Military Training And Children In Armed Conflict Law Policy And Practice:

Military Training And Children In Armed Conflict Jenny Kuper, 2005 During recent armed conflicts such as those in Iraq the former Yugoslavia and Rwanda public attention was repeatedly caught by images of children both as civilians and as soldiers Those conflicts like so many others were vivid reminders that where there is armed conflict there are also almost always children Soldiers and officers fulfil many roles in relation to such children sometimes as combatants sometimes as humanitarian workers sometimes as protectors and or sometimes as enemies and abusers This book aims to address three main questions what are the obligations of officers of national armed forces in relation to children either civilians or combatants whom they or those under their command may encounter while participating in situations of armed conflict How realistic and achievable are these obligations How can compliance with them be encouraged monitored and or enforced The book examines these questions in the context of military training In doing so it has another inextricably linked aim to see if there are ways in which the training of officers can improve the protection of children in armed conflict situations in accordance with international law and policy It is intended for use particularly by those involved in training of national armed forces including officers themselves and members of governments non governmental organisations NGOs and inter governmental organisations It is hoped that it will also be of interest to lawyers academics and others concerned with child rights and related law and policy It contains examples of actual training materials that can be modified for use in different countries and contexts *Children and Youth in Armed Conflict* Ann-Charlotte Nilsson, 2013-12-05 This is a book that students and professionals from different disciplines and backgrounds including from academia international organisations non governmental organisations the medical community governments etc will find to be a valuable resource in their quest to learn more about an area of study that has long been neglected 2 Volume set *Child Security in Asia* Cecilia Jacob, 2013-08-15 Millions of children around the world are affected by conflict and the enduring aftermath of war in post conflict societies This book reflects on the implications of children s insecurity for governments and the international humanitarian community by drawing on original field research in post conflict Cambodia and in Burma s eastern conflict zones The book examines the way that politics and discourses of security and child protection have further marginalised rather than enhanced the protection of children In Cambodia threats from trafficking exploitative labour and high levels of domestic and social violence challenge the government and the international humanitarian community to respond to the new human security terrain that is the legacy of three decades of political violence Burma has endured over 60 years of insurgency and civil conflict in ethnic minority states significantly affecting children who are recruited into armies killed maimed or tortured and displaced Analysing the theoretical and practical challenges faced in addressing children s security in global politics the book offers a novel framework for responding to the politics of protection that is at the heart of this crucial issue It is a useful contribution to studies on Asian Politics and International Relations and Security International

Prosecution of International Sex Crimes Morten Bergsmo, 2018-06-01 **Childhood and the Production of Security** J Marshall Beier, 2018-02-02 Responding to security scholars puzzling dearth of attention to children and childhoods the contributors to this volume reveal the ways in which they not only are already present in security discourses but are actually indispensable to them and to the political projects they make possible From zones of conflict to everyday life contexts in the post industrial Global North dominant ideas about childhood work to regulate the constitution of political subjects whilst variously enabling and foreclosing a wide range of political possibilities Whether on the battlefields of Syria in the halls of the UN or the conceptual musings of disciplinary Security Studies claims about or ostensibly on behalf of children are ubiquitous Recognizing children as engaged political subjects however challenges us to bring a sustained critical gaze to the discursive and semiotic deployments of children and childhood in projects not of their making as well as to the ways in which power circulates through and around them This book was originally published as a special issue of Critical Studies on Security

International Law and Child Soldiers Gus Waschefort, 2014-12-04 This book commences with an analysis of the current state of child soldiering internationally Thereafter the proscriptive content of contemporary norms on the prohibition of the use and recruitment of child soldiers is evaluated so as to determine whether these norms are capable of better enforcement An issues based approach is adopted in terms of which no specific regime of law such as international humanitarian law IHL is deemed dominant Instead universal and regional human rights law international criminal law and IHL are assessed cumulatively so as to create a mutually reinforcing web of protection Ultimately it is argued that the effective implementation of child soldier prohibitive norms does not require major changes to any entity or functionary engaged in such prevention rather it requires the constant reassessment and refinement of all such entities and functionaries and here some changes are suggested International judicial quasi judicial and non judicial entities and functionaries most relevant to child soldier prevention are critically assessed Ultimately the conclusions reached are assessed in light of a case study on the use and

Trial Justice Tim Allen, 2013-04-04 The International Criminal Court ICC has run into serious problems with its first big case the situation in northern Uganda There is no doubt that appalling crimes have occurred here Over a million people have been forced to live in overcrowded displacement camps under the control of the Ugandan army Joseph Kony's Lord's

Resistance Army has abducted thousands many of them children and has systematically tortured raped maimed and killed Nevertheless the ICC has confronted outright hostility from a wide range of groups including traditional leaders representatives of the Christian Churches and non governmental organizations Even the Ugandan government which invited the court to become involved has been expressing serious reservations Tim Allen assesses the controversy While recognizing the difficulties involved he shows that much of the antipathy towards the ICC s intervention is misplaced He also draws out important wider implications of what has happened Criminal justice sets limits to compromise and undermines established procedures of negotiation with perpetrators of violence Events in Uganda have far reaching implications for other war zones and not only in Africa Amnesties and peace talks may never be quite the same again
