more general level the essays contemplate the relationship between feminist and other critical approaches to legal theory the relationship between the ideas underlying feminist legal theory and those informing contemporary developments in social and political theory and the nature of the relationship between feminist legal theories and feminist legal politics The essays in this book tell the story of an intellectual journey which has led the author to question some of the central assumptions of traditional legal education and scholarship They also set out a distinctive vision of jurisprudence as a form of critical social theory

The Minds of the Moderns Janice Thomas, 2014-12-05 This is a comprehensive examination of the ideas of the early modern philosophers on the nature of mind Taking Descartes Spinoza Leibniz Locke Berkeley and Hume in turn Janice Thomas presents an authoritative and critical assessment of each of these canonical thinkers views of the notion of mind The book examines each philosopher s position on five key topics the metaphysical character of minds and mental states the nature and scope of introspection and self knowledge the nature of consciousness the problem of mental causation and the nature of representation and intentionality The exposition and examination of their positions is informed by present day debates in the philosophy of mind and the philosophy of psychology so that students get a clear sense of the importance of these philosophers ideas many of which continue to define our current notions of the mental Again and again philosophers and students alike come back to the great early modern rationalist and empiricist philosophers for instruction and inspiration Their views on the philosophy of mind are no exception and as Janice Thomas shows they have much to offer contemporary debates The book is suitable for undergraduate courses in the philosophy of mind and the many new courses in philosophy of psychology

The Mind-body Problem Explained Niall McLaren,2012-01-01 Dr Niall Jock McLaren is an Australian psychiatrist who uses philosophical analysis to show that modern psychiatry has no scientific basis This startling conclusion dovetails neatly with the growing evidence that psychiatric drug treatment is crude and damaging Needless to say this message is not popular with mainstream psychiatrists However in this book he shows how the principles of information processing give a formal theory of mind that generates a model of mental disorder as a psychological phenomenon

Anatomy of Spirituality: Portrait of the Soul Chander Behl,2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain s biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul
