*Multiple Goals in Discourse* Karen Tracy,Nikolas Coupland,1990 The studies in this monograph share two common features a recognition of the intertwined nature of goal and discourse and a

recognition that people typically have more than one goal when they talk with others. It is essential that goals and discourse be conceived of as intertwined concepts. If talk is conceived as essentially a mode of action, then these actions will often be taken in the pursuance of objectives. Correspondingly, if we assume that people approach many social episodes with specific designs, ambitions, wishes, probably also misgivings and avoidances, then it seems natural to look at talk as at least a potential goal fulfillment mechanism.
