

Listing thousands of silver marks from around the world, from 1700 until the present day, *Miller's Encyclopedia of World Silver Marks* provides the most in-depth and up-to-date guide to identifying when, where and by whom a silver object was made. It's the must-have book for anyone collecting, valuing or dealing in silver and the only reference work that will allow you to identify confidently and reliably an unknown piece of silver from any country in the world.

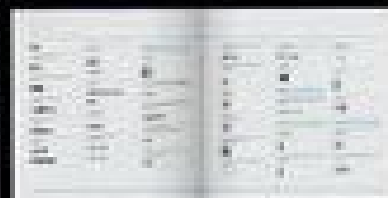

VOLUME I

Provides a visual index of marks listed by type, such as letters, numbers, human figures, animals and emblems. It offers an immediate reference point for the reader who has no information other than the visual representation of the mark on a piece of silver. On locating the mark in Volume I, the reader is directed to Volume II's coverage of the country or countries that use this symbol.

VOLUME II

Volume II lists marks by continent and country of origin, including marks from towns, cities and centres of assaying or marking; date letters; silver standard marks; special marks (such as import/export marks) and 'selected makers' marks. Historical overviews at the beginning of each country provide essential background information.

Other features include:

- An overview of assaying and the hallmarking process
- How to identify fake and forged marks
- A review of silver standards
- Maps showing key hallmarking centres
- An extensive bibliography
- A directory of international silver societies, major museum collections and assay offices
