Watson, 2000-09-19 Evidence shows that nutritional supports can help maintain health in the HIV infected patient by replacing lost nutrients, compensating for nutritional damage done by the retrovirus induced immunodeficiency and stimulating the remaining immune system and cells for better host defenses. This new edition of *Nutrition and AIDS* is a timely look. **HIV Infection and the Cardiovascular System** Giuseppe Barbaro, 2003-01-01 Past studies revealed that HIV infection may implicate diverse cardiac diseases such as cardiomyopathy, coronary heart disease, cardiac neoplasms, endocarditis or pericarditis. In addition, it was found that highly active antiretroviral therapy (HAART) often causes as an adverse effect a metabolic syndrome characterized by lipodystrophy, lipoatrophy, dyslipidemia and insulin resistance leading to an increase in coronary artery disease and stroke. This book focuses on the most recent findings in HIV associated heart disease and HAART associated metabolic and cardiovascular complications. In a first part, the epidemiology, pathogenesis and molecular biology of HIV associated cardiovascular disease, pulmonary hypertension, lipodystrophy and HAART associated metabolic syndrome are reviewed. The second part offers clinical and therapeutic insights into HIV HAART associated atherosclerosis, coronary heart disease, stroke, vasculitic syndromes and pulmonary hypertension. Besides cardiovascular complications in HIV infected children, cardiac surgery in HIV infected patients and the prevention and management of HAART associated cardiovascular complications are points under discussion. Finally, the interaction between HAART and drugs commonly used to treat cardiovascular disease is carefully analyzed. *HIV Infection and the Cardiovascular System* presents state of the art findings of basic and clinical scientists and is a valuable reference for specialists in cardiology and internal medicine as well as for infectiologists. *Public Health Nutrition* Natalie Stein, 2014 Issues related to nutrition are among the most pressing public health concerns in modern times. Worldwide malnutrition affects nearly 1 billion individuals or more than one in seven people.
