Bielecki,2012-12-06 The first book bearing the title of this volume Inorganic Plant Nutrition was written by D R HOAGLAND of the University of California at Berkeley As indicated by its extended title Lectures on the Inorganic Nutrition of Plants it is a collection of lectures the JOHN M PRATHER lectures which he was invited in 1942 to give at Harvard University and presented there between April 10 and 23 of that year 41 years before the publication of the present volume They were not originally intended for publication but fortunately HOAGLAND was persuaded to publish them the book appeared in 1944 It might at first blush seem inappropriate to draw comparisons between a book embodying a set of lectures by a single author and an encyclopedic volume with no less than 37 contributors But HOAGLAND S book was a comprehensive account of the state of this science in his time as the present volume is for ours It was then still possible for one person at least for a person of HOAGLAND S intellectual breadth and catholicity of interests to encompass many major areas of the entire field from the soil substrate to the metabolic roles of nitrogen potassium and other nutrients and from basic scientific topics to the application of plant nutritional research in solving problems encountered in the field Genetic Aspects of Plant Mineral

Loughman, 2012-12-06 The idea of addressing the problem of the genetic specificity of mineral nutrition at an international level arose four years ago in a proposal for this topic to be included in the program of the II Congress of the Federation of European Societies for Plant Physiology FESPP as a separate section The Organising Committee of the II Congress of FESPP which was held in Santiago de Compostella in 1980 arranged a special session and it was clearly successful A special scientific meeting where the genetic aspects of plant nutrition in their widest sense could be presented and discussed comprehensively appeared to be necessary and that is how this Symposium came to be organized by the Serbian Academy of Sciences and Arts Much progress has already been achieved in this field and bearing in mind the importance of this problem particularly at the present moment it is necessary for us both to acquaint ourselves with what has been achieved so far and even more to direct attention and effort to the fundamental problems for the future
