Mind Of Egypt History And Meaning In The Time Of The Pharaohs:

The Mind of Egypt Jan Assmann, 2003 The Mind of Egypt presents an account of the mainsprings of Egyptian civilization the ideals values mentalities belief systems and aspirations that shaped the first territorial state in human history Drawing on a range of literary iconographic and archaeological sources Jan Assmann reconstructs a world of unparalleled complexity a culture that long before others possessed an extraordinary degree of awareness and self reflection The Mind of Egypt Jan Assmann, 2002 Renowned historian Jan Assmann traces the Egyptian civilization from its beginnings in the fifth millennium B C E until the rise of Christianity 4500 years later through the roles of the pharaohs priests and the imperial bureaucracy Most strikingly he focuses on the multiple notions of time the structures of immortality and the commitment to the principle of social justice and human fellowship during the time of ancient Egypt Originally published in Germany in 1996 under the title Agypten Eine Sinngeschichte **Egyptianizing Figurines from Delos** Caitlín Barrett, 2011-09-20 This book investigates Hellenistic popular religion through an interdisciplinary study of terracotta figurines of Egyptian deities mostly from domestic contexts from the trading port of Delos A comparison of the figurines iconography to parallels in Egyptian religious texts temple reliefs and ritual objects suggests that many figurines depict deities or rituals associated with Egyptian festivals An analysis of the objects clay fabrics and manufacturing techniques indicates that most were made on Delos Additionally archival research on unpublished notes from early excavations reveals new data on many figurines archaeological contexts illuminating their roles in both domestic and temple cults The results offer a new perspective on Hellenistic reinterpretations of Egyptian religion as well as the relationship between popular and official cults **The Oxford Handbook of Egyptology** Ian Shaw, Elizabeth Bloxam, 2020 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant Authoritative yet accessible it is an invaluable resource for scholars students and general readers alike **Heaven on Earth** Richard Landes, 2011-08-04 Millennialists through the ages have looked forward to the apocalyptic moment that will radically transform society into heaven on earth They have delivered withering critiques of their own civilizations and promised both the impending annihilation of the forces of evil and the advent of a perfect society And all their promises have invariably failed We tend therefore to dismiss these prophets of doom and salvation as crackpots and madmen and not surprisingly historians of our secular era have tended to underestimate their impact on our modern world Now Richard Landes offers a lucid and ground breaking analysis of this widely misunderstood phenomenon This long awaited study shows

that many events typically regarded as secular including the French Revolution Marxism Bolshevism Nazism not only contain key millennialist elements but follow the apocalyptic curve of enthusiastic launch disappointment and often catastrophic re entry into normal time Indeed as Landes examines the explicit millennialism behind such recent events as the emergence of Global Jihad since 1979 he challenges the common notion that modern history is largely driven by secular interests By focusing on ten widely different case studies none of which come from Judaism or Christianity he shows that millennialism is not only a cultural universal but also an extremely adaptive social phenomenon that persists across the modern and post modern divides At the same time he also offers valuable insight into the social and psychological factors that drive such beliefs Ranging from ancient Egypt to modern day UFO cults and global Jihad Heaven on Earth both delivers an eye opening revisionist argument for the significance of millennialism throughout history and alerts the reader to the alarming spread of these ideologies in our world today

Egypt, Ethiopia, and the Greek Novel Robert Cioffi, 2024 In this richly detailed study Robert Cioffi explores the significance of the Nile River Valley as the geographic centre of the ancient Greek novel during the genre's heyday in the Roman empire He shows how the region is repeatedly portrayed in these fictions as a dual site of ethnographic representation and of resistance to imperial power

The Religious Nile Terje Oestigaard, 2018-07-30 The Nile is arguably the most famous river in the world For millennia the search for its source defeated emperors and explorers Yet the search for its source also contained a religious quest a search for the origin of its divine and life giving waters Terje Oestigaard reveals how the beliefs associated with the river have played a key role in the cultural development and make up of the societies and civilizations associated with it Drawing upon his personal experience and fieldwork in Africa including details of rites and ceremonies now fast disappearing the author brings out in rich detail the religious and spiritual meanings attached to the life giving waters by those whose lives are so bound to the river Part religious quest part exploration narrative the author shows how this mighty river is a powerful source for a greater understanding of human nature society and religion

Archaeology of Empire in Achaemenid Egypt Colburn Henry P. Colburn, 2019-09-11 A study of the material culture of Egypt during the period of Achaemenid Persian rule c 526 404 BCE Provides a clear overview of the archaeological evidence for Achaemenid Egypt including temples tombs irrigation works statues stelae seals and coins Demonstrates how different types of evidence both textual and archaeological including material of uncertain provenance can be used to address a single historical question Offers critical discussion of the dating criteria used by archaeologists for Egyptian Late Period material Elucidates strategies used by the Persians to establish and maintain control of Egypt Examines how these strategies may have affected the lives of people living in Egypt during the 27th Dynasty Creates a new explanatory model for the introduction of coinage to ancient Egypt Previous studies have characterised Achaemenid rule of Egypt either as ephemeral and weak or oppressive and harsh These characterisations however are based on the perceived lack of evidence for this period filtered through ancient and modern preconceptions about the Persians Henry

Colburn challenges these views by assembling and analyzing the archaeological remains from this period including temples tombs irrigation works statues stelae sealings drinking vessels and coins By looking at the decisions made about material culture by Egyptians Persians and others it becomes possible to see both how the Persians integrated Egypt into their empire and the full range of experiences people had as a result

The Use of Documents in Pharaonic Egypt Christopher Eyre, 2013-10-31 This volume reconstructs the history of documentary practice in pharaonic Egypt from the early Old Kingdom to the major administrative changes imposed by the colonizing regimes of the Graeco Roman period Relating administrative and legal practice to the physical practicalities of the media used for writing and through the close reading of primary textual sources it examines how different types of documents private and official were created and used It explores the ways in which the writing of documents was embedded deeply in the interactions between customary social practices which were essentially oral and in the penetration of outside hierarchies into local government Eyre argues that the potential of the written document as evidence or proof was never fully exploited in the pharaonic period even though writing was a powerful symbol and display of hierarchical authority He presents the government as a system rooted in personal prestige and patronage structures lacking the effective departmental hierarchies and archive systems that would represent a true bureaucratic system

Egyptian Hieroglyphs in the Late Antique Imagination Jennifer Taylor Westerfeld, 2019-10-04 Throughout the pharaonic period hieroglyphs served both practical and aesthetic purposes Carved on stelae statues and temple walls hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient Egyptian visual culture For both the literate minority of Egyptians and the vast illiterate majority of the population hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible For nearly three thousand years the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity By the late antique period literacy in hieroglyphs had been almost entirely lost However the monumental temples and tombs that marked the Egyptian landscape together with the hieroglyphic inscriptions that adorned them still stood as inescapable reminders that Christianity was a relatively new arrival to the ancient land of the pharaohs In *Egyptian Hieroglyphs in the Late Antique Imagination* Jennifer Westerfeld argues that depictions of hieroglyphic inscriptions in late antique Christian texts reflect the authors attitudes toward Egypt's pharaonic past Whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge control over the representation and interpretation of hieroglyphic texts constituted an important source of Christian authority Westerfeld examines the ways in which hieroglyphs are deployed in the works of Eusebius and Augustine to debate biblical chronology in Greek Roman and patristic sources to claim that hieroglyphs encoded the mysteries of the Egyptian priesthood and in a polemical sermon by the fifth century monastic leader Shenoute of Atripe to argue that hieroglyphs should be destroyed lest they promote a return to idolatry She argues that in the absence of any genuine understanding of hieroglyphic writing late antique Christian authors were able to take this powerful symbol of

Egyptian identity and manipulate it to serve their particular theological and ideological ends

Capturing the Senses Giacomo Landeschi, Eleanor Betts, 2023-06-12 This open access book surveys how digital technology can contribute effectively to improving our understanding of the past through a sensory engagement based on the evidence of material culture In particular it encourages specialists to consider senses and human agency as important factors in studying ancient space while recognising the role played by digital tools in enhancing a human centred form of analysis Significant advances in archaeological computing digital methods and sensory approaches have led archaeologists to rethink strategies and methods for creating narratives of the past Recent progress in data visualisation and implementation as well as other nascent digital sensory methods means that it is now easier to explore and experience ancient space from a multiscale perspective from the individual body or single building to the wider landscape The chapters in *Capturing the Senses Digital Methods for Sensory Archaeologies* present innovative methods for representing an embodied experience of ancient space simulating but not recreating ancient behaviours and social interaction Chapters cover topics including the potentials and pitfalls of visualising recreating and re enacting experiencing the senses in Virtual Reality environments and also digital reconstructions and auralisations of ancient spaces to study sound sensory perception Overall the book demonstrates that multisensory approaches can give a new perspective on how ancient spaces were intended to be used by inhabitants to fulfil a series of purposes including conveying messages and regulating movement This is an open access book
