Martin, 2024-04-05 We must establish our world order on the principles of human dignity if we want a credible future for humanity This book shows how and why this is so It investigates the meaning of human dignity in relation to current scholarly work as well as in terms of the depths of our subjective lives from which the concept of dignity arises It contrasts the concept of dignity with our current world system engulfed in endless wars immense inequality systems of economic injustice and on going environmental destruction It shows the relationship between dignity human rights and global moral principles and lays out ten fundamental principles for a planetary ethics The book contrasts the holistic paradigm uncovered by 20th century science with the fragmented paradigm that persists at the heart of the present world system showing how and why a conversion to holism and dignity is both necessary and possible Human Dignity and World Order shows that we have not yet fully understood our human existential situation as temporal beings oriented toward the future who possess the largely untapped power of a liberating utopian imagination Through examining our fundamental human condition it unveils our vast potential for self transcendence and transformation leading toward a redeemed and credible human future in which we flourish on the Earth within a planetary civilization of freedom justice peace and sustainable prosperity This book also presents the Constitution for the Federation of Earth as a paradigm or model for practical action toward a credible human future Altogether the book constitutes a watershed in human self
