Helen A. Archdale, Margaret Haig Thomas Mackworth (Viscountess Rhondda)

## **Millionth Chance The Story Of R101:**

The Millionth Chance James Leasor, 2015-11-21 The R101 airship was thought to be the model for the future an amazing design that was as safe as houses except for the millionth chance On the night of 4 October 1930 that chance in a million came up however James Leasor brilliantly reconstructs the conception and crash of this huge ship of the air with compassion for the forty seven dead including a cabinet minister and only six survivors. One of the biggest disasters of British aviation history which marked the end of commercial airships as a serious form of transport this book also reads as a textbook of how state attempts to manage commercial ventures so often end in a disaster of one kind or another The Millionth Chance James Leasor, 2001 Harnessing the Power of Failure John Steven Newman, Stephen M. Wander, 2018-09-13 In this book the authors employ the SFCS approach to explore a vast array of failure events in multiple sectors of transportation industry aerospace construction and critical infrastructure The Millionth Chance James His Majesty's Airship S C Gwynne, 2024-05-21 The tragic story of the British airship R101 which went down in a spectacular hydrogen fueled fireball in 1930 killing more people than died in the Hindenburg disaster seven years later has been largely forgotten In His Majesty's Airship historian S C Gwynne resurrects it in vivid detail telling the epic story of great ambition gone terribly wrong Airships those airborne leviathans that occupied center stage in the world in the first half of the twentieth century were a symbol of the future R101 was not just the largest aircraft ever to have flown and the product of the world's most advanced engineering she was also the lynchpin of an imperial British scheme to link by air the far flung areas of its empire from Australia to India South Africa Canada Egypt and Singapore No one had ever conceived of anything like this R101 captivated the world There was just one problem beyond the hype and technological wonders these big steel framed hydrogen filled airships were a dangerously bad idea Gwynne's chronicle features a cast of remarkable and often tragically flawed characters including Lord Christopher Thomson the man who dreamed up the Imperial Airship Scheme and then relentlessly pushed R101 to her destruction Princess Marthe Bibesco the celebrated writer and glamorous socialite with whom he had a long affair and Herbert Scott a national hero who had made the first double crossing of the Atlantic in any aircraft in 1919 eight years before Lindbergh s famous flight but who devolved into drink and ruin These historical figures and the ship they built flew and crashed come together in a grand tale that details the rocky road to commercial aviation written by one of the best popular historians writing today **Imagined Worlds** Freeman J. Dyson, 1998 Imagine a world where whole epochs will pass cultures rise and fall between a telephone call and the reply Think of the human race multiplying 500 million fold or evolving new distinct species Consider the technology of space colonization computer assisted reproduction the Martian potato One hundred years after H G Wells visited the future in The Time Machine Freeman Dyson marshals his uncommon gifts as a scientist and storyteller to take us once more to that ever closer ever receding time to come Since Disturbing the Universe the book that first brought him international renown Freeman Dyson has been helping

us see ourselves and our world from a scientist's point of view In Imagined Worlds he brings this perspective to a speculative future to show us where science and technology real and imagined may be taking us The stories he tells about Napoleonic versus Tolstoyan styles of doing science the coming era of radioneurology and radiotelepathy the works of writers from Aldous Huxley to Michael Crichton to William Blake Samuel Gompers and the American labor movement come from science science fiction and history Sharing in the joy and gloom of these sources Dyson seeks out the lessons we must learn from all three if we are to understand our future and guide it in hopeful directions Whether looking at the Gaia theory or the future of nuclear weapons science fiction or the dangers of science worship seagoing kayaks or the Pluto Express Dyson is concerned with ethics with how we might mitigate the evil consequences of technology and enhance the good At the heart of it all is the belief once expressed by the biologist I B S Haldane that progress in science will bring enormous confusion and misery to humankind unless it is accompanied by progress in ethics **Special Bibliographic Series** US Army Military History Research Collection, 1978 Imagined World Freeman Dyson, 1999 God Save the Oueen US Army Military History Institute, Lawrence James-Alexander Lentz, 1979 **Transports of Delight** Peter Hancock, 2017-05-11 This inspiring book shows how the spiritual side of life with its thoughts feelings and aspirations is intimately bound up with our material technologies From the wonder of Gothic Cathedrals to the guiet majesty of lighter than air flight to the ultimate in luxury of the north Atlantic steamers Peter Hancock explores how these sequential heights of technology have enabled our dreams of being transported to new and uncharted realms to become reality Sometimes literally sometimes figuratively technology has always been there to make material the visions of our imagination This book shows how this has essentially been true for all technologies from Stonehenge to space station But technology is far from perfect Indeed the author argues here that some of the most public and tragic of its failures still remain instructive emblematic and even inspiring He reports on examples such as a Cathedral of the Earth Beauvais a Cathedral of the Seas Titanic and a Cathedral of the Air Hindenburg and tells their stories from the viewpoint of material transcendence By interweaving their stories he reveals how technologies can succeed in elevating human beings and in taking them to whole new realms of being he explores and explains why these experiences are Transports of Delight Time & Tide Helen A. Archdale, Margaret Haig Thomas Mackworth (Viscountess Rhondda), 1957

Transforming the Skies Peter Reese,2018-02-16 Following the Armistice of 1918 the British Air Industry and the newly founded RAF held a low place in national priorities The RAF was rapidly run down with the infant airlines being given the least possible help and this neglect continued during the 1920s The RAF s role was questioned and civilian air travel remained a dream for most and the province of the well heeled few But the breakdown of the Geneva Disarmament Talks led to renewed interest in the National Air Force and the rise of the European dictators brought calls for rapid modernisation and interceptor aircraft together with the development of further European civilian air routes Here Peter Reese charts the dramatic changes that swept aviation across the dynamic interwar period revealing the transformative last minute

preparations for defence in a world where much depended on the contributions of some outstanding individuals Special Bibliography. Who Killed Sir Harry Oakes? James Leasor, 2001-02-15 James Leasor cleverly reconstructs events surrounding a brutal and unusual murder It is 1943 and Sir Harry Oakes lies horrifically murdered at his Bahamian mansion Although a self made multi millionaire Sir Harry is an unlikely victim there are no suggestions of jealousy or passion Why did the Duke of Windsor then Governor of the Bahamas call in the Miami police rather than Scotland Yard Leasor makes the daring suggestion that Sir Harry Oakes murder the burning of the liner Normandie in New York Harbour in 1942 and the Allied landings in Sicily are all somehow connected The story has all the right ingredients rich occupants of a West Indian tax haven corruption drugs the Mafia and a weak character as governor Daily Mail The Enigma of Survival Hornell The Economist ,1982 The Red Fort James Leasor, 2014-10-20 A year after the Crimean War ended an Hart, 1959 uprising broke out in India which was to have equal impact on the balance of world power and the British Empire's role in world affairs The revolt was against the East India Company which not entirely against its will had assumed responsibility for administering large parts of India The ostensible cause of the mutiny sprang from a rumour that cartridges used by the native Sepoy troops were greased with cow s fat and pig s lard cows being sacred to the Hindus and pigs abhorred by the Mohammedans But the roots of the trouble lay far deeper and a bloody and ineptly handled war ensued The Red Fort is a breathtaking account of the struggle with all its cruelties blunderings and heroic courage When peace was finally restored the India we know today began to emerge This is a battle piece of the finest kind detailed authentic and largely written from original documents Never has this story of hate violence courage and cowardice been better told The New York Times

Boarding Party James Leasor,2011-04-25 Filmed as The Sea Wolves this is the story of the undercover exploit of a territorial unit The Germans had a secret transmitter on one of their ships in the neutral harbour of Goa Its purpose was to guide the U boats against Allied shipping in the Indian Ocean There seemed no way for the British to infringe Goa s Portuguese neutrality by force But the transmitter had to be silenced SOE was tasked with dealing with the problem but how Then it was remembered that 1 400 miles away in Calcutta was a source of possible help A group of civilian bankers merchants and solicitors were the remains of an old territorial unit called The Calcutta Light Horse With a foreword by Earl Mountbatten of Burma Daily Mirror One of the most decisive actions in World War II was fought by fourteen out of conditions middle aged men sailing in a steam barge New York Times Book Review Mr Leasor's book is truth far more engrossing than fiction A gem of World War II history National Union Catalog ,1956 Includes entries for maps and atlases Rudolf Hess James Leasor,2001 All true stories easy to read fast paced with high amounts of heroism many based on World War II New jackets author interviews and tour and major P R activity
