Virginia Woolf and the Power of Story Linda Nicole Blair,2017-03-14 From novels to films our everyday lives are filled with stories that comfort and connect us and enable new ways of thinking One of the most innovative writers in modern history Virginia Woolf changed the landscape of fiction and challenged our notions of what it means to be human Her novels invite readers to envision a world in which stories have the power to effect positive change This book explores the phenomenon of Story as practiced by Woolf interpreting her work in the context of literary Darwinism a critical approach focusing on patterns of innate human behavior

Memoirs of Well-Being Tanja Reiffenrath,2016-05-15 As the body politics of life writing in the United States change illness and disability memoirs receive considerable attention Although these narratives are framed by a lack of health they abundantly present health and do so beyond its binary relationship to the pathological This book departs from previous scholarship by bringing into focus the writers representations of cure recovery and healing as well as their reluctance to bring closure to their narratives and align their stories with traditional notions of health These memoirs thus partake in the construction of alternative narratives of illness and disability

Routledge Handbook of Behavioral Economics Roger Frantz,Shu-Heng Chen,Kurt Dopfer,Floris Heukelom,Shabnam Mousavi,2016-08-05 There is no doubt that behavioral economics is becoming a dominant lens through which we think about economics Behavioral economics is not a single school of thought but representative of a range of approaches and uniquely this volume presents an overview of them The wide spectrum of international contributors each provides an exploration of a central approach aspect or topic in behavioral economics Taken together the whole volume provides a comprehensive overview of the subject which considers both key developments and future possibilities Part One presents several different approaches to behavioural economics including George Katona Ken Boulding Harvey Leibenstein Vernon Smith Herbert Simon Gerd Gigerenzer Daniel Kahneman and Richard Thaler This section looks at the origins and development of behavioral economics and compares and contrasts the work of these scholars who have been so influential in making this area so

prominent Part Two presents applications of behavioural economics including nudging heuristics emotions and morality behavioural political economy education and economic innovation The Routledge Handbook of Behavioral Economics is ideal for advanced economics students and faculty who are looking for a complete state of the art overview of this dynamic field

Reading Human Nature Joseph Carroll,2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach Reading Human Nature contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including The Picture of Dorian Gray Wuthering Heights The Mayor of Casterbridge and Hamlet Evolutionists in the social sciences have succeeded in delineating basic motives but have given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature Why the Humanities Matter Frederick Luis Aldama,2022-02-24 This wide ranging study of the influence of postmodernism on contemporary culture offers a trenchant and uplifting defense of the humanities Is there life after postmodernism Many claim that it sounded the death knell for history art ideology science possibly all of Western philosophy and even the concept of reality itself Responding to essential questions regarding whether the humanities can remain politically and academically relevant amid this twenty first century uncertainty Why the Humanities Matter offers a guided tour of the modern condition calling upon thinkers in a variety of disciplines to affirm essential concepts such as truth goodness and beauty Through a lens of new humanism Frederick Aldama provides a liberating examination of the current cultural repercussions of assertions by such revolutionary theorists as Said Foucault Lacan and Derrida as well as Latin Americanists such as Sommer and Mignolo Emphasizing pedagogy and popular culture with equal verve Aldama presents an enlightening way to explore what culture actually does who generates it and how it shapes our identities and the role of academia in sustaining it Knowing Animals Laurence Simmons,Philip Armstrong,2007 Drawing on a range of perspectives philosophy literary criticism art history and cultural studies the essays collected here explore unconventional ways of knowing animals offering new insights into apparently familiar relationships between humans and other living beings *Encyclopedia of Literature and Science* Pamela Gossin,2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they are different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a

tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

After Poststructuralism Nancy Easterlin,Barbara Riebling,1993 After Poststructuralism Interdisciplinary and Literary Theory challenges the premises of and suggests new alternatives to the more extreme approaches in current literary theory The essays collected here examine the trend of theorizing in interdisciplinary studies from the perspective of more rigorous research methodologies with the aim of establishing the validity of interdisciplinary literary studies and broadening the field of inquiry The collection is divided into three groups The first examines the question of what interdisciplinarity has meant in literary studies in the last twenty years the reasons for its ascension as a trend and the inherent theoretical flaws in certain poststructuralist positions The second explores the relationship of theory and practice while the third group looks ahead to the rich possibilities for thinking and working in practical new directions **Biopoetics** Brett Cooke,Frederick

Mimesis as Make-Believe Kendall L. Walton, 1990 Representations in visual arts and fiction play an important part in our lives and culture Walton presents a theory of the nature of representation which shows its many varieties and explains its importance His analysis is illustrated with examples from film art literature and theatre
