Nursing Diagnoses Made Easy Pasquale De Marco, 2025-07-07 Nursing diagnoses are essential to providing safe and effective nursing care. They provide a common language for nurses to communicate about the health status of their patients and to develop and implement care plans. This book provides a comprehensive overview of nursing diagnoses from the basics to the most advanced concepts. The first chapter introduces the concept of nursing diagnoses and the NANDA taxonomy. It explains how to use diagnostic reasoning to identify nursing diagnoses and how to document them in a patient's chart. The second chapter discusses the various assessment techniques that nurses use to collect data about their patients. These techniques include physical examination, psychosocial assessment, spiritual assessment, cultural assessment, and environmental assessment. The third chapter presents the most common nursing diagnoses, including risk for impaired skin integrity, impaired physical mobility, deficient knowledge, acute pain, and anxiety. The fourth chapter discusses the development of care plans for nursing diagnoses. It explains how to prioritize nursing diagnoses, write outcome statements, select nursing interventions, and evaluate care plans. The fifth chapter provides an overview of nursing interventions. It discusses the different types of nursing interventions, including pharmacological interventions, non-pharmacological interventions, patient education, counseling, and advocacy. The sixth chapter discusses the evaluation of outcomes. It explains how to measure patient outcomes, interpret outcome data, and revise care plans. The seventh chapter discusses nursing diagnoses in special populations, such as geriatric patients, pediatric patients, psychiatric patients, patients with disabilities, and patients from diverse cultures. The eighth chapter discusses ethical considerations in nursing diagnosis. It discusses the ethical principles that guide nurses in their work, such as autonomy, informed consent, confidentiality, truthfulness, and conflict of interest. The ninth chapter discusses advanced nursing diagnoses. It discusses complex nursing diagnoses, nursing diagnoses in critical care, nursing diagnoses in home health, nursing diagnoses in long-term care, and nursing diagnoses in palliative care. The tenth chapter discusses innovations in nursing diagnosis.
