Military In Politics And Society In France And Germany In The Twentieth Century:

The Creation of the Modern German Army William Mulligan, 2005 Civil military relations have been a consistent theme of the history of the Weimar Republic This study focuses on the career of General Walther Reinhardt the last Prussian Minister of War and the First Head of the Army Command in the Weimar Republic Though less well known than his great rival Hans von Seeckt Reinhardt's role in forming the young Reichswehr and his writings on warfare made him one of the most important and influential military figures in interwar Germany Contrary to the conventional view that civil military relations were fraught from the outset the author argues Reinhardt's contribution to the military politics of the Weimar Republic shows that opportunities for reform and co operation with civilian leaders existed However although he is primarily seen as a liberal General this study demonstrates that he was motivated by professional military considerations and by the specter of a future war His ideas on modern warfare were amongst the most radical of the time *Military in Politics and Society in*

France & Germany in the 20th Century Klaus-Jürgen Müller, 1995-05-12 This book presents the views of a number of distinguished German military historians on the problems of civil military relations in Germany and France in the period from the Franco Prussian War to the French occupation of Germany after 1945 It compares the origins recruitment and political attitudes of the respective countries officer corps and considers the impact of defeat on both of them in the French case after 1940 and in the German case after 1918 The authors discuss the role of the French and German navies in politics and the impact of the military on foreign policy in both nations during the period between the two world wars **The Ideological**

Origins of Great Power Politics, 1789-1989 Mark L. Haas, 2018-09-05 How do leaders perceive threat levels in world politics and what effects do those perceptions have on policy choices Mark L Haas focuses on how ideology shapes perception He does not delineate the content of particular ideologies but rather the degree of difference among them Degree of ideological difference is he believes the crucial factor as leaders decide which nations threaten and which bolster their state's security and their own domestic power These threat perceptions will in turn impel leaders to make particular foreign policy choices Haas examines great power relations in five periods the 1790s in Europe the Concert of Europe 1815 1848 the 1930s in Europe Sino Soviet relations from 1949 to 1960 and the end of the Cold War In each case he finds a clear relationship between the degree of ideological differences that divided state leaders and those leaders' perceptions of threat level and so of appropriate foreign policy choices These relationships held in most cases regardless of the nature of the ideologies in question the offense defense balance and changes in the international distribution of power **Resistance**

and Liberation Douglas Porch, 2024-01-25 In *Resistance and Liberation* Douglas Porch continues his epic history of France at war Emerging from the debacle of 1940 France faced the quandary of how to rebuild military power protect the empire and resuscitate its global influence While Charles de Gaulle rejected the armistice and launched his offshore crusade to reclaim French honor within the Allied camp defeatists at Vichy embraced cooperation with the victorious Axis The book

charts the emerging dynamics of la France libre and the Alliance Vichy collaboration and the swelling resistance to the Axis occupation From the campaigns in Tunisia and Italy to Liberation Douglas Porch traces how de Gaulle sought to forge a French army and prevent civil war He captures the experiences of ordinary French men and women caught up in war and defeat the choices they made the trials they endured and how this has shaped France s memory of those traumatic years

Catholicism, Politics and Society in Twentieth-century France Kay Chadwick,2000-01-01 Catholicism once the protean monster still functions as a complex component of French identity No consideration of modern France would be complete without reference to the enduring impact and influence of Catholicism on the life of the nation This volume sets out to capture some of the variety and significance of the Catholic phenomenon in twentieth century secular France and to express something of its extraordinary vitality and interest Each contribution focuses on a specific theme or period crucial to an understanding of the role played by French Catholics and their Church Collectively these studies reveal that Catholics were involved in almost every event of consequence and voiced an opinion on almost every issue Equally the volume offers a collage of insights which reflects the fragmentation of Catholic activity and attitudes as the century progressed Being Catholic in modern France no longer means the espousal of a particular political or social agenda Nor does it necessarily mean regular and traditional religious observance or even strict adherence to the dictates of the Church Modern French Catholicism truly has many mansions

A History of Twentieth-Century Germany Ulrich Herbert,2019-08-15 Germany in the 20th century endured two world wars a failed democracy Hitler s dictatorship the Holocaust and a country divided for 40 years after World War II But it has also boasted a strong welfare state affluence liberalization and globalization a successful democracy and the longest period of peace in European history A History of Twentieth Century Germany provides a survey of German history during a century of extremes Ulrich Herbert sees German history in the 20th century as determined by two contradictory perspectives On one hand there are the world wars and great catastrophes that divide the country s history into two parts before and after 1945 Germany is the birthplace of radical ideologies of the left and right and the only country in which each ideology became the foundation of government This pattern left its stamp on both the first and second halves of the century On the other hand the rise of modern industrial society led to decades of conflict over the social and political order regardless of which political system was in force Considering these contradictory developments Herbert tackles the questions of both the collapse in the first half of the century and the development from a post fascist ruined society to one of the most stable liberal democracies in the world in the latter half Herbert s analysis brings together wars and terror utopia and politics capitalism and the welfare state socialism and liberal democratic society gender and generations culture and lifestyles European integration and globalization The resulting book sets a standard by which historians of the period will be measured in the future

War eras but in periods when the effects are less obvious **Germany in the Twentieth Century (RLE: German Politics)** David Childs, 2014-12-17 The book traces the development of Germany from the Kaiser's Reich in the 1870s to the reunited democratic state led by Helmut Kohl in the 1990s The author begins by countering the popular view of Germany before 1914 as irredeemably reactionary and after assessing Germany's part in the First World War he outlines the rise and fall of the Weimar Republic The 12 years of Hitler's destructive experiment are presented in a balanced way as part of the overall development of the country Germany in defeat is then discussed as is her rebirth under Four Power occupation The last chapters explore the two separate German states and the events leading up to the restoration of German unity

Consumerism in Twentieth-Century Britain Matthew Hilton, 2003-11-13 This book is the first comprehensive history of consumerism as an organised social and political movement Matthew Hilton offers a groundbreaking account of consumer movements ideologies and organisations in twentieth century Britain He argues that in organisations such as the Co operative movement and the Consumers Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing accounts of twentieth century history He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self interested actions of employers and trade unions Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations
