The Miners: One Union, One Industry R. Page Arnot, 2023-07-28 First published in 1979 The Miners A History of the National Union of Mineworkers 1939 46 describes the events and factors that led to the nationalisation of the coal industry in 1946 The World War had a creative as well as a destructive effect on the industry it compressed fundamental changes into seven short years By the end of the war the federated trade unions had succeeded in bringing about the unification of their industry and the various county district and craft associations were themselves also unified in one single national body Two rival plans emerged during 1945 a coal owners plan in conjunction with an experts report approved by Churchill and his caretaker Cabinet and Labour's plan for the coal industry which came into force in 1946 as the Coal Industry Nationalisation Act A new epoch in management had begun with a National Coal Board new industrial relations and a new National Union of Mineworkers This book will be of interest to students of history sociology economics and political science **Miners, Unions and Politics, 1910-1947** Alan Campbell, Nina Fishman, 2016-12-05 The near destruction of the coal industry and the NUM offers a timely vantage point from which to appraise their history This book presents a collection of specially commissioned essays by leading authorities on miners history which challenge the stereotypical imagery of miners solidarity and loyalty to the Labour Party This book examines the politics of the Miners Federation of Great Britain the unique influences of syndicalism and communism within some of its constituent areas and the uneven pace of the Labour Party's forward march within the coalfields Such national developments are then studied within their diverse regional contexts through a series of case studies which permits comparison between the major British coalfields Finally the book considers the attempts to overcome these regional diversities with the formation of the National Union of Mineworkers and the nationalisation of the mining industry **Industrial Relations in the Privatised Coal Industry** Emma Wallis, 2018-02-06 This title was first published in 2000 This book describes and accounts for the patterns of industrial relations which have emerged in the UK coal industry since privatization in 1994 In so doing it also addresses wider issues relating to industrial relations and ownership Labour relations practices currently evident within the industry are compared with those which prevailed during the final years of nationalization and a series of case studies demonstrates that both continuity and change are visible Whilst continuity with the patterns of labour relations established during the final decade of public ownership is shown to have had negative implications for organized labour within the industry however the changes associated with privatization are demonstrated to have been a more ambivalent force This book concludes that privatization has had a significant influence upon industrial relations within the industry and that organized labour has in general been detrimentally affected by these developments *The British Miner in the Age of De-Industrialization* Jörg Arnold, 2024 A book which challenges received understandings of the place of the miner in contemporary British history arguing that the British coal miners went through a cyclical movement from loser to winner and back again as Britain underwent a de industrial

Great Britain CPGB has been seen by many as a microcosm of the Communist Capitalist struggle in the early twentieth century Its size belied its influence and so despite never being a mainstream political movement it had a powerful presence in British society Neil Redfern re examines the movement and its relationship to imperialism tracing the history of British communism from its revolutionary roots forged during the turmoil of 1917 1921 He finds that the CPGB never made a clean break with the reformism nationalism and Euro centrism despite World War I the 1917 revolution and mass movements in Asia Africa and Latin America Redfern argues that this led most of the left to support the First World War and so by extension found itself supporting the Second World War and Britain s reconquest of its colonial possessions This is essential reading for scholars of British Political and Social History as well as Imperialism Communism and left wing ideology
