National Park Conundrums The Wolves Of Isle Royal

David Baud

National Park Conundrums The Wolves Of Isle Royal:

National Park Conundrums Gary L. Wockner, 1997-10-10 **The Wolves of Isle Royale** Rolf Olin Peterson, 2007 A new edition of a classic the compelling firsthand account of an ancient predator prey relationship the Isle Royale wolf and moose dynamic Policy Conundrums in the National Parks Gary L. Wockner, 1997 Science and Ecosystem Management in the National Parks William L. Halvorson, Gary E. Davis, 2023-01-10 Our national parks are more than mere recreational destinations They are repositories of the nation's biological diversity and contain some of the last ecosystem remnants needed as standards to set reasonable goals for sustainable development throughout the land Nevertheless public pressure for recreation has largely precluded adequate research and resource monitoring in national parks and ignorance of ecosystem structure and function in parks has led to costly mistakes such as predator control and fire suppression that continue to threaten parks today This volume demonstrates the value of ecological knowledge in protecting parks and shows how modest investments in knowledge of park ecosystems can pay handsome dividends Science and Ecosystem Management in the National Parks presents twelve case studies of long term research conducted in and around national parks that address major natural resource issues These cases demonstrate how the use of longer time scales strongly influence our understanding of ecosystems and how interpretations of short term patterns in nature often change when viewed in the context of long term data sets Most importantly they show conclusively that scientific research significantly reduces uncertainty and improves resource management decisions Chosen by scientists and senior park managers the cases offer a broad range of topics including air quality at Grand Canyon interaction between moose and wolf populations on Isle Royale control of exotic species in Hawaiian parks simulation of natural fire in the parks of the Sierra Nevada and the impact of urban expansion on Saguaro National Monument Because national parks are increasingly beset with conflicting views of their management the need for knowledge of park ecosystems becomes even more critical not only for the parks themselves but for what they can tell us about survival in the rest of our world This book demonstrates to policymakers and managers that decisions based on knowledge of ecosystems are more enduring and cost effective than decisions derived from uninformed consensus It also provides scientists with models for designing research to meet threats to our most precious natural resources If we can learn to save the parks observe Halvorson and Davis perhaps we can learn to save the world

Wildlife Research and Management in the National Parks R. Gerald Wright, 1992 Should the wolf be reintroduced to Yellowstone National Park Should hunting of overabundant deer and elk be permitted in some parks How should grizzly bears be managed in frequently visited areas Are mountain goats to be eliminated from Olympic National Park R Gerald Wright probes these and other issues of public interest in this exploration of the unique role national parks have played in the protection study and management of animal life Controversy has often surrounded wildlife management primarily when societal attitudes toward specific animals do not mesh with Park Service practices Those practices are influenced by the

public as well as by the evolution of a program of scientific study in the national parks As park environments are increasingly threatened by growing numbers of visitors outside land use changes and pollution it is more important than ever that scientific knowledge administrative willingness and public support combine to help create the policies necessary for appropriate management and protection of park resources Wright traces the history of wildlife management in the U S national parks bringing together a diversity of literature and previously unpublished information that will be of concern to wildlife and land management specialists conservationists and all those interested in our national parks

Virtualism, Governance and Practice James G. Carrier, Paige West, 2009-11-01 Many people investigating the operation of large scale environmentalist organizations see signs of power knowledge and governance in their policies and projects This collection indicates that such an analysis appears to be justified from one perspective but not from another The chapters in this collection show that the critics concerned with the power of these organizations to impose their policies in different parts of the world appear justified when we look at environmentalist visions and at organizational policies and programs However they are much less justified when we look at the practical operation of such organizations and their ability to generate and carry out projects intended to reshape the world

Wolves for Yellowstone? Yellowstone National Park (Agency : U.S.), U.S. Fish and Wildlife Service, 1990 Vol 3 4 edited by John D Varley and Wayne G Brewster Sarah E Broadbent and Renee Evanoff technical editors

Preserving Nature in the National Parks Richard West Sellars, 2009-01-01 This book traces the epic clash of values between traditional scenery and tourism management and emerging ecological concepts in the national parks America s most treasured landscapes It spans the period from the creation of Yellowstone National Park in 1872 to near the present analyzing the management of fires predators elk bear and other natural phenomena in parks such as Yellowstone Yosemite Grand Canyon and Great Smoky Mountains Based largely on original documents never before researched this is the most thorough history of the national parks ever written Focusing on the decades after the National Park Service was established in 1916 the author reveals the dynamics of policy formulation and change as landscape architects foresters wildlife biologists and other Park Service professionals contended for dominance and shaped the attitudes and culture of the Service The book provides a fresh look at the national parks and an analysis of why the Service has not responded in full faith to the environmental concerns of recent times Richard West Sellars a historian with the National Park Service has become uniquely familiar with the history culture and dynamics of the Service including its biases internal alliances and rivalries self image folklore and rhetoric The book will prove indispensable for environmental and governmental specialists and for general readers seeking an in depth analysis of one of America s most admired federal bureaus

Island Geographies Elaine Stratford, 2016-11-03 Islands and their environs aerial terrestrial aquatic may be understood as intensifiers their particular and distinctive geographies enabling concentrated study of many kinds of challenges and opportunities This edited collection brings together several emerging and established academics with

expertise in island studies as well as interest in geopolitics governance adaptive capacity justice equity self determination environmental care and protection and land management Individually and together their perspectives provide theoretically useful empirically grounded evidence of the contributions human geographers can make to knowledge and understanding of island places and the place of islands Nine chapters engage with the themes issues and ideas that characterise the borderlands between island studies and human geography and allied fields and are contributed by authors for whom matters of place space environment and scale are key and for whom islands hold an abiding fascination The penultimate chapter is rather more experimental a conversation among these authors and the editor while the last chapter offers timely reflections upon island geographies past and future penned by the first named professor of island geography Stephen Royle *Wolves for Yellowstone?: Research & analysis* Yellowstone National Park,U.S. Fish and Wildlife Service,1990 Vol 3 4 edited by John D Varley and Wayne G Brewster Sarah E Broadbent and Renee Evanoff technical editors

The Wilderness Debate Rages on Michael P. Nelson,J. Baird Callicott,2008 Ten years ago The Great New Wilderness Debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them The Wilderness Debate Rages On will reinvigorate that conversation and usher in a second decade of debate Like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices The Wilderness Debate Rages On includes the best explorations of the concept of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness Narrative writers such as Wendell Berry Scott Russell Sanders Marilynne Robinson Kathleen Dean Moore and Lynn Maria Laitala are also given a voice in order to show how the wilderness debate is expanding outside the academy The writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural geographers and environmental activists The book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did Thoreau Muir and the early Leopold for purposes of outdoor recreation The editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity

Elk, Moose, Wolves, the Nature of Nature, and National Park Management Andrea Lage,1991

Transforming Parks and Protected Areas Kevin S. Hanna,Douglas A. Clark,D. Scott Slocumbe,2007-10-18 This title was originally published in 2007 The version published in 2012 is a PB reprint of the original HB The protection of natural resources and biodiversity through protected areas is increasingly based on ecological principles Simultaneously the concept of ecosystem based management has become broadly accepted and implemented over the last two decades However this period has also seen unprecedented rapid global social and ecological change which has weakened many protection efforts These changes have created an awareness of

opportunities for innovative approaches to managing protected areas and of the need to integrate social and economic concerns with ecological elements in protected areas and parks management A rare collection of articles that fuses academic theory critique of practice and practical knowledge Transforming Parks and Protected Areas analyzes and critiques these theories practices and philosophies looking in detail at the emerging issues in the design and operation of parks and protected areas Addressing critical dynamics and current practices in parks and protected areas management the excellent volume goes well beyond simple managerial solutions and descriptions of standard practice With contributions from leading academics and practitioners this book will be of value to all those working within ecology natural resources conservation and parks management as well as students and academics across the environmental sciences and land use management

Wolves for Yellowstone?: Research and analysis ,1992 Wildlife Ecology and Management Eric G. Bolen,William Laughlin Robinson,2003 This introductory textbook provides an overview of a broad range of topics including neglect and exploitation historical successes population ecology animal behavior food and cover wildlife diseases predators hunting and trapping water soil farmlands range forest management parks and refuges cities endangered wildlife economics conservation biology and the public trust Black and white images illustrate the text and a glossary defines important terms Bolen teaches at the University of North Carolina at Wilmington Robinson teaches at Northern Michigan University Annotation copyrighted by Book News Inc Portland OR **The George Wright Forum** ,1990 **Ecology and Conservation of Wolves in a Changing World** Ludwig N. Carbyn,Steven H. Fritts,Dale R. Seip,Canadian Circumpolar Institute,1995 This book is a compilation of selected papers presented at the Second North American Symposium on Wolves held in Edmonton in August 1992 *Guide to Programs in Geography in the United States and Canada* Association of American Geographers,1998
Wolves Around the World, 1997 Update ,1997 **Trends** ,1990
