## **Mind Fields:**

Starstruck Albert A. Harrison, 2007 We live in an era of exploding scientific knowledge about the universe and our place and future within it Much of this new knowledge conflicts with earlier wisdom and some has frightening implications Cosmic evolution space exploration the search for extraterrestrial life and concerns about humanity's future prompt us to seek new answers to old existential questions Where did we come from Why are we here Are we alone What will become of us In our search for answers we turn to science religion myth and varying combinations thereof Exploring an ambiguous region between recognized findings and unfettered imagination Starstruck explores the multifaceted far reaching and often contentious attempts of people with contrasting worldviews to develop convincing and satisfying interpretations of rapidly accumulating discoveries in physics astronomy and biology

Sacred Places James Swan, 1990-04 This book explores the age old relationship between human beings and the living ecology

**The Art of Conscious Creation** Jackie Lapin, 2007 This compelling book reveals the 25 Universal Guiding Principals that lead to a happier more fulfilling prosperous and struggle free life

**Twenty-six Additional Scientific Papers and Philosophical Essays That Will Eventually Compel Scholars to Rethink the World** Daniel Zanou, 2024-01-08 This compilation of twenty six scientific papers and philosophical essays expands the mind body problem of the French philosopher and mathematician Ren Descartes We expose the nature of consciousness we discuss its origin and manifestations in living organisms We distinguish it from life and elaborate on human existence on Earth From there we solve the ancient enigma posited by Epicurus the Greek philosopher In science we take over Schrodinger's works on the body's entropy and use the research of the Japanese Nobel laureate Yoshinori Ohsumi to explain how non living atoms transition to living molecules Francis Crick's faded dream that becomes reality We delve into the living organisms to explain various losses of consciousness and awareness including

sleep syncope and death We mainly focus on sleep to elucidate this mystery that no living organisms escape

Tranceformers Shamans of the 21st Century John Jay Harper, 2009 Tranceformers Shamans of the 21st Century is the true story of this author's contact with a dead optics physicist colleague and the telepathic communication that sent him searching for scientific answers to his spiritual questions Harper draws from this deep well of wisdom astrology biology near death experiences paranormal psychology quantum physics as well as Egyptian and Mayan cosmology overall He does an excellent job of synthesizing massive amounts of information making this shift of the ages comprehensible to the general reader Clearly this is a necessary primer to understand the coming apocalypse of biblical proportions in consciousness climate culture and civilization However the theme of this book is that by learning to use trance the techniques employed by mystics prophets and shamans one can unlock the mysteries of existence for themselves Indeed this is the big idea behind the Eternal Return of the Sun of God in 2012 Self Empowerment      *The Great Cosmic Sea of Reality* Timothy Fulton Johns, 2018-03-06 In this book I will attempt to explain very difficult concepts that do in fact have the foundation of scientific studies over several decades The paper will explain how the work of several scientists have put different pieces of the puzzle in place but presumably none of them individually was able to see the bigger picture their piece of the puzzle reveals This book will explain how the evolution of our planet and its biosphere which has been well established is linked and actively evolving with our cosmos through a complex network of powerful morphic fields at all scales The Earth like the nucleus of an atom exists within the cosmos both at different scales however both are seemingly adrift in an abyss of the cosmic sea under its control and both are a very small part of a much larger evolutionary process of our reality yet in constant motion I will share intuitive ideas or theories that I believe best explain the known facts proven by scientific evidence of the nature of the fabric of our cosmic sea in which we coexist with one another and other worlds both terrestrial and extraterrestrial      **Little Painted Eagle and The Teaching Rocks** Larry Busch, 2025-08-22 Little Painted Eagle and The Teaching Rocks A Journey of Self Discovery is a free verse poem about a young mixed blood European and Indigenous male who during a solo canoe trip discovers hundreds of petroglyphs and pictographs By accident he incites the petroglyphs to dance He commits a grave error by making a rubbing and taking it home It won't dance He returns to the native community of his youth and asks his elders for help He returns to the petroglyph site to make amends and almost dies in the process With the aid of his grandmother's spirit he communicates with many powerful petroglyph and pictograph spirits His native spirit is rekindled as each imparts their particular wisdom The spirits lead him to previously unknown historical sites around the Great Lakes as he unravels his band's history of culture and war This story will attract the attention of native and non native readers It will generate interest into native petroglyphs and pictographs at home and around the world The story will enhance and rekindle interest and education into native spiritual beliefs      **The Physical Nature of Consciousness** Philip Van Looke, 2001-04-12 The Physical Nature of Consciousness contains twelve chapters that discuss recent and new perspectives

on the relation between modern physics and consciousness Stuart Hameroff opens with an extended and updated exposition of the Penrose Hameroff Orch OR model and subsequently addresses recent criticisms of quantum approaches to the brain Evan Walker presents his view on consciousness from the perspective of a new approach to the integration of quantum theory and relativity Friedrich Beck elaborates on the Beck Eccles quantum approach to consciousness Karl Pribram puts the holographic view on consciousness in perspective of his life long work Peter Marcer and Edgar Mitchell explain the relevance of quantum holography for consciousness Gordon Globus discusses the relation between postmodern philosophical theories and quantum consciousness Chris Clarke develops a theory in terms of a specific type of formal logic to reconcile the phenomenology of consciousness with the physical world Ilya Prigogine summarizes his view on complexity and on the future of quantum theory which goes beyond the present formalism and goes on to comment on the problem of consciousness Matti Pitkanen identifies the place for consciousness in a unifying topological geometrodynamics theory Colin McGinn argues against classical materialism Dick Bierman gives an overview of anomalous phenomena He identifies a decline effect and discusses different possible interpretations Philip Van Loocke closes the volume with a discussion on how deep teleology in cellular systems may relate to consciousness

**Series A** *Som* Tom Chesters, 2024-07-24 *Som* an acronym for Speculations on mind is a speculative theory of the fundamental physiological structure and operational nature of a mind After the essential background information and basic premises of *Som* are given the theory is progressively developed to attempt to account for the manifestation of subjective feelings awareness consciousness sensory and mental qualia personness thought and reasoning processes memory imagination dreams moods emotions and numerous other diverse phenomena within our own personal reality *Som* has been additionally provided with a brief addendum titled *Sor* an acronym for Speculations on reality *Sor* considers the question of whether or not there might be an existent underlying supersensible reality which is possibly causal to the subsistence of our spatiotemporal continuum and so ourselves If you choose to travel into and through the imaginary realms of *Som* and *Sor* you will likely realize at the end of your journey that you have gone full circle and so returned to exactly where you started within yourself but then having a new and perhaps unforeseen ability to view your personal reality in a wholly different and surprisingly practical way

**Ghosts of Atlantis** J. Douglas Kenyon, 2021-03-30 Reveals evidence of advanced ancient technology anomalous ancient maps time travel crystal science ancient Armageddon and Atlantis in the Bible Explores the true age of the Sphinx the Stone Age high tech found at Gobekli Tepe the truth of Rapa Nui Easter Island the Zep Tepi monuments of Egypt the mysteries of the Gulf of Cambay and what lies beneath the ice of Antarctica Examines the advanced knowledge of the ancients and how the search for Atlantis and other lost worlds reflects the search for the lost soul of humanity We live within the ruins of an ancient civilization whose vast size has rendered it invisible Remembered in myth as Atlantis Lemuria or other lost world archetypes the remains of this advanced civilization have lain buried for millennia beneath the deserts and oceans of the world leaving us many mysterious and inexplicable clues

Investigating the perennial myth of a forgotten fountainhead of civilization J Douglas Kenyon presents extensive physical and spiritual evidence of a lost great culture the collective amnesia that wiped it from planetary memory and the countless ways ancient catastrophes still haunt modern civilization He explores evidence of advanced ancient technology anomalous ancient maps extraterrestrial influence time travel crystal science and the true age of the Sphinx He examines evidence of Atlantis in the Bible and ancient Armageddon the Stone Age high tech found at Gobekli Tepe the truth of Rapa Nui Easter Island the Zep Tepi monuments of Egypt the mysteries of the Gulf of Cambay and what lies beneath the ice of Antarctica He looks at extinction events Earth's connection with Mars and how our DNA reveals that humanity has had enough time to evolve civilization and lose it more than once Exploring the advanced esoteric and spiritual knowledge of the ancients Kenyon shows that the search for Atlantis and other lost worlds reflects the search for the lost soul of humanity Drawing upon Velikovsky's notion of a species wide amnesia caused by the trauma of losing an entire civilization he reveals how the virtual ruins of a lost history are buried deep in our collective unconscious constantly tugging at our awareness As Kenyon reveals by overcoming the Great Forgetting humanity can find its way out of the haunted labyrinth in which we find ourselves lost today and rediscover the heights of spiritual and technological advancement of our ancient ancestors [The Linguistics Wars](#) Randy Allen Harris, 2021-09-13 An updated and expanded history of the field of linguistics from the 1950s to the current day The Linguistics Wars tells the tumultuous history of language and cognition studies from the rise of Noam Chomsky's Transformational Grammar to the current day Focusing on the rupture that split the field between Chomsky's structuralist vision and George Lakoff's meaning driven theories Randy Allen Harris portrays the extraordinary personalities that were central to the dispute and its aftermath alongside the data technical developments and social currents that fueled the unfolding and expanding schism This new edition updated to cover the more than twenty five years since its original publication and to trace the impact of that schism on the shape of linguistics in the twenty first century is essential reading for all those interested in the study of language the making of knowledge and some of the most brilliant minds of our era

**Collaborative Autoethnography** Heewon Chang, Faith Ngunjiri, Kathy-Ann C Hernandez, 2016-06-16 A practical guide providing researchers with a variety of data collection analytic and writing techniques to conduct collaborative autoethnography projects *The Living Classroom, Second Edition* Christopher M. Bache, 2024-12-01 A pioneering work in teaching and transpersonal psychology The Living Classroom explores the dynamics of collective consciousness in the classroom In this second edition Bache has in his own words come out of the psychedelic closet speaking candidly about the role that psychedelics played in the development of his integral holistic pedagogy Combining scientific research with personal accounts collected over thirty years Bache examines the subtle influences that radiate invisibly around teachers as they work unintended cognitive resonances that spring up between teachers and students in the classroom While these kinds of synchronistic connections are often overlooked by traditional academics Bache demonstrates that they occur too

frequently and are too pointed to be dismissed as mere coincidence Drawing upon Rupert Sheldrake's theory of morphic fields Bache proposes that well taught courses generate learning fields around them forms of collective consciousness that can trigger new insights and startling personal transformations Moving beyond theory this book is rich with student stories and offers practical hands on strategies for teachers who want to begin working with these learning fields to take their teaching to a more conscious level      *Introduction to Parapsychology* William Flexner,2004      *The Soul Hypothesis* Mark C. Baker,Stewart Goetz,2010-12-16 What do we mean when we speak about the soul What are the arguments for the existence of the soul as distinct from the physical body Do animals have souls What is the difference between the mind and the soul The Soul Hypothesis brings together experts from philosophy linguistics and science to discuss the validity of these questions in the modern world They contend that there is an aspect of the nature of human beings that is not reducible to the matter that makes up our bodies This perspective is part of a family of views traditionally classified in philosophy as substance dualism and has something serious in common with the ubiquitous human belief in the soul The Soul Hypothesis presents views from a range of sciences and the resulting big picture shows more clearly than could a single author with one area of expertise that there is room for a soul hypothesis      *Information Dynamics in Cognitive, Psychological, Social, and Anomalous Phenomena* Andrei Y. Khrennikov,2013-06-29 In this book we develop various mathematical models of information dynamics I dynamics including the process of thinking based on methods of classical and quantum physics The main aim of our investigations is to describe mathematically the phenomenon of consciousness We would like to realize a kind of Newton Descartes program corrected by the lessons of statistical and quantum mechanics for information processes Starting from the ideas of Newton and Descartes in physics there was developed an adequate description of the dynamics of material systems We would like to develop an analogous mathematical formalism for information and in particular mental processes At the beginning of the 21st century it is clear that it would be impossible to create a deterministic model for general information processes A deterministic model has to be completed by a corresponding statistical model of information flows and in particular flows of minds It might be that such an information statistical model should have a quantum like structure      *The Mystery of Reality* Christopher G. Smith,2012-12-01 This book is life changing and will challenge your concept of who you are One of the aims of *The Mystery of Reality* is to explore the concept of what it means to be a self This is a process that is far from straightforward and is paradoxical When you become aware of the issues that affect the concept of a self you come to realise that life can be lived from two perspectives that may be viewed as authentic or inauthentic Authentic living can be achieved through a process of faith which may be viewed as a commitment to what is of ultimate concern This is embryonic within the timeless spiritual reality we call love that seeks expression psychophysically within the context of everyday living in time and space This enables you to access the courage to be yourself However life is complex and reality is such that it is difficult to live permanently from a perspective that is completely authentic Distinguished authors

such as Richard Dawkins and Sam Harris have published books in recent years with the specific purpose of promoting atheism and denigrating religious faith as an irrational process. Whilst acknowledging many of the arguments that they make in challenging the concept of a theistic God, this book makes a case for religious faith that is not based on theistic beliefs, does not rely on revealed truth and is consistent with current scientific thinking about the nature of the universe. It is a radical approach which combines the eastern concept of the selflessness of consciousness with the western concept of faith as ultimate concern. *The Mystery of Reality* seeks to establish a rational foundation for religious faith that makes it intelligible to people living in the twenty-first century. It addresses issues which are of fundamental importance to our happiness and the way life is lived.

**Psychosocial Theories of Human Behavior and Development** Timothy Page, 2024-08-20. *Psychosocial Theories of Human Behavior and Development: An Evolution of Big Ideas* is about the major psychosocial theories of human development that were created in the 20th century, drawing from the diverse disciplines of developmental psychology, psychiatry, cognitive science, social psychology, sociology, ethology, and neuroscience. A central focus concerns the components of psychological and social development that motivate and influence human behavior over the lifespan. The evolution of the major ideas over time, their integration, and the ways in which their emergence was shaped by their mutual influences is emphasized throughout. Several integrative themes are used to provide linkages and contexts for the emergence of the theories, particularly the social influences on scientific discoveries, the integrative theoretical framework from the National Research Council referred to as the transactional ecological model, and an emphasis on the historical evolution of the sources of knowledge on which the theories were based. A major goal of the book is to teach, in addition to the major concepts of growth and development, the historical scientific and social processes by which these organizations of concepts came into being. This integrative discussion creates important opportunities for more critical analysis and synthesis of ideas.

*Memories Don't Die* Vedah Sipe-Casella, 2005-11. As he is turning around, he hears a large explosion and turns back towards the street. For a minute, he can't believe what he is seeing. The car parked across the street is on fire, and Nancy is lying in the middle of the street. Pieces of the car are falling all around her. When computer analyst Nancy Turner is seriously injured in a car bomb explosion, she becomes lost in a world where there are no memories. As she tries to piece together her present with her past, she remembers nothing but realizes that she is in great danger. Thankfully, a friend and a local detective help her reclaim the life she lived before the explosion, one of secrecy in the witness protection program. As they delve into her past, more questions than answers surface. When the FBI and the Secret Service become involved, Nancy finds herself caught in the middle of a ruthless drug dealer and a traitorous group of counterfeiters. What kind of information does Nancy have that is making her such a hunted target?
