Mind Of An Addict:

Healing the Addicted Brain Harold Urschel M.D., 2009-04-01 The New York Times bestselling book offering a breakthrough scientific approach and treatment to conquering addiction and substance abuse Addiction is not a moral failing or a lack of willpower It is a disease of the brain that must be treated like any other chronic medical illness Healing the Addicted Brain by Dr Harold Urschel a board certified physician on addiction and founder of the Urschel Science Recovery Institute combines the best behavioral addiction treatments with the latest scientific research on brain function providing tools and strategies designed to overcome the biological factors that cause addictive behavior This proven approach triples the success rate of patients from 30% to 90% for those who seek help You will learn how to Combat triggers and cravings Deal with difficult emotions Handle dual diagnoses Communicate with family Achieve health and nutrition in recovery Regain enjoyment and pleasure Maintain long term recovery Whether you or a family member or friend suffer from addiction Healing the Addicted Brain offers you a comprehensive look at the new understanding of addiction and will arm you with the latest treatment information and ideas to beat this disease and achieve sobriety Scientifically based approaches that recognize the biological basis of addiction have brought major advances in the treatment of addiction Dr Urschel is at the forefront of this treatment paradigm Dr Larry Hanselka psychologist *Narratives of Addiction* Kevin McCarron, 2022-01-03 *Narratives of Addiction* Savage Usury is the first book to argue in the face of more than a century's received wisdom that drug addiction and alcoholism are undoubtedly evidence of individual moral flaws However the sense of morality that underlies this book is completely severed from Christianity Instead it is influenced in particular by the writings of the nineteenth century German philosophers Arthur Schopenhauer and Frederick Nietzsche both of whom insisted that a genuine morality was actually incompatible with Christianity The sequence of chapters moves from addictions on the streets into rehab clinics and finally into the meetings of Alcoholics Anonymous and Narcotics Anonymous This is the first book to argue that the search for pleasure drives alcoholism and drug addiction and not the numbing of pain Throughout the book I reject the claims of the medical profession as embodied by the American Medical Association that drug addiction and alcoholism are diseases and further argue that they do not have the authority to tell hundreds of millions of Americans that addiction is not a moral failing I also query throughout the book the claims of neuroscience psychology and the social sciences that addictions to alcohol and drugs are attributable to causes that their specific disciplines are best suited to understand I argue that there is nothing complex about addiction it is a simple behavioural disorder The language routinely employed to discuss addiction is similarly not complex just confused and so it is also the rhetoric of addiction discourse especially its use of simile metaphor and euphemism that this book evaluates **Ancient Sins . . . Modern Addictions** R. Scott Sullender, 2013-07-05 There is a virtual epidemic of addiction in the United States both traditional addictions to drugs and alcohol but also newer addictions like sex gambling rage work and food eating Some authorities have labeled addictions

the number one mental health problem in America We are spending millions of dollars annually trying to prevent understand and treat this epidemic and yet by any measure of success we are losing this war In this cultural context Dr Sullender invites us to look again at the spiritually based scheme of the Seven Deadly Sins which originated at the dawn of Western civilization He suggests that what our spiritual forebears meant by deadly is best captured in the modern concept of addiction Based on this thesis this book explores what is addictive about the sins of pride envy anger greed gluttony sloth and lust and suggests that these sins are all obsessive and as such become the mental component in the addictive cycle Each chapter concludes by offering some spiritual resources practices and insights that can help us win the battle against addiction which is ultimately won or lost on a mental or spiritual plane

Ending Addiction for Good Richard Taite, Constance Scharff, 2012-11 There is hardly a family in the post industrial world that hasn't been affected in some way by addiction Yet seeking treatment for a struggling loved one is for most people a frightening and overwhelming prospect Ending Addiction for Good offers a powerful message of hope Drawing on their own histories of addiction recovery authors Taite and Scharff examine the unique and highly successful treatment protocol practiced at the Cliffside Malibu Addiction Treatment Center Using clear and direct language they look beyond the limits of conventional treatment to show how creating an individualized evidence based and integrated approach that targets the whole person mind body and spirit not just the addiction can provide a sure path to recovery In doing so they empower both the addict and the families of addicts to begin their recovery Ending Addiction for Good may well be the most important book dealing with alcoholism and drug addiction to come along in years

In the Mind of an Addict Cynthia Williams, 2022-02-03 Sometimes life hits you like a ton of bricks Everyone deals with life's problems differently Some may use alcohol sex or shopping However my vice was drugs Nobody wakes up and says I want to be an addict but trust me every family or a family member has experienced it themselves Some families become enablers when they find out someone has an addiction and some are just downright cruel I just pray that this book helps someone or a family member to know what you are going through

Clinical Addiction

Psychiatry David Brizer, Ricardo Castaneda, 2010-09-16 Clinical Addiction Psychiatry is an anthology of essays that represent the most current and authoritative information now available on addiction theory practice and research covering dozens of provocative fascinating and essential subdomains of the field Each chapter is authored by a recognized authority in the field and detailed attention is paid to environment genetics culture and spirituality as well as treatment and pharmacology History street culture and medical science are brought together in masterful discussions that encompass the full spectrum of addictive disorders emphasizing assessment and clinical management This unique resource gathers complex medical and

scientific data in a way which is accessible to both health care professionals and readers without medical or psychology backgrounds Essential reading for addiction counselors and other mental health professionals this book will also be of interest to patients and their families and residents and physicians in all fields of medicine Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction **Addictions Counseling Today** Kevin Alderson, 2019-12-03 Focusing on the new DSM V classifications for addiction with an emphasis on CACREP neuroscience and treatment this provocative contemporary text is an essential reference for both students and practitioners wanting to gain a deeper understanding of those with addiction **Rewiring the Addicted Brain with EMDR-Based Treatment** Laurel Parnell, 2019-12-03 Attachment focused EMDR and resource tapping applied to the clinical challenge of addictions recovery Writing for both EMDR therapists and substance abuse counselors Laurel Parnell provides user friendly tools to help support clients in recovery with EMDR based techniques that can be easily integrated into all levels of addiction treatment Emphasizing the practical clinical application of principles and techniques helpful for addictions and addictive disorders this book interweaves case material throughout the text with some chapters presenting in depth cases to illustrate the techniques Topics include treating trauma and supporting resilience tools for affect regulation and rewiring the motivation reward circuits **The Self Psychology of Addiction and its Treatment** Richard B. Ulman, Harry Paul, 2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the

treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date
