Ferrari, Vincenzo Pota, Michele Umbrello, 2024-11-20 This book draws a pathway from metabolic assessment and nutrition support to advances in renal replacement therapy and organ support in critical care underling the specific clinical aspect and focusing on medical clinical management in critical care Metabolic alterations in critically ill patients have been studied for many years Despite everything the heterogeneity of critically ill patients the duration and variable severity of the acute phase of the disease and the numerous confounding factors have hindered progress in this field A cornerstone of metabolic care is nutrition that is an essential part of the care for critically ill patients although the optimal feeding strategy for patients in the

intensive care unit is still debated and often remains a challenge for the intensive care team in clinical practice. In addition, acute loss of renal function interferes with the metabolism of all macronutrients responsible for pro-inflammatory, pro-oxidative and hyper-catabolic situations. The physiological and biological modifications related to acute renal failure in critically ill patients, including the current use of continuous renal replacement therapies, have dramatically changed the type and importance of the metabolic and nutrition disturbances observed during treatment of renal failure. This book, addressed to healthcare providers working in intensive care units, aims to provide a comprehensive synthesis and interpretation of the adult critical care nutrition and critical care nephrology literature with a particular focus on continuing practice gaps and areas with new data to assist clinicians in making practical yet evidence-based decisions regarding nutrition management during the different stages of critical illness.

Advanced Nutrition and Dietetics in Nutrition Support Mary Hickson, Sara Smith, 2018-01-23. Written in conjunction with the British Dietetic Association, *Advanced Nutrition and Dietetics in Nutrition Support* provides a thorough and critical review of the fundamental and applied literature in nutrition support. Extensively evidence-based and internationally relevant, it discusses undernutrition, nutritional screening, assessment and interventions, as well as key clinical conditions likely to require nutrition support and the approaches to managing this in each of these conditions. Clinically oriented, *Advanced Nutrition and Dietetics in Nutrition Support* is the ideal reference for all those managing undernutrition in a range of clinical areas.

Management of Chronic Kidney Disease Mustafa Arıcı, 2023-11-24. The second edition of this essential work presents how to diagnose, treat and develop an appropriate management plan for patients with chronic kidney disease (CKD). Significantly updated, chapters cover the fundamental sciences associated with CKD, its clinical assessment, evaluation, management of risk factors along with cardiovascular disease in the context of CKD. Detailed insight is provided on how to assess for and manage a variety of CKD complications and special circumstances in CKD patients. The path to renal replacement therapy is also thoroughly described. New topics featured include associated rheumatic and electrolyte disorders. Furthermore, diagnostic and therapeutic approaches are presented according to the latest staging system for CKD, with patient care being discussed separately for each disease stage. The book also recognizes the needs of busy clinicians by including helpful boxes summarizing the evidence on diagnostic and therapeutic issues and practice pearls based upon the latest guidelines.

Management of Chronic Kidney Disease: A Clinician's Guide is a comprehensive, practically applicable guide to the management of patients with CKD. Its didactic features enable the reader to quickly identify the key points covered and disseminate the information they require, making it a valuable resource for all practicing and trainee medical practitioners who encounter these patients.
