Education and Mind in the Knowledge Age Carl Bereiter,2005-04-11 In this book Carl Bereiter a distinguished and well known cognitive educational psychologist presents what he calls a new way of thinking about knowledge and the mind He argues that in today s Knowledge Age education s conceptual tools are inadequate to address the pressing educational challenges and opportunities of the times Two things are required first to replace the mind as container metaphor with one that envisions a mind capable of sustaining knowledgeable intelligent behavior without actually containing stored beliefs second to recognize a fundamental difference between knowledge building and learning both of which are essential parts of education for the knowledge age Connectionism in cognitive science addresses the first need certain developments in post positivist epistemology address the second The author explores both the theoretical bases and the practical educational implications of this radical change in viewpoint The book draws on current new ways of thinking about knowledge and mind including information processing cognitive psychology situated cognition constructivism social constructivism and connectionism but does not adhere strictly to any camp Above all the author is concerned with developing a way of thinking about the mind that can usher education into the knowledge age This book is intended as a starting point

Plato's Individuals Mary Margaret McCabe,2020-10-06 Contradicting the long held belief that Aristotle was the first to discuss individuation systematically Mary Margaret McCabe argues that Plato was concerned with what makes something a something and that he solved the problem in a radically different way than did Aristotle McCabe explores the centrality of individuation to Plato s thinking from the Parmenides to the Politicus illuminating Plato s later metaphysics in an exciting new way Tradition associates Plato with the contrast between the particulars of the sensible world and transcendent forms and supposes that therein lies the center of Plato s metaphysical universe McCabe rebuts this view arguing that Plato s thinking about individuals which informs all his thought comes to focus on the tension between generous or complex individuals and austere or simple individuals In dialogues such as the Theaetetus and the

Timaeus Plato repeatedly poses the question of individuation but cannot provide an answer Later in the Sophist the Philebus and the Politicus Plato devises what McCabe calls the mesh of identity an account of how individuals may be identified relative to each other The mesh of identity however fails to explain satisfactorily how individuals are unified or made coherent McCabe asserts that individuation may be absolute and she questions philosophy's longtime reliance on Aristotle's solution

Rainbow Streams Chandan Sengupta, Elders often instruct us to say pleasant words for implying positive impressions in the minds of listeners We often try to speak on any assigned topic in public places That time we often forget about the mind set of listeners and their baselines of knowledge These factors often determine their levels of participation in the assembly If we want people to listen us then we also make ourselves fit for gaining enough capabilities of listening others Listening and being listened will create a vibrant bond of human relationships through which knowledge starts flowing This collection will enable learners and fellow aspirants to reallocate their skills and competences which enable them to gain some higher levels of confidence Waves of thought and admiration are nothing but a band of participatory bliss which ensures our process of socialisation It also enhances the participatory skill of the individual taking part in the society We will sum up our approach with an aspiration of offering the fellow reader a scope of personal advancement through sharing some of the golden moments and collectibles from treasure of olden times We also offer a band of such collections for the purpose of providing background study materials meant for skill acquisition in terms of language It is true that we all rely upon elders for gaining basic facilities required for accelerating our pace of learning In certain contexts we expect some more resources and additional instruments for gaining skills of our desired types We also expect participation of people of the surrounding This collection has incorporated different titles with an objective of providing some timely relevant information as well as creative efforts of various types These works are of special types because of the active involvements of the fellow aspirants These works must inspire readers and make them positively motivated to deliver their efforts efficiently in due course of time for gaining desired skills We also expect active participation of fellow parents in making these efforts more result oriented
