Transforming Security Ursula Werther-Pietsch, 2021-10-29 This book analyses the collective security system as it now stands focusing on strategic and normative frameworks The old system of international collective security is based on assumptions that are inadequate in relation to current challenges Against the backdrop of changed geopolitical constellations democracies under siege and the challenges posed by new types of warfare critical analysts hold that not a single multilateral institution today is fully up to the task it was created for The UN from its founding to the Sustained Peace Approach represents a fascinating global process of vision building and adaptation to reality Based on this understanding the dynamics of the UN peace and security architecture are examined along with major agendas from peacebuilding to development In turn reform proposals in the post COVID 19 era are discussed The book examines whether a regionalization of security structures within the UN framework may offer a way out of global fragility and growing instability factors a question of utmost importance for conflict prevention and crisis management in the next few decades In turn the author discusses a normative positioning of a new intervention logic as the lowest common denominator between collaborative regional orders Reinvented multilateralism will return as a must Given its scope the book will appeal to students and scholars of international relations and international security studies as well as to policymakers in governments and international organizations

Security in 21st Century Europe Andrew Cottey, 2025-05-01 The nature of security in Europe has been transformed in recent years. Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO but that today the European security community NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question. Offering a systematic assessment of security in contemporary Europe, this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges. It explores Europe's engagement with core thematic issues in European security including military intervention, nuclear weapons, terrorism and non-military security. Providing both a substantive contribution to academic thinking on European security and an overview of debates on contemporary European security, this new edition offers 3 new chapters on migration, climate change and cybersecurity. Coverage of all recent major developments related to European security including the Syrian civil war and the regional destabilization arising from it, Russia-Ukraine crisis, the rise of populism, the migration crisis, the acceleration of China's rise. Security in 21st Century Europe combines theory and detailed empirical analysis, exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions. This text is the perfect companion for advanced undergraduate and Master's level courses on European security, whether within courses in Security studies, European studies or International Relations.

Leadership Development in Balance Bruce J. Avolio, 2005-01-15 This book, written by a leading scholar in leadership, takes readers through a very realistic look at what it takes to develop leadership competencies. Focusing on four major goals, this text provides the reader with a broader and deeper understanding of what constitutes authentic leadership development. It challenges a very basic notion that leaders are born versus made, talks about the elements that comprise leadership development so readers are informed to ask the many providers of leadership development the right questions and develop full leadership potential. There are numerous case examples used throughout the book: high-tech executives, community leaders, correctional service supervisors, bank managers in Canada, and platoon commanders in Israel. Each example is used as a general basis for discussing how people develop their leadership potential and as models of training and evaluation.

Leadership Development in Balance MADE Born is intended for graduate or undergraduate students of leadership, project managers, supervisors, senior executives, school principals, health care officers or legislators.
