Kinsley, 1996 Explicitly dealing with the religious aspects of healing and healers this unique and intriguing book examines illness healing and religion in cross cultural perspective by looking at how sickness is understood and treated in a wide variety of cultures

Centered around three principle themes the text A illustrates how crucial it is to frame illness in a meaningful context in every culture and how this process is almost always bound up with religious spiritual and moral concerns B shows how many beliefs strategies and practices that characterize traditional cultures also appear in Christianity putting healing in the Christian tradition in a broad rational context and C discusses the continuities between traditional explicitly religious and modern medical cultures demonstrating that many features of modern scientific medicine are symbolic and ritualistic and that many aspects and practices of modern medicine are similar to healing as seen in traditional pre scientific medical cultures For those in the religious anthropological and medical professions
