Rayess,2015-07-07 Magic realism science fiction and romance converge in a Lebanese author s novel about a woman s journey of the heart mind and soul Cassandra Kelly is still grappling with her mother s death Attending university has only made it more difficult for the shy and withdrawn Cassandra to cope She s ridiculed by one male student and all but invisible to the man she desires from afar Then Cassandra s life takes a startling turn when she plans to ends it Just as astonishing a woman named Julie suddenly awakens from a coma Cassandra awakens too But now Cassandra is seeing the world in a whole new light Through the eyes of a stranger Two souls have melded For Cassandra two lives must be led With her own mind and memories she s living in Julie s world now And it comes with Julie s problems including an impending marriage to the one man Cassandra can t abide What unbelievable secrets must she hide And which must she surrender to find the true love she s lived two lifetimes to call her own Future Minds Richard Yonck,2020-03-17 For readers of Michio Kaku and Stephen Hawking the book readers have acclaimed as A mega comprehensive outlook at intelligence as convincing as it is surprising and A truly breathtaking forecast on the future of intelligence With the ongoing advancement of AI and other

technologies our world is becoming increasingly intelligent From chatbots to innovations in brain computer interfaces to the possibility of superintelligences leading to the Singularity later this century our reality is being transformed before our eyes This is commonly seen as the natural result of progress but what if there s more to it than that What if intelligence is an inevitability an underlying property of the universe In Future Minds Richard Yonck challenges our assumptions about intelligence what it is how it came to exist its place in the development of life on Earth and possibly throughout the cosmos Taking a Big History perspective over the 14 billion years from the Big Bang to the present and beyond he draws on recent developments in physics and complexity theory to explore the questions Why do pockets of increased complexity develop giving rise to life intelligence and civilization How will it grow and change throughout this century transforming both technology and humanity As we expand outward from our planet will we discover other forms of intelligence or will we conclude we are destined to go it alone Any way we look at it the nature of intelligence in the universe is becoming a central concern for humanity Ours Theirs And everything in between Thoughts Vs A Mind Cosmas Mutwiwa,2012-08-22

who wrote about the end time were preachers the more fundamentalist the more extreme by some standards The end is coming soon they said and cartoons were rampant with guys carrying placards captioned by The End is Near From the time of Christ whose noncritical predictions included such inspiration for the placards the religious prophets could not resist emphasis on such topics Today things are different The scientists and politicians make the predictions Twelve More Years is what we hear from the latter But they don't attack with religious terms They speak of time in the context of climate change and global warming They do not agree on how to interpret the evidence but the religionists also had trouble with agreement Strange interpretations of biblical texts have now gone the way of so called science Various elucidations carry one thing in common none gain consensus Some arguments enter discussions by censuring those who disagree with them Their opponents are not allowed to speak They must remain silent They are called nasty names and unfair methods are used to punish them They try to stop the incongruous from speaking at all Living in the end time demonstrates the conflict between good and evil
