Sculpture of Angkor and Ancient Cambodia Isabelle Dervaux, 1997 Millenium of Glory Helen Jessup, 1997 Angkor and the Khmer Civilization Michael D. Coe, Damian Evans, 2025-01-21 An authoritative survey of Angkor and the Khmer civilization which incorporates revelations from new discoveries in the past decade that are rewriting history The ancient city of Angkor in Cambodia has fascinated scholars and visitors alike since its rediscovery in the mid nineteenth century All are wonderstruck by the beauty and multiplicity of the sculptures that adorn its temples and structures and are overwhelmed by the sheer size of Angkor There is nothing to equal it in the archaeological world A great deal was already known about the history of Angkor and the brilliant Khmer civilization that built it thanks to pioneering work by archaeologists and scholars but our knowledge has now been completely revolutionized by cutting edge technology Airborne laser scanning LiDAR has revealed entire cities that were previously unknown and a complex urban landscape with highways and waterways profoundly transforming our interpretations of the development and supposed decline of Angkor In this comprehensive edition of Angkor and the Khmer Civilization respected archaeologist Michael Coe is joined by Damian Evans who led this remarkable program of scientific exploration to present the results and implications of these groundbreaking discoveries that are rewriting history The Oxford Handbook of Early Southeast Asia C.F.W. Higham, Nam C. Kim, 2022-01-11 Southeast Asia ranks among the most significant regions in the world for tracing the prehistory of human endeavor over a period in excess of two million years It lies in the direct path of successive migrations from the African homeland that saw settlement by hominin populations such as Homo erectus and Homo floresiensis The first Anatomically Modern Humans following a coastal route reached the region at least 60 000 years ago to establish a hunter gatherer tradition that survives to this day in remote forests From about 2000 BC human settlement of Southeast Asia was deeply affected by successive innovations that took place to the north and west such as rice and millet farming A millennium later knowledge of bronze casting penetrated along the same pathways Copper mines were identified and exploited and metals were exchanged over hundreds of kilometers In the Mekong Delta and elsewhere these developments led to early states of the region which benefitted from an agricultural revolution involving permanent ploughed rice fields These developments illuminate how the great early kingdoms of Angkor Champa and Funan came to be a vital stage in understanding the roots of the present nation states of Southeast Asia Assembling the most current research across a variety of disciplines from anthropology and archaeology to history art history and linguistics The Oxford Handbook of Early Southeast Asia will present an invaluable resource to experienced researchers and those approaching the topic for the first time Federal Register

,1997 Rights to Culture Coeli Barry, 2013-07-01 This collection brings together original small scale ethnographic research on minorities and communities contesting heritage livelihood language and citizenship in Thailand The case studies included here look at the rights of communities to manage their own cultural and natural resources across a range of settings including ethnic Khmer communities in the Northeast migrant groups in metropolitan Bangkok and hill tribe communities in the North of Thailand The studies individually and collectively draw attention to conditions that are conducive to rights claiming and they explore how and in what situations community leaders choose to negotiate with the state using other discourses Readers interested in the limits and possibilities of invoking rights in the pursuit of diversity and pluralism will find in this book critically minded conceptually nuanced and empirically grounded explorations of the interrelationship between culture and rights The book s theoretical and analytic insights contribute to the anthropology of rights as well as heritage studies by raising questions about the possibilities and limitations of rights informed approaches to policy Rights to Culture will appeal to students scholars and practitioners of cultural heritage in Thailand and Southeast Asia as well as globally What others are saying Rights To Culture explores one of the most important and conceptually difficult topics in current heritage studies through case studies located in a nation of significant ethnic diversity and political complexity. The authors masterfully interweave history environment and cultural policy in deeply nuanced ethnographic analyses of communities that range in scale from rural villages to the pulsating urban capital of Bangkok Rights To Culture is an outstanding contribution to debates about culture and rights globally Helaine Silverman University of Illinois at Urbana Champaign This book illustrates how the complex processes of transculturation are experienced by heterogeneous groups of people who are always excluded as other in so called homogeneous Thai society Most important of all is the central argument that culture and rights have provided a negotiating space for these invisible people in their politics of identity to allow them to fully participate in development Anan Ganjanapan Emeritus Chiang Mai University Early Interactions Between South and Southeast Asia Pierre-Yves Manguin, A. Mani, Geoff Wade, 2011 This book takes stock of the results of some two decades of intensive archaeological research carried out on both sides of the Bay of Bengal in combination with renewed approaches to textual sources and to art history To improve our understanding of the trans cultural process commonly referred to as Indianisation it brings together specialists of both India and Southeast Asia in a fertile inter disciplinary confrontation Most of the essays reappraise the millennium long historiographic no man's land during which exchanges between the two shores of the Bay of Bengal led among other processes to the Indianisation of those parts of the region that straddled the main routes of exchange Some essays follow up these processes into better known classical times or even into modern times showing that the localisation process of Indian themes has long remained at work allowing local societies to produce their own social space and express their own ethos The Vision Thing Thomas Singer, 2014-01-14 Contemporary politics goes on at a mythic level This is the provocative argument put forward in this unique book which results from the collaboration of

practising politicians organisational and political consultants scholars of mythology and culture and Jungian analysts from several countries The first part of the book focuses on leadership and vision and features a reflection on myth and leadership by former U S Senator Bill Bradley The second part deals with the way the theme of the one and the many works itself out in politics today From the perspective of the many there are chapters on factionalism ethnic strife genocide and multiculturalism From the perspective of the one there are chapters on the economic myth and gender politics showing how these bring coherence to today s confused political scene culminating in the suggestion that the modern political psyche is itself in the midst of a rite of passage The relevance of the book to the practice and study of politics mainstream and marginal cannot be overemphasised and the book will provide stimulating reading for practitioners and students in these areas as well as for those engaged in psychological work such as therapy counselling or analysis The Golden Road William Dalrymple, 2025-04-29 The internationally bestselling author of The Anarchy returns with a sparkling soaring history of ideas tracing South Asia's under recognized role in producing the world as we know it For a millennium and a half India was a confident exporter of its diverse civilization creating around it a vast empire of ideas Indian art religions technology astronomy music dance literature mathematics and mythology blazed a trail across the world along a Golden Road that stretched from the Red Sea to the Pacific In The Golden Road William Dalrymple draws from a lifetime of scholarship to highlight India's oft forgotten position as the heart of ancient Eurasia For the first time he gives a name to this spread of Indian ideas that transformed the world From the largest Hindu temple in the world at Angkor Wat to the Buddhism of China from the trade that helped fund the Roman Empire to the creation of the numerals we use today including zero India transformed the culture and technology of its ancient world and our world today as we know it ,2024-03-11 In the course of millennia of dealing with problems of violence South Asia has not only elaborated the ideal of total avoidance of violence in a unique manner it also developed arguments justifying and rationalizing its employment under certain circumstances Some of these arguments seemingly transform all sorts of violence into non violence Historical and cultural aspects of the tensions between violence and its denial and rationalization in South Asia are taken up in the contributions of this volume which deal with topics ranging from the origins of the concept of ahi s to the iconography and interpretation of a self beheading goddess and violent heroines in Aj eya s Hindi short stories **Ruthless Compassion** Robert N. Linrothe, 1999 The historical development of Esoteric Buddhism in India is still known only in outline A few verifiably early texts do give some insight into the origin of the ideas which would later develop and spread to East and Southeast Asia and to Tibet However there is another kind of evidence which can be harnessed to the project of reconstructing the history of Esoteric Buddhist doctrines and practice This evidence consists of art objects mainly sculpture which survive in significant numbers from the 6th to the 13th century **Violence and Serenity** Natasha Reichle, 2007-07-26 The mention of Buddhism in Indonesia calls to mind for many people the Central Javanese monument of

Borobudur one of the largest Buddhist monuments in the world and the subject of extensive scholarly scrutiny The neglect of scholarship on Buddhist art from later periods might lead one to assume that after the tenth century Buddhism had been completely eclipsed by the predominantly Hindu Eastern Javanese dynasties Yet as the works discussed here illustrate extraordinary Buddhist images were still being produced as late as the fourteenth century Violence and Serenity offers a close examination of some of the impressive works from East Java and Sumatra and explores their political and religious roles The number of clearly identifiable Buddhist works from the Singasari and Majapahit dynasties 1222 ca 1520 is limited yet existing examples are impressive. They demonstrate a remarkable level of craftsmanship and are exceptionally expressive exhibiting a range of emotions from the ferocious to the serene Following a brief discussion of the early history of Buddhism in Indonesia Natasha Reichle focuses each chapter on a specific statue or group of statues and considers the larger issues evoked by the images Through a rarely examined depiction of the last Singasari king she explores the nature of religion in Java in the late thirteenth century and what we know about tantric practices and the syncretism of Hinduism and Buddhism She reassesses the question of portraiture in ancient Javanese art while contemplating the famous Praj p ramit from Singasari Notions of kingship are discussed in light of a number of statues depicting the Buddhist deity Amoghap a and his attendants and the meanings of the Amoghap a ma ala The final chapter examines the origins and significance of one of Indonesia s most spectacular sculptures a four meter high Buddhist bhairava demon discovered in West Sumatra South and Southeast Asian Art and Archaeology Index Karel R. Van Kooij, 2018-10-24 This volume is the first tangible result of an international project initiated by the International Institute for Asian Studies IIAS with the aim of compiling a bibliographic database documenting publications on South and Southeast Asian art and archaeology The bibliographic information over 1 300 records extracted from the database forms the principal part of this publication It is preceded by a list of periodicals consulted and followed by three types of indexes which help users to find their way in the ABIA South and Southeast Asian Art and Archaeology Index ABIA Index The detailed bibliographic descriptions controlled keywords and many elucidating annotations make this reference work into an indispensable guide to recent scholarly work on the prehistory and arts of South Southeast Asia Buddhist Dynamics in Premodern and Early Modern Southeast Asia D. Christian Lammerts, 2016-04-29 The study of historical Buddhism in premodern and early modern Southeast Asia stands at an exciting and transformative juncture Interdisciplinary scholarship is marked by a commitment to the careful examination of local and vernacular expressions of Buddhist culture as well as to reconsiderations of long standing questions concerning the diffusion of and relationships among varied texts forms of representation and religious identities ideas and practices The twelve essays in this collection written by leading scholars in Buddhist Studies and Southeast Asian history epigraphy and archaeology comprise the latest research in the field to deal with the dynamics of mainland and pen insular Buddhism between the sixth and nineteenth centuries C E Drawing on new manuscript sources inscriptions and archaeological data

Rafael, 2023-07-18 Comprising 11 countries and hundreds of languages from one of the most culturally diverse regions in the world the chapters in this collection explore a wide range of translation issues The subject of this volume is set in the contrasted landscapes of mainland peninsulas and maritime archipelagos in Southeast Asia which whilst remaining a largely minor area in Asian studies harbors a wealth of textual heritage that opens to inquiries and new readings From the post Angkor Cambodia the post colonial Viantiane to the ultra modern Singapore metropolis translation figures problematically in the modernization of indigenous literatures criss crossing chronologically and spatially through different literary landscapes The peninsular geo body gives rise to the politics of singularity as seen in the case of the predominant monolingual culture in Thailand whereas the archipelagic geography such as the thousand islands of Indonesia allows for peculiar types of communication Translation can also be metaphorized poetically to configure the transference in different scenarios such as the cases of self translation in Philippine protest poetry and untranslatability in Vietnamese diasporic writings The collection also includes intra regional comparative views on historical and religious terms This book will appeal to scholars and postgraduate students of translation studies sociolinguistics and Southeast Asian studies
