*Fortification and Its Discontents from Shakespeare to Milton* Adam N. McKeown, 2019-01-08 *Fortification and Its Discontents from Shakespeare to Milton* gives new coherence to the literature of the early modern Atlantic world by placing it in the context of radical changes to urban space following the Italian War of 1494-1498 The new walled city that emerged in the sixteenth and seventeenth centuries on both sides of the Atlantic provided an outlet for a wide range of humanistic fascinations with urban design composition and community organization but it also promoted centrality of control and subordinated the human environment to military functionality Examining William Shakespeare Edmund Spenser John Winthrop and John Milton this volume shows how the literature of England and New England explores and challenges the new walled city as England struggled to define the sprawling metropolis of London translate English urban spaces into Ireland and North America and later survive a long civil war      [Military Fortifications](#) , 1992-01-22 This is the first English language general bibliography on military fortifications It deals with the history of fortifications from the earliest times to the present throughout the world Design construction and maintenance of all types of fortifications are noted from permanent to temporary from earthworks to fortifications of wood and stone Although the work mainly cites English language sources numerous useful foreign language publications are noted as well Materials included range from books and pamphlets to essays periodicals book chapters dissertations and videos After the frontmatter which provides an overview of the subject the volume consists of six major sections general works are cited first followed by chapters on fortifications in the Eastern Hemisphere Europe the Pacific the Western Hemisphere and specific topics Each entry contains an annotation which notes the work's content assesses its usefulness and notes any unique features Access to the contents of the volume is augmented

through an author index and a subject index This bibliography should prove invaluable to scholars and researchers concerned with military history and the place of fortifications in warfare     Inhabitable Infrastructures CJ Lim,2017-05-25 Inhabitable Infrastructures Science fiction or urban future the follow up to Food City and Smartcities and Eco Warriors from one of the world s leading urban design and architectural thinkers explores the potential of climate change related multi use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi use infrastructures and integrated self sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio politics     *Aztec Warfare* Ross Hassig,1988 In exploring the pattern and methods of Aztec expansion Ross Hassig focuses on political and economic factors Because they lacked numerical superiority faced logistical problems presented by the terrain and competed with agriculture for manpower the Aztecs relied as much on threats and the image of power as on military might to subdue enemies and hold them in their orbit Hassig describes the role of war in the everyday life of the capital Tenochtitlan the place of the military in Aztec society the education and training of young warriors the organization of the army the use of weapons and armor and the nature of combat     *Dreams + Disillusions* CJ Lim,Luke Angers,2024-04-25 Dreams Disillusions explores the plethora of ideas and ideologies that have shaped and reshaped cities in profound ways However unlike a conventional title on the history of urbanism and architecture its research fluctuates between the world of concrete reality and the multiple universes that exist in lucid prose poetic visions and the outrageous imaginations of history s greatest and most in famous minds In their thoughts are the foundations for political trends and new civilisations alternative mappings and unlikely phenomena The six chapters reveal dreams that were fundamental to the origin of great cities underpinning the stories of the many lives within and how through circumstance or manipulation fortunate coincidence or planned perfection desires are sometimes left defeated and disillusioned Myth and belief Tradition and logic Revolution and marginalisation Ignorance and hubris Sins and excess Seasons and climate Continuously interacting shifting to enlighten and to enrage these themes combine critical thinking with deep rooted influences and new agencies that are a true sign of the times The 18 illustrated speculations provide an abundance of curious

imaginings diverse provocations and satirical criticism While there are distinctions between dreams and disillusionments could virtues be made of sins or sensitivity be borne from hubris Could progress advocate tradition or should we re attempt revolutions formerly experienced as disillusionments Whether by bold gestures or by subtle attrition cities are continually re written crucibles for the human condition In this book we develop a better understanding of the discourse of cities tailored to the determining factors of climate resources and humanity's idiosyncrasies to address a world in crisis Campsite Charlie Hailey, 2008-06-01 Camping is perhaps the quintessential American activity We camp to escape to retreat to find ourselves The camp serves as a home away from home where we might rethink a deliberate life We also camp to find a new collective space where family and society converge Many of us attended summer camps and the legacies of these childhood havens form part of American culture In Campsite Charlie Hailey provides a highly original and artfully composed interpretation of the cultural significance and inherently paradoxical nature of camps and camping in contemporary American society Offering a new understanding of the complex relationship between place time and architecture in an increasingly mobile culture Hailey explores campsites as places that necessitate a unique combination of contrasting qualities such as locality and foreignness mobility and fixity temporality and permanence and public domesticity Camping methods reflect the rigid flexibility of the process leaving home arriving at a site clearing an area making and then finally breaking camp The phases of this sequence are both separate and indistinct To understand this paradox Hailey emphasizes the role of process He constructs a philosophical framework to elucidate the placefulness or sense of place of such temporary constructions and provides alternative understandings of how we think of the home and of public versus private dwelling spaces Historically camps have been used as places for scouting out future towns for clearing provisional spaces and for making semipermanent homes away from home To understand how cultures of camping develop and accommodate this dynamic mix of permanence and flexibility Hailey looks at three basic qualities of the camp as a site for place making as a populist precursor for modern built environments and as a method Hailey's creative and philosophical approach to camps and camping allows him to construct links between such diverse projects as the philosophers camps of the mid nineteenth century the idiosyncratic camping clubs that arose with the automobile culture in the early 1920s and more recent uses of campsites as temporary housing for those displaced by Hurricane Katrina In Campsite Hailey makes a singular and significant contribution to current studies of place and vernacular architecture while also reconfiguring methods of research in cultural studies architectural theory and geography **Qsar es-Seghir** Charles L. Redman, 2014-05-10 Qsar es Seghir An Archaeological View of Medieval Life presents the findings of archaeological investigations at Qsar es Seghir a medieval port midway between Tangier and Ceuta on the Moroccan shores of the Strait of Gibraltar The archaeology and material inventory of Qsar es Seghir are described along with the reconstruction of the city based on archaeological analysis Comprised of seven chapters this book begins with an introduction to Qsar es Seghir and an overview of the Moroccan American Archaeological Project

that was launched with the support of the Smithsonian Institution and the government of Morocco to study life in this ancient Islamic city during the medieval period After documenting the history of Qsar es Seghir the Islamic city is described based on the accounts of geographers and historians and then as it emerged through the archaeological excavations Emphasis is on the architecture and town plan as they reveal the organizing principles of the society and the daily lifeways of its inhabitants Subsequent chapters focus on the artifacts used by the people of Qsar es Seghir including tools weapons tableware and jewelry the activities that were conducted at Qsar es Seghir and the town plan fortifications monuments and housing at Qsar es Seghir as a Portuguese colony This monograph should be of value to students researchers and practitioners in the fields of archaeology and anthropology as well as to laypersons interested in medieval life **City Walls** James D. Tracy, 2000-09-25

The essays presented in this volume first published in 2000 describe a phenomenon so widespread in human time and space that its importance is easily overlooked City walls shaped the history of warfare the mobilisation of manpower and resources needed to build them favoured some kinds of polities over others and their massive strength appropriately ornamented created a visual language of authority Previous collective volumes on the subject have dealt mainly with Europe but the historians and art historians who collaborate here follow a comparative agenda The millennial practice of wall building that branched out from the ancient Near East into India Europe and North Africa shows continuities and points of contact of which the makers of urban fortifications were scarcely aware separate traditions in China sub Saharan Africa and North America illustrate universal themes of defensive strategy and the symbolism of power each time embedded in a distinctive local context **Images of the City** Agnieszka Rasmus, Magdalena Cieslak, 2009-01-23 Images of the City takes the reader on a fascinating journey through urban landscapes across centuries literary periods media genres and borders 27 essays gathered from Poland UK Romania Italy Hungary and Portugal by researchers representing different academic environments and fields of speciality offer a truly interdisciplinary perspective on the issue of understanding representing and interpreting the city In this respect the volume complements other anthologies which discuss urban space without limiting itself to one unique theoretical perspective Its neat division into chronological and thematic sections makes for easy yet informative and inclusive reading encouraging cross referencing and challenging interests and tastes of a wide array of readers Images of the City provides essential reading for cityphiles everywhere **The Origins Of War** Arther Ferrill, 2018-05-04

When did war begin Standard military accounts tend to start with the Graeco Persian wars laying undue emphasis on the preeminence of Greek heavy infantry But as this strikingly original and entertaining book shows the origins of war can be traced back not to the Iron Age or even to the Bronze Age but to the emergence of settled life itself nearly 10 000 years ago The military revolution that occurred then the invention of major new weapons the massive fortifications the creation of strategy and tactics ultimately gave rise to the great war machines of ancient Egypt Assyria and Persia that dominated the Near East until the time of Alexander the Great It is Arther Ferrill s thesis that in the period before Alexander there were two independent

lines of military development a Near Eastern one culminating in the expert integration of cavalry skirmishers and light infantry and a Greek one based on heavy infantry When Philip and Alexander blended the two traditions in their crack Macedonian army the result was a style of warfare that continued despite technological changes down to Napoleon This newly revised edition presents detailed and copiously illustrated accounts of all the major battles on land and sea up to the fourth century b c analyzes weapons from the sling to the catapult and discusses ancient strategy and tactics making this a book for armchair historians everywhere *The Mutual Interaction of People and Their Built Environment* Amos

Rapoport,2011-06-03 No detailed description available for The Mutual Interaction of People and Their Built Environment

**All Canada in the Hands of the British** Douglas R. Cubbison,2014-03-28 In 1760 General Jeffery Amherst led the British campaign that captured Montreal and began the end of French colonial rule in North America All Canada in the Hands of the British is a detailed account of Amherst s successful military strategy and soldiers experiences on both sides Newly promoted general Jeffery Amherst took command of British forces in North America in 1759 and soon secured victories at Fort Duquesne Louisbourg Quebec Fort Ticonderoga and Niagara In 1760 William Pitt head of the British government commanded Amherst to eliminate French rule in Canada During the ensuing campaign Amherst confronted French resurgence at Quebec and mounted sieges at Isle aux Noix and Fort L vis both of which were made difficult by French strategic placements on nearby islands As historian Douglas R Cubbison demonstrates however Amherst was well before his time in strategy and tactics and his forces crushed French resistance In this first book length study of Amherst s campaign Cubbison examines the three principal columns that Amherst s army comprised only one of which was under his direct command Cubbison argues that Amherst s success against the French relied on his employment of command control communications and intelligence Cubbison also shows how well Brigadier General James Murray s use of what is today called population centric counterinsurgency corresponded with Amherst s strategic oversight and victory Using archival materials archaeological evidence and the firsthand accounts of junior provincial soldiers Cubbison takes us from the eighteenth century antagonisms between the British and French in the New World through the Seven Years War to the final siege and its historic significance for colonial Canada In one of the most decisive victories of the Seven Years War Amherst was able after a mere four weeks to claim all of Canada All Canada in the Hands of the British will change how military historians and enthusiasts understand the nature of British colonial battle strategy **Vincenzo Scamozzi and the Chorography of**

**Early Modern Architecture** AnnMarie Borys,2017-07-05 The first English language overview of the contributions to Renaissance architectural culture of northern Italian architect Vincenzo Scamozzi 1548 1616 this book introduces Anglophone architects and historians to a little known figure from a period that is recognized as one of the most productive and influential in the Western architectural tradition Ann Marie Borys presents Vincenzo Scamozzi as a traveler and an observer the first Western architect to respond to the changing shape of the world in the Age of Discovery Pointing out his

familiarity with the expansion of knowledge in both natural history and geography she highlights that his truly unique contribution was to make geography and cartography central to the knowledge of the architect In so doing she argues that he articulated the first fully realized theory of place Showing how geographic thinking influences his output Borys demonstrates that although Scamozzi s work was conceived within an established tradition it was also influenced by major cultural changes occurring in the late 16th century     *The Aurelian Wall and the Refashioning of Imperial Rome, AD 271-855* Hendrik W. Dey, 2011-04-07 This book explores the relationship between the city of Rome and the Aurelian Wall during the six centuries following its construction in the 270s AD a period when the city changed and contracted almost beyond recognition as it evolved from imperial capital into the spiritual center of Western Christendom The Wall became the single most prominent feature in the urban landscape a dominating presence which came bodily to incarnate the political legal administrative and religious boundaries of urbs Roma even as it reshaped both the physical contours of the city as a whole and the mental geographies of Rome that prevailed at home and throughout the known world With the passage of time the circuit took on a life of its own as the embodiment of Rome s past greatness a cultural and architectural legacy that dwarfed the quotidian realities of the post imperial city as much as it shaped them     **The Military Revolution** Geoffrey Parker, 1996-04-18 This is a new edition of Geoffrey Parker s much admired illustrated account of how the West so small and so deficient in natural resources in 1500 had by 1800 come to control over one third of the world Parker argues that the rapid development of military practice in the West constituted a military revolution which gave Westerners an insurmountable advantage over the peoples of other continents This edition incorporates new material including a substantial Afterword which summarises the debate which developed after the book s first publication     *Armies and Warfare in Europe, 1648-1789* John Childs, 1982     **American Architecture: 1607-1860** Marcus Whiffen, Frederick Koeper, 1983 The first volume of a two volume survey of American Architecture this book covers architectural developments from Jamestown to the Civil War
