### **Mindreading Integrated Account Of Pretence Ocsc Oxf Cognitive Science Series:**

*Mindreading* Shaun Nichols, Stephen P. Stich, 2003 The everyday capacity to understand the mind or mindreading plays an enormous role in our ordinary lives Shaun Nichols and Stephen Stich provide a detailed and integrated account of the intricate web of mental components underlying this fascinating and multifarious skill The imagination they argue is essential to understanding others and there are special cognitive mechanisms for understanding oneself The account that emerges has broad implications for longstanding philosophical debates over the status of folk psychology *Mindreading* is another trailblazing volume in the prestigious interdisciplinary Oxford Cognitive Science series **Mindreading** Shaun & Stephen P. Stich Nichols, 2003 Mindreaders Ian Apperly, 2010-11-10 Theory of mind or mindreading as it is termed in this book is the ability to think about beliefs desires knowledge and intentions It has been studied extensively by developmental and comparative psychologists and more recently by neuroscientists and cognitive psychologists This book is the first to draw together these diverse findings in an account of the cognitive basis of theory of mind and establishes the systematic study of these abilities in adults as a new field of enquiry Apperly focuses on perceptions knowledge and beliefs as paradigm cases of mindreading and uses this as a basis from which more general lessons can be drawn The book argues that an account of the cognitive basis of mindreading is necessary for making sense of findings from neuroscience and developmental and comparative psychology as well as for understanding how mindreading fits more broadly into the cognitive system It questions standard philosophical accounts of mindreading and suggests a move away from the notion that it consists simply of having a theory of mind This unique study into the cognitive basis of mindreading will be ideal reading for academics and advanced students from the diverse disciplines that have studied theory of mind in particular and social cognition more generally
