Practical Mind-Reading: A Course of Lessons on Thought-Transference, Telepathy, Mental-Currents, Mental Rapport, & c. William Walker Atkinson,1908-01-01 Mindreader Jerronime, Extraordinary unique story while reading it the readers hold their breath to find out what the main plot is for it is not as simple as it might seem level one Professor Valerii an acknowledged scientist and innovator loves his wife Tatiana He cannot just sit and watch her dying in front of his eyes while no one is able to diagnose the cause of her disease He embarks on an impossible quest to save her Alan loves Sonia at least so it appears Then why did he betray their love and use the invention of hers and Professor What is his intention Sonia is like a daughter to Professor and Tatiana They love her regardless that she had broken up with Misha their adoptive son Sonia loved Misha and could not bear that he left her for longing for his homeland She could leave with him but he did not want that And so she gave all her energy to her clinic and patients and of course to the research with Professor His revolutionary discovery is about to see the light of day very soon The USA giant Vesla longs for a new discovery Their scientist announced to come up with a unique device the Mindreader within ten years For Kurt Eden the main shareholder and president of the company it is hard to believe what a good luck came to them a discovery of a century came to them served on a silver plate and without waiting for a decade It does not take long and the dark clouds of uncertainty suspicion dirt and lies start to gather around this revolutionary patent Who can turn the tables Can it be another couple in love Thomas and Catherine It

might be considering that Cathy possesses the power to be immune to the Mindreader she knows the method of how to be unreadable Who murdered Alan's ex colleague And why Where is Alan And who has kidnapped Sonia Why does Kurt Eden want to stop the manufacturing Who was shooting at Professor and his wife Is humankind ready for such invention Mindreader has all the answers level two A well played game full of intrigues science medicine and health research love and betray full of lies and desire for power gained through the skill of controlling the human mind Money fame and power A slow start up to the sixth chapter gives room to introduce the creator of the revolutionary invention in the medicine field and to zoom in on his motivation his love that made him dive into such research and construct something like that The gradually built up story line interleaves the parts of how it all began with thrilling passages from present respectively future in a way that does not give a chance to see it coming what the plot is Some sort of unexpected strange twists and events which lead the story line towards some special and strong skills of other people At least that is how it looks on the surface The story of love of Professor a scientist started already in the past century and it is a true story As well as the medical invention CEM is real and has been used to this day As well as the entire story about the intrigues going hand in hand with inventing and patenting this device But all other events the further events heading to the future are a fiction Well a fiction which will highly likely happen in reality as well because rumour has it that the work on a similar invention is in progress somewhere The love couple Catherine and Thomas will bring us to meditations which appear as the only protection humankind has against the effect of this invention And how will the main protagonist Sonia handle the betrayal and violated trust The story line is interwoven by more threads of love which keep the readers from seeing where the story is heading and until the very last moment they will accuse someone to be main suspect someone completely else than All these original situations course the story at a brisk pace forward and bewilder the readers so that they are not sure whether they are reading a love story or a medical study about magically healed cases or a detective novel about the hunt for a thief of the license and even about a murder investigation Or maybe it is a sci fi story it seems so But it is not The story is real integrated compact and the Mindreader the revolutionary invention of the century is already in the air you can sense it It is close prowling for us and challenging us to get ready But how That all is to found out thanks to this book through this thrilling story that certainly is going to have a to be continued level three The plot stands on the already existing fact that in some countries a treatment using an innovative prototype is being practised On such principle the Mindreader is invented a machine intended to treat and heal people As it usually happens this patent is stolen and abused The line of events triggered by that together with the powerful tool that the Mindreader becomes and how effective it is in destroying humanity that all is uncovered in this book As the story is based on true events projects a real life of an inventor of the original healing tool prototype and through the theft of the patent and know how reveals astonishing secrets the whole book gives a very realistic sensation Moreover since all the thrilling twists and turns are happening through interpersonal interactions they point out the twists in love

relationships and clearly mirror the capability of the Mindreader to change people's behaviour and implement a desire for power and manipulation into them Partially it uncovers even the political and religious background and the power of a certain chosen group who is playing the big game with the events on Earth on this planet as if with some dolls puppets The plot touches the Sci Fi dimension here although the truth lies somewhere in between Yet it can be a foundation for the next story Mindreader II in which all the secrets about Earth and the elite in charge would be uncovered and which would reveal a catastrophe that the Mindreader can cause unless used correctly Protectors of course are on guard and nearby The story is situated in Ukraine the origin of the scientist later in Europe Berlin and Switzerland and then in the USA Secret Valley
