developmental disabilities of retardation this volume is divided into two parts Section 1 presents basic family processes and approaches for describing family dynamics It deals with these issues from a broad perspective including studying families at dinner families in different cultural contexts and the understanding of family in nonhuman primates Section 2 looks at family processes in the service of studying families at risk The risk factors include poverty malnutrition and developmental delay and retardation The study of family processes in these contexts provides data on family dynamics as well as how these dynamics impact on the children s developing competence This volume will be informative for researchers clinicians and educators from a variety of disciplines and settings The editors aim is to bring a greater clarity to issues concerning the family life of children and highlight new research and possibilities for intervention
