Nutrient Requirements Of Horses:

Nutrient Requirements of Horses National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Nutrient Requirements of Horses, 2007-03-13 Proper formulation of diets for horses depends on adequate knowledge of their nutrient requirements. These requirements depend on the breed and age of the horse and whether it is exercising, pregnant or lactating. A great deal of new information has been accumulated since the publication 17 years ago of the last edition of *Nutrient Requirements of Horses*. This new edition features a detailed review of scientific literature summarizing all the latest information and provides a new set of requirements based on revised data. Also included is updated information on the composition of feeds, feed additives and other compounds routinely fed to horses. The effects of physiological factors such as exercise and environmental factors such as temperature and humidity are covered as well. *Nutrient Requirements of Horses* also contains information on several nutritional and metabolic diseases that horses often have. Designed primarily as a reference, both practical and technical, *Nutrient Requirements of Horses* is intended to ensure that the diets of horses and other equids contain adequate amounts of nutrients and that the intakes of certain nutrients are not so excessive that they inhibit performance or impair health. This book is primarily intended for animal nutritionists, veterinarians and other scientists; however, individual horse owners and managers will also find some of this material useful. Professors who teach graduate courses in animal nutrition will find *Nutrient Requirements of Horses* beneficial as a textbook.

Advances in Equine Nutrition III J. D. Pagan, R. J. Geor, 2005-01-01 Featuring international authorities that presented at KER conferences, this comprehensive collection of research and review papers discusses such topics as refined nutritional requirements for horses, effective ways to deliver nutrients for horses in all athletic endeavors, achieving optimal growth in young horses and ensuring nutrient requirements are being fulfilled in reproductively active horses.

Equine nutrition William Martin-Rosset, 2023-08-07

Equine nutrition gives insight in updated feed evaluation systems based on net energy, global amount of amino acids and feed intake. These systems allow accurate comparison of the nutritive value of feeds, the formulation of well balanced rations to achieve production or utilisation goals and the prediction of equine performance based on the quantity and quality of the ration. Equine nutrition provides an update of the nutrient requirements for all categories of equine. Tables of recommended allowances based on long term feeding trials carried out at INRA are proposed. These recommendations and the simple approach to formulation of rations based on the use of a maximum amount of forage have been successfully tested in the fields. The importance of grass intake during summer for the different

categories of equines is evaluated and grazing management is described Feed allowances and feeding practices are proposed in respect of health and behaviour of the equine and of the preservation of environment The feed tables list 169 roughages and 71 concentrates feeds Data have been derived from digestion trials on horses carried out at INRA and measurements of voluntary intake for most of the forages This book also deals with several distinct pedagogic tools dedicated to end users equinarian a guide to body condition scoring in horse and Equine Rami for horse grazing and farming management This book is an essential source for scientists teachers and their students advisers and professionals
