Health, and Agency Lawrence C. Becker,2012-06-15 Lawrence C Becker introduces an unconventional set of background ideas for future philosophical work on normative theories of basic justice The organizing concept is habilitation the process of equipping a person or thing with functional abilities or capacities The specific proposals drawn from the concept of habilitation are independent of any particular set of distributive principles The result is a framework for theory that includes a metric for the pursuit of basic justice but not a normative theory of it The basic idea is that receiving and providing habilitation is a lifelong necessity for human beings from their nearly helpless newborn state through their struggles to survive and thrive thereafter even into the most severe diminishments of old age This lifelong human necessity underlies all questions about basic justice and the possibilities for habilitation define the circumstances under which those questions arise

Focusing on the circumstances of habilitation calls attention to the central role of physical and psychological health Without basic good health in both domains it is not possible to cope with the habilitative demands of one s physical and psychological endowments and one s physical and social environments And for human beings a particular aspect of human health effectively sums up these matters namely human agency the nature and extent of the ability to act effectively The book proposes specifically that normative theories of basic justice adopt the habilitation framework What then appears to follow is that the most plausible comprehensive metric for assessing progress toward basic justice will be the level and distribution of basic good health Moreover achieving robustly healthy agency will be the most plausible tactical target for making progress toward basic justice no matter what one s favored distributive principles might be *Food and Society* William C. Whit,1995-01-01 The importance of food is undeniable Yet because it is so close and obvious we often fail to pay attention to it In *Food and Society A Sociological Approach* author William C Whitt attempts to develop a multi level multidisciplinary approach to the relationship between food and the larger world Organized from the experiences of food consumption through its preparation distribution storage and production this book discusses the role of food in past societies the basics of nutrition contemporary issues including body size food and culture food production world hunger and food innovation **Library of Congress Subject Headings** Library of Congress.
