers were asked in Burma in 1946 what they liked about the Army 108 put sport in first place well ahead of comradeship and leave and this book

explores the fascinating history of organised sport in the life of officers and other ranks of all three British services from 1880 1960 Drawing on a wide range of sources this book examines how organised sport developed in the Victorian army and navy became the focus of criticism for Edwardian army reformers and was officially adopted during the Great War to boost morale and esprit de corps It shows how service sport adapted to the influx of professional sportsmen especially footballers during the Second World War and the National Service years

The Military Academy of Malaysia Compared with West Point Jowati Juhary, 2013-10 This dissertation compares the learning environment of elite military academies in the U S and Malaysia namely the United States Military Academy New York West Point and the Military Academy of Malaysia Kuala Lumpur MAM The dissertation began as an investigation of the place of e learning and simulation technologies in educating future military officers It was assumed that as modern technologies for war and defence have changed so too must the military academies accommodate to that especially in producing the right kind of officers who will lead the defence of the nation Research in West Point and the MAM however revealed much more significant and deeper differences between the two learning environments These are also analysed in this dissertation on the basis of in depth interviews with staff at both academies and responses to some 241 questionnaires returned by the cadets One of the most important findings in this study is that the learning environment at West Point is informed by the Thayer System which in turn is based on principles strongly reminiscent of the constructivist school of pedagogical inquiry The impact of the Thayer System on the learning environment is analysed as are the essential features of constructivism In Malaysia by contrast the learning environment in the academy is driven by teacher oriented practices that are not sensitive to the needs of students Moreover the broader authoritarian tendencies in Malaysia have encouraged the entrenchment of didactic modes of teacher student exchanges in the classroom These were found not to be conducive to creative student centred learning processes capable of producing the kind of officers who can lead the Malaysian military at a time of growing regional insecurity in the Asia Pacific

Operation

Crusader and the Desert War in British History and Memory Alexander Joffe, 2020-09-03 Shortlisted for the 2021 Society for Army Historical Research s Templer Medal Operation Crusader launched in November 1941 was the third and final British attempt to relieve the siege of Tobruk and break the German and Italian forces in North Africa After tough initial fighting the British made important gains only to be countered by a stunning breakthrough overseen personally by Lt General Erwin Rommel As the British situation teetered the commander of the 8th Army Lt General Alan Cunningham was relieved of duty by his superior General Claude Auchinleck This decision changed the direction of the battle and perhaps the war itself Why and how Cunningham was relieved has been the subject of commentary and speculation since it occurred Using newly discovered evidence Alexander Joffe rethinks the events that brought about the sudden relief of the operation s commanding officer including insubordination The book then discusses how narratives regarding the operation were created were incorporated into British and Commonwealth official and unofficial historical writing about the war and contributed to British

historical memory Based on a decade of archival work the book presents a new and detailed analysis of a consequential battle and importantly of how its history was written and received in the context of post war Britain Handbook of the Sociology of the Military Giuseppe Caforio, Marina Nuciari, 2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003 It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so called cyborg warriors new forms of leadership and changes in soldier s identity and organisational culture It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War The Influence of Foreign Wars on U.S. Domestic Military Policy Robert W. Tomlinson, 2024-04-08 How do military organizations learn This book covers an important instance of military learning in which the United States military systematically examined the lessons of Israel s decisive victory in the 1973 Yom Kippur War and applied those lessons towards major doctrinal and equipment changes The book relies heavily on Paul Senge s model of learning organizations outlined in his seminal work *The Fifth Dimension* Using Senge s model the book examines the Departments of the Army Air Force and Navy s reactions to the Yom Kippur War and how they organizationally incorporated or ignored the lessons of the conflict within their force Using source documents including personal memoirs doctrinal publications and individual reflections the book offers a vital examination of how militaries can use foreign conflicts to make substantive and necessary organizational changes The Yom Kippur War particularly the Israeli experience in that conflict provided the American military a battle laboratory in which to develop new warfighting concepts and assess new weapons acquisitions In its conclusion the book offers a cautionary tale that suggests learning and change do not come automatically to military organizations If they are to be successful in the future military organizations must embrace learning structures **Military Identities** David French, 2005-07-07 The regimental system has been the foundation of the British army for three hundred years but has been repeatedly reinvented to suit the changing roles that were forced upon the army Based upon extensive primary research this is the first book to strip away the myths that have been deliberately manufactured to justify or to condemn the system
