Marris,1996-10-17 The outstanding moral problem of our time is the emergence of an underclass provoking both pity and an angry political backlash Robin Marris finds that a slowdown in growth is the root cause leading to a collapse of the labour market for unskilled men in particular Fashionable solutions such as lower wages or welfare reform benefit those already well off and exacerbate growing income inequality He employs statistical sociological and psychological analysis and new developments in brain science to show how the creation of an open society with increased equality of opportunity risks creating an unnecessarily excessive meritocracy The solution is restoring national and international priority to the objective of growth If this fails damage limitation is essential We must learn to live with the welfare state **Harry**

educate for responsibility Using an interdisciplinary scientific approach this book dissects the functioning of the ego that is to say the belief in a self an illusion that causes disharmony After an original modeling of the notion of responsibility the author deduces that it is incumbent on all of us to become aware of the relationship between our own minds and the world Thus gaining consistency and awareness everyone would have the potential to free themselves from the illusion of the ego and contribute to a more harmonious world This book therefore proposes psychospiritual skills favored in particular by different forms of reflexivity and by meditation and mindfulness which can serve as a basis for a curriculum to educate for responsibility This academic connection between meditation and ethics is a major innovative contribution Am I Normal?
