Nutrition and Women's Cancers Barbara C. Pence, Dale M. Dunn, 1998-04-09 Until recently there has been a gap in the scientific literature regarding women's health issues. The National Institutes of Health are encouraging more research focused on women and many researchers are beginning to answer the call. *Nutrition and Women's Cancers* presents a comprehensive discussion of the etiological factors relevant to cancers that are most common in women. It covers female-specific cancers as well as lung and colon cancer which are highly prevalent in women. The text focuses on the influence of nutrition and diet on these cancers and also discusses the impact of genetics and environmental factors so that the reader may interpret the relative importance of diet in the complete context of multiple causes. This book presents specific studies of women's health and cancer issues and offers directions for future research in the field. *Women's Cancers* Kerry Anne McGinn, Kerry Anne McGinn, NP, MSN, Pamela J.
