Wildman, 2012-07-19 This trio of volumes contains essays that explore vital existential moral or metaphysical issues surrounding the relationship between the sciences and the world's religions In *Science and the World's Religions* experts with scientific and religious backgrounds explore vital existential or practical issues drawing on whatever sciences are relevant and engaging at least two religious traditions The multidisciplinary essays exhibit rigorous intellectual scholarly thinking but are written to clearly communicate to educated adult lay readers The first volume addresses questions about the origins and purpose of the cosmos and the human project The second volume investigates the roles of religion and spirituality in human existence considering issues ranging from the brain and religious experience to the human life cycle The third volume tackles controversies in which both religion and science are stakeholders showing how both can deepen understanding and enrich human experience Together these three books present readers with powerful tools that enable them to think through the challenge of integrating science with their religious beliefs and spiritual practices **The Joy of Religion** Ariel Glucklich, 2020-01-09 Using a psychological and historical approach the book describes the ways that religions deepen and prolong feelings of wellbeing *Believers:*

Faith in Human Nature Melvin Konner, 2019-09-10 An anthropologist examines the nature of religiosity and how it shapes and benefits humankind *Believers* is a scientist's answer to attacks on faith by some well meaning scientists and philosophers

It is a firm rebuke of the Four Horsemen Richard Dawkins Daniel Dennett Sam Harris and Christopher Hitchens known for writing about religion as something irrational and ultimately harmful Anthropologist Melvin Konner who was raised as an Orthodox Jew but has lived his adult life without such faith explores the psychology development brain science evolution and even genetics of the varied religious impulses we experience as a species Conceding that faith is not for everyone he views religious people with a sympathetic eye his own upbringing his apprenticeship in the trance dance religion of the African Bushmen and his friends and explorations in Christian Buddhist Hindu Muslim and other faiths have all shaped his perspective Faith has always manifested itself in different ways some revelatory and comforting some kind and good some ecumenical and cosmopolitan some bigoted coercive and violent But the future Konner argues will both produce more nonbelievers and incline the religious among us holding their own by having larger families to increasingly reject prejudice and aggression A colorful weave of personal stories of religious and irreligious encounters as well as new scientific research *Believers* shows us that religion does much good as well as undoubted harm and that for at least a large minority of humanity the belief in things unseen neither can nor should go away *The Digital God* William Indick, 2015-03-16 As humans charge up the steep slope of technological innovation digital age media increasingly shapes our perception of everything even spiritual matters The next stage of spiritual development may be the product of a digital interface between our own image of the divine virtual reality technology that produces real perceptions and with devices that stimulate areas of the brain associated with spiritual experience This book explores the influence of digital media on spirituality and the impact of the digital environment on our experience of the spiritual world The author predicts a future in which digital technology and neuroscience will combine to create a new understanding of the divine Instructors considering this book for use in a course may request an examination copy here *Tragic Cognition in Shakespeare's Othello* Paul Cefalu, 2015-05-21 Paul Cefalu argues that Shakespearean characters raise timely questions about the relationship between cognition and consciousness and often defy our assumptions about normal cognition The book will appeal to scholars and students interested in both the virtues and limitations of cognitive literary criticism *In the Name of God* John Teehan, 2011-09-13 Religion is one of the most powerful forces running through human history and although often presented as a force for good its impact is frequently violent and divisive This provocative work brings together cutting edge research from both evolutionary and cognitive psychology to help readers understand the psychological structure of religious morality and the origins of religious violence Introduces a fundamentally new approach to the analysis of religion in a style accessible to the general reader Applies insights from evolutionary and cognitive psychology to both Judaism and Christianity and their texts to help understand the origins of religious violence Argues that religious violence is grounded in the moral psychology of religion Illustrates its controversial argument with reference to the 9 11 terrorist attacks and the response to the attacks from both the terrorists and the President Suggests strategies for beginning to counter the divisive aspects of religion Discusses the

role of religion and religious criticism in the contemporary world Argues for a position sceptical of the moral authority of religion while also critiquing the excesses of the new atheists for failing to appreciate the moral contributions of religion
Awarded Honourable Mention 2010 Prose Awards *The Crucible of Religion* Wojciech Maria Zalewski, 2012-02-13 Religion is commonly viewed through the lens of the world's religious traditions stressing the differences and often the conflicts among them The author of this book instead presents religion as a common and universal human phenomenon based deeply in a human nature shared by all In this view the underlining and unifying principle of religion is a particular affirmative attitude toward life which he presents as the Ultimate Value and as such the key cultural constituent and defining factor of all religion This Ultimate Value finds its expressions in various civilizations and results in a variety of forms these are what we know as the world's religious traditions By analyzing the roles of both culture and civilization in their attitudes toward life the author places religion beyond religious traditions and shows how the latter regardless of whether they are theistic or atheistic draw their principles from the former mainly by promoting the Golden Rule in its applications **The Philosophy**

The Animal at Unease with Itself Isaac M. Alderman, 2020-08-20 Quoting Derrida in *The Animal at Unease with Itself* Death Anxiety and the Animal Human Boundary in Genesis 2-3 Isaac M Alderman draws attention to the fact that humans are the only animals who are disturbed by nakedness This unease with regard to our own bodies is an important aspect of the study of disgust and death anxiety Alderman seeks to apply terror management theorists' focus on death anxiety to biblical studies and to utilize the concept of animal reminder disgust the visceral reaction to reminders of our animality to better understand the opening chapters of Genesis dealing particularly with themes of mortality the human body and the animal human boundary in those chapters After describing relevant aspects of cognitive science terror management theory and animal reminder disgust Alderman demonstrates using Genesis 2-3 and the role of clothing as a marker of the animal human boundary there as a case study that an interdisciplinary approach that draws on cognitive science can illumine the biblical text in important ways *A Theology for a Mediated God* Dennis Ford, 2015-10-08 A Theology for a Mediated God introduces a new way to examine the shaping effects of media on our notions of God and divinity In contrast to more conventional social scientific methodologies and conversations about the relationship between religion and media Dennis Ford argues that the

characteristics we ascribe to a medium can be extended and applied metaphorically to the characteristics we ascribe to God just as earlier generations attempted to comprehend God through the metaphors of father shepherd or mother As a result his work both challenges and bridges the gap between students of religion and media and theology

Yoga, Meditation, and Mysticism Kenneth Rose, 2016-09-08 Contemplative experience is central to Hindu yoga traditions Buddhist meditation practices and Catholic mystical theology and despite doctrinal differences it expresses itself in suggestively similar meditative landmarks in each of these three meditative systems In *Yoga Meditation and Mysticism* Kenneth Rose shifts the dominant focus of contemporary religious studies away from tradition specific studies of individual religious traditions communities and practices to examine the contemplative universals that arise globally in meditative experience Through a comparative exploration of the itineraries detailed in the contemplative manuals of Theravada Buddhism Patanjali's Yoga and Catholic mystical theology Rose identifies in each tradition a moment of sharply focused awareness that marks the threshold between immersion in mundane consciousness and contemplative insight As concentration deepens the meditator steps through this threshold onto a globally shared contemplative itinerary which leads through a series of virtually identical stages to mental stillness and insight Rose argues that these contemplative universals familiar to experienced contemplatives in multiple traditions point to a common spiritual mental and biological heritage Pioneering the exploration of contemplative practice and experience with a comparative perspective that ranges over multiple religious traditions religious studies philosophy neuroscience and the cognitive science of religion this book is a landmark contribution to the fields of contemplative practice and religious studies

The Splintered Divine Spencer L. Allen, 2015-03-05 This book investigates the issue of the singularity versus the multiplicity of ancient Near Eastern deities who are known by a common first name but differentiated by their last names or geographic epithets It focuses primarily on the I tar divine names in Mesopotamia Baal names in the Levant and Yahweh names in Israel and it is structured around four key questions How did the ancients define what it meant to be a god or more pragmatically what kind of treatment did a personality or object need to receive in order to be considered a god by the ancients Upon what bases and according to which texts do modern scholars determine when a personality or object is a god in an ancient culture In what ways are deities with both first and last names treated the same and differently from deities with only first names Under what circumstances are deities with common first names and different last names recognizable as distinct independent deities and under what circumstances are they merely local manifestations of an overarching deity The conclusions drawn about the singularity of local manifestations versus the multiplicity of independent deities are specific to each individual first

name examined in accordance with the data and texts available for each divine first name *One God* Stephen Mitchell, Peter Van Nuffelen, 2010-04-29 Graeco Roman religion in its classic form was polytheistic on the other hand monotheistic ideas enjoyed wide currency in ancient philosophy This contradiction provides a challenge for our understanding of ancient pagan religion Certain forms of cult activity including acclamations of one god and the worship of theos hypsistos the highest god have sometimes been interpreted as evidence for pagan monotheism This book discusses pagan monotheism in its philosophical and intellectual context traces the evolution of new religious ideas in the time of the Roman empire and evaluates the usefulness of the term monotheism as a way of understanding these developments in later antiquity outside the context of Judaism and Christianity In doing so it establishes a framework for understanding the relationship between polytheistic and monotheistic religious cultures between the first and fourth centuries AD Theology after the Birth of God F. Shults, 2014-08-07 Engaging recent developments within the bio cultural study of religion Shults unveils the evolved cognitive and coalitional mechanisms by which god conceptions are engendered in minds and nurtured in societies He discovers and attempts to liberate a radically atheist trajectory that has long been suppressed within the discipline of theology
