Investigacion en Administracion en America Latina, *Is Future Given?* Ilya Prigogine, 2003 In this book after discussing the fundamental problems of current science and other philosophic concepts beginning with controversies between Heraclitus and Parmenides Ilya Prigogine launches into a message of great hope the future has not been determined Contrary to globalisation and the apparent contemporary mass culture society individual behaviour is beginning to increasingly become the key factor which governs the evolution of both the world and society as a whole It is a message that challenges existing widespread views implicitly or explicitly through mass communication moreover the importance of the individual's actions implies a reflection of each person on the responsibilities that each one assumes when taking or acting upon a decision This responsibility is associated with the freedom of thought as well as a critical analysis of fashions customs preconceived ideas and ideologies externally imposed exactly contrary to the ideas of those who wish us to be perfect consumers in a world dominated only by monetary wealth Challenging this drive towards the elimination of freedom of thought in the individual is now imperative if we are to save man and his planet from catastrophe which seems to be ever imminent and unfortunately irreversible This last book of Ilya Prigogine provides a small disputable but nonetheless valuable contribution towards that end

Intertwinings Michael Staudigl, Barbara Weber, Karel Novotný, 2024-12-17 This anthology offers a comprehensive introduction to the contemporary phenomenologist James R Mensch exploring his oeuvre and thought Mensch's extensive body of work spans several decades often concretely engaging with three intersecting conditions of dialogue Alterity Intersubjectivity and Embodiment By intertwining these concepts Mensch exposes the ever threatening soliloquy of modern reason calling upon us to deconstruct the conflation of human freedom with sovereignty that figures at the core of Western political thought and practice The contributors to this book pick up these themes and explore the fragility and potentiality of our conceptions of discourse dialogue and the political Moreover and in applying Mensch's idea of a post foundational phenomenology this anthology honors Mensch's expansive work which spans key thinkers such as Husserl Levinas Merleau Ponty and Patočka and delves into subjects ranging from perception and time to ethics and ecology The volume is meant for students and researchers and explores these three interwoven conditions in various ways

Reclaiming Archaeology Alfredo González-Ruibal, 2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century Sigmund Freud Walter Benjamin Alois Riegl and Michel Foucault amongst many others However this power has also turned against archaeology because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries with little or no reference to the discipline It seems that excavation stratigraphy or ruins only become important at a trans disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them Meanwhile archaeologists have been usually more interested in borrowing theories from other fields rather than in developing the theoretical potential of the same concepts that other thinkers find so useful The time is ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality not of subalternity Reclaiming Archaeology explores how archaeology can be useful to rethink modernity's big issues and more specifically late modernity broadly understood as the 20th and 21st centuries The book contains a series of original essays not necessarily following the conventional academic rules of archaeological writing or thinking allowing rhetoric to have its place in disclosing the archaeological In each of the four sections that constitute this book method time heritage and materiality the contributors deal with different archaeological tropes such as excavation surface depth genealogy ruins fragments repressed memories and traces They criticize their modernist implications and rework them in creative ways in order to show the power of archaeology not just to understand the past but also the present Reclaiming Archaeology includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity including scholars from non Anglophone countries who have approached the issue in original ways during recent years as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists

Creativity and Time: A Sociological Exploration Juan A. Roche Cárcel, 2021-10-15 This book defends that the pursuit of originality constitutes one of the most important characteristics of creativity but that originality refers etymologically to both origin and originary Hence the book is structured into two parts dedicated respectively to the creative categories of origin and the creative categories of originary Within the former are creation myths games the origin of all cultural activity the dialectic chaos order axial civilizations the germ of our time and the struggle between generations a factor of social transformation and within the second creative capitalism creative work in the context of the global economy of risk and uncertainty and representative democracy However these two concepts are not isolated but deeply interrelated in a way that explains how creative originality builds a temporal narrative It has been dislocated in late modernity and with it creativity has been broken
