look like a genius You will actually be one Buy Now To Become A Human Calculator Every minute you wait to buy this book is another minute you don't see the benefit of being good with math numbers Put the power of mental math to work in your life so you can quickly easily make math and numbers more useful develop better memory habits increase concentration develop new ways to think and do speed math entirely in your head faster than a calculator Get your copy today A MUST BUY for students of Vedic Mathematics GMAT GRE SAT Case Study Interview and Case Interview **Head First Physics** Heather Lang, 2008-09-24 Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how Finally with Head First Physics there is This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience especially for students who just don't get it Head First Physics offers a format that's rich in visuals and full of activities including pictures illustrations puzzles stories and quizzes a mixed media style proven to stimulate learning and retention One look will convince you This isn't mere theory this is physics brought to life through real world scenarios simple experiments and hypothetical projects Head First Physics is perfect for anyone who's intrigued by how things work in the natural world You'll quickly discover that physics isn't a dry subject It's all about the world we live in encompassing everything from falling objects and speeding cars to conservation of energy and gravity and weightlessness and orbital behavior This book Helps you think like a physicist so you can understand why things really work the way they do Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam Introduces principles for the purpose of solving real world problems not memorization Teaches you how to measure observe calculate and yes how to do the math Covers scientific notation SI units vectors motion momentum conservation Newton's Laws energy conservation weight and mass gravitation and orbits circular motion and simple harmonic motion and much more If Myth Busters and other TV programs make you curious about our physical world or if you're a student forced to take a physics course now you can pursue the subject without the dread of boredom or the fear that it will be over your head Head First Physics comes to rescue with an innovative engaging and inspirational way to learn physics [Make Your Brain Work](#) Amy Brann, 2013-01-03 Everyone wants to be more effective at work and to get maximum impact from minimum effort Make Your Brain Work shows you how to do this using the latest insights from neuroscience about how our mind works and what really makes us tick Author Amy Brann is an expert in brain science but you don't have to be she has distilled the key findings you need into non technical practical guidance Read this clear engaging book and discover the things you can do to get yourself functioning at the top of your capabilities more of the time Learn the habits techniques and behaviours that will get you the results you want by making your brain work for you Leave stress overwhelm negative moods and poor time management behind Make Your Brain Work is your passport to a new improved you *Maths* June Haighton, 2004 Comprising three Worksheet Packs and a textbook this title is useful for the Adult Numeracy Curriculum covering Entry
