Millennium Tablets The Quest For Light:

Creators and Friends Robert Shapiro, 1998-02-01 Humans creators in training have a purpose and destiny so heartwarming and profoundly glorious that it is almost unbelievable from our present dimensional perspective. Humans are great light beings from beyond this creation, gaining experience in dense physicality by slowing down the creative process in order to feel the results and consequences of their decisions and actions. This truth about the great human genetic experiment of the Explorer Race and the mechanics of creation is being revealed for the first time by Zoosh and his friends as humanity begins to awaken to its true nature. Zoosh and a great assortment of beings who have never spoken to the physical plane before, from particles to All That Is, speak vibrantly through superchannel Robert Shapiro. Each personality has its own knowing perception and expertise as it shares its history, its present focus, and the awesome truth about humanity's mission. The books read like adventure stories as we follow the clues from this creation we live in out to the Council of Creators and beyond. As we explore the greater reality beyond our planet, our galaxy, our dimension, our creation, we meet prototypes, designers, shapemakers, creators, creators of creators, and friends of our Creator who explain their roles in this creation and their experiences before and beyond this creation. As our awareness expands about the way creation works, our awareness of who we are expands, and we realize that a part of ourselves is in that vast creation and that we are much greater and more magnificent than even science fiction had led us to believe. Join us in the adventure of discovery. It's mind stretching.

Numerology Lynn Buess, 1991 Since the publication of *Numerology for the New Age*, Lynn has come into national and international prominence. His combination of psychotherapeutic insight and esoteric knowledge have caused many to consider him the foremost world spokesman on the relationship between numbers and human behavior. In this volume, he turns his attention toward the age-old issue of relationships. With clear and direct style, he identifies the archetypal patterns of each numerical combination. By providing clues to conscious and unconscious issues, Lynn gives the reader choices of behavior in relationships. With choice comes the possibility of recognizing and releasing patterns of victimhood, abuse, and dysfunction, allowing for growth, joy, fulfillment, and compatible sharing between partners.

Origins and the Next 50 Years Robert Shapiro, 1997-01-01 The accounts given by extraterrestrials in this volume are about events that occurred in our solar system many millions of years ago. In that ancient time, the solar system consisted of four planets and four radiar systems that orbited the central sun. The four planets of the solar system are known today as Venus, Earth, Mars, and a now totally shattered world that was called Maldec. The term radiar applies to the astronomical bodies we presently call Jupiter, Saturn, Uranus, and Neptune. The original satellites of these radiars are generally called moons by Earth astronomers, but the extraterrestrials prefer to call them planetoids. This book reflects the personal views of a number of different types of extraterrestrials regarding the state of the local solar system and the state of the Earth.
